<b>Contributors</b>	ix
<b>Preface</b>	xi
<b>PART 1: METHODS IN MOLECULAR NUTRITION RESEARCH</b>	
<b>1 Genomics and Beyond</b>	1
<i>Ji Zhang</i>	
<b>2 Perspectives in Post-genomic Nutrition Research</b>	13
<i>Hannelore Daniel</i>	
<b>PART 2: CELLULAR NUTRIENT HOMEOSTASIS, PROLIFERATION AND APOPTOSIS</b>	
<b>3 Molecular Physiology of Plasma Membrane Transporters for Organic Nutrients</b>	21
<i>Hannelore Daniel</i>	
<b>4 Intracellular Trafficking and Compartmentalization of Vitamins and Their Physiologically Active Forms</b>	43
<i>Donald B. McCormick</i>	
<b>5 Nutrient Homeostasis in Proliferating Cells</b>	61
<i>Janos Zempleni</i>	
<b>6 Nutrients and Apoptosis</b>	73
<i>John C. Mathers</i>	
<b>PART 3: ROLES FOR NUTRIENTS IN SIGNAL TRANSDUCTION, GENE EXPRESSION AND PROTEOLYSIS</b>	
<b>7 Glucose Regulation of Gene Expression in Mammals</b>	91
<i>Fabienne Foufelle and Pascal Ferré</i>	

<b>8</b>	<b>Amino Acid-dependent Control of Transcription in Mammalian Cells</b>	105
	<i>Michael S. Kilberg, Van Leung-Pineda and Chin Chen</i>	
<b>9</b>	<b>Fatty Acids and Gene Expression</b>	121
	<i>Ulrike Beisiegel, Joerg Heeren and Frank Schnieders</i>	
<b>10</b>	<b>Role of RARs and RXRs in Mediating the Molecular Mechanism of Action of Vitamin A</b>	135
	<i>Dianne R. Soprano and Kenneth J. Soprano</i>	
<b>11</b>	<b>Regulation of Gene Expression by Biotin, Vitamin B<sub>6</sub> and Vitamin C</b>	151
	<i>Krishnamurti Dakshinamurti</i>	
<b>12</b>	<b>Selenium and Vitamin E</b>	167
	<i>Alexandra Fischer, Josef Pallauf, Jonathan Majewicz, Anne Marie Minihane and Gerald Rimbach</i>	
<b>13</b>	<b>Sphingolipids: a New Strategy for Cancer Treatment and Prevention</b>	187
	<i>Eva M. Schmelz</i>	
<b>14</b>	<b>The Health Effects of Dietary Isoflavones</b>	201
	<i>Thomas M. Badger, Martin J.J. Ronis and Nianbai Fang</i>	
<b>15</b>	<b>Mechanisms of Ubiquitination and Proteasome-dependent Proteolysis in Skeletal Muscle</b>	219
	<i>Didier Attaix, Lydie Combaret, Anthony J. Kee and Daniel Taillandier</i>	
<b>PART 4: NUCLEIC ACIDS AND NUCLEIC ACID-BINDING COMPOUNDS</b>		
<b>16</b>	<b>Diet, DNA Methylation and Cancer</b>	237
	<i>Judith K. Christman</i>	
<b>17</b>	<b>Biotinylation of Histones in Human Cells</b>	267
	<i>Janos Zempleni</i>	
<b>18</b>	<b>Niacin Status, Poly(ADP-ribose) Metabolism and Genomic Instability</b>	277
	<i>Jennifer C. Spronck and James B. Kirkland</i>	
<b>PART 5: MOLECULAR EVENTS AFFECT PHYSIOLOGY</b>		
<b>19</b>	<b>Assembly of Triglyceride-transporting Plasma Lipoproteins</b>	293
	<i>Joan A. Higgins</i>	
<b>20</b>	<b>Regulation of Cellular Cholesterol</b>	309
	<i>Ji-Young Lee, Susan H. Mitmesser and Timothy P. Carr</i>	
<b>21</b>	<b>2002 Assessment of Nutritional Influences on Risk for Cataract</b>	321
	<i>Allen Taylor and Mark Siegal</i>	
<b>22</b>	<b>Nutrition and Immune Function</b>	349
	<i>Parveen Yaqoob and Philip C. Calder</i>	

---

**PART 6: FOODS**

- |           |  |     |
|-----------|--|-----|
| <b>23</b> | <b>Molecular Mechanisms of Food Allergy</b>            | 369 |
|           | <i>J. Steven Stanley and Gary A. Bannon</i>            |     |
| <b>24</b> | <b>Safety Assessment of Genetically Modified Foods</b> | 381 |
|           | <i>Steve L. Taylor</i>                                 |     |
|           | <b>Index</b>   | 395 |
