<i>Preface</i>	ix
1 The spacecraft and instruments	1
1.1 Meteorological satellites	1
1.1.1 Early meteorological satellites	1
1.1.2 The NOAA series of satellites	5
1.2 The Advanced Very High Resolution Radiometer (AVHRR)	14
1.2.1 Origins of the AVHRR	14
1.2.2 Construction of the instrument	15
1.2.3 Data collection and transmission	22
1.2.4 Use of AVHRR data	26
1.3 The ARGOS data collection and platform location system	27
1.4 The TIROS Operational Vertical Sounder (TOVS) system	29
1.4.1 The TOVS package	29
1.4.2 The HIRS/2	30
1.4.3 The SSU	31
1.4.4 The MSU	34
1.5 The future of the AVHRR	36
2 The data	45
2.1 Data structure and format	45
2.1.1 Introduction	45
2.1.2 The HRPT format	46
2.1.3 The APT format	53
2.2 Calibration of AVHRR data	57
2.2.1 Spectral response functions	58
2.2.2 Pre-flight radiometric calibration	59
2.2.3 In-flight calibration of HRPT data	77
2.2.4 Non-linearity correction	85
2.2.5 Calibration of APT data	90
2.2.6 Post-launch calibration	93

2.3	Scheduling	102
2.4	NOAA's archival and distribution of data	104
2.4.1	Reception, pre-processing and archival of AVHRR data	104
2.4.2	Operational products	108
2.4.3	Data distribution to users	116
2.5	Direct readout stations	120
2.5.1	Introduction	120
2.5.2	APT data reception	121
2.5.3	HRPT data reception	126
3	Pre-processing	133
3.1	Georeferencing/geolocation/geometrical rectification	133
3.1.1	Introduction	133
3.1.2	The use of ephemeris data	136
3.1.3	The use of ground control points	143
3.1.4	Combined ephemeris data and ground control points	145
3.1.5	Resampling	148
3.1.6	Subpixel accuracy	152
3.1.7	The point spread function	153
3.2	Cloud detection techniques	157
3.3	Atmospheric corrections	169
3.3.1	Introduction	169
3.3.2	Radiative transfer theory	169
3.3.3	Physical processes involved in atmospheric correction	171
3.3.4	Emitted radiation	172
3.3.5	Reflected radiation	174
3.3.6	Atmospheric transmission	176
3.3.7	Thermal infrared scanners and the radiative transfer equation	179
4	Earth surface temperatures	181
4.1	Satellite oceanography	181
4.2	Sea surface temperatures	182
4.2.1	Introduction	182
4.2.2	Calibration of AVHRR thermal infrared data	188
4.2.3	Atmospheric corrections	188
4.2.4	Accuracy	200
4.3	Ocean circulation	207
4.3.1	Flow patterns	208
4.3.2	Fronts, eddies and rings	210
4.3.3	The determination of current vectors	217
4.4	Land surface temperatures	220
4.4.1	Split-window methods	221
4.4.2	Thermal inertia	225
5	Vegetation	233
5.1	Background	233
5.2	Vegetation indices	236

5.3	Scale	246
5.4	Calculating the NDVI	256
5.4.1	General considerations	256
5.4.2	Radiometry	263
5.4.3	Atmospheric effects and cloud cover	265
5.4.4	Developments in computational procedures	271
5.5	Classification and phenology	271
5.6	Evapotranspiration, fire risk and semi-arid areas	288
5.6.1	Evapotranspiration	288
5.6.2	Drought and semi-arid areas	293
5.6.3	Fire risk assessment	298
5.7	Directional effects	303
5.7.1	Introduction	303
5.7.2	View angle effects	304
5.7.3	Bidirectional reflectance distribution function	310
5.8	Normalised difference vegetation index (NDVI) and microwave polarisation difference temperature (MPDT)	313
5.9	The study of sub-IFOV size objects	315
6	Channel 3, the neglected channel	321
6.1	Introduction	321
6.2	Small intense sources of heat	323
6.2.1	The principles of the detection of small high-temperature sources	323
6.2.2	Difficulties in fire detection	327
6.2.3	Fire studies	328
6.2.4	Resolvability	338
7	Applications	343
7.1	Snow and ice	343
7.1.1	Introduction	343
7.1.2	Area of snow cover	345
7.1.3	Depth of snow	347
7.1.4	Sea ice cover	351
7.1.5	Ice movements	359
7.1.6	Polar (Arctic and Antarctic) meteorology	365
7.2	Water body boundary mapping; bathymetry	369
7.2.1	Lakes	369
7.2.2	Flood monitoring	381
7.3	Water quality mapping	385
7.3.1	AVHRR and other systems	385
7.3.2	Suspended sediment concentrations	386
7.3.3	Algal blooms	392
7.3.4	Oil pollution	399
7.4	Fisheries	404
7.5	Atmospheric aerosols	408
7.5.1	Aerosol path length over the sea	408
7.5.2	Dust storms, volcanic ash clouds and fires	411
7.6	Precipitation and water resources	421

7.7	Geological studies	428
7.8	Sunlint and near-surface windspeeds	436
7.9	Climatology	443
7.9.1	Global data sets	443
7.9.2	Climate modelling	447
7.9.3	Energy fluxes	448
7.9.4	Cloud cover	452
7.9.5	Sea, snow and ice	453
7.9.6	Land surfaces	454
	<i>Appendix</i>	465
	<i>References</i>	477
	<i>Index</i>	523
