

Contents

1	Introduction	1
1.1	The Importance of Communication in Networks	1
1.2	Models of Communication	2
1.2.1	The Communication Mode	2
1.2.2	The Cost Measure	3
1.2.3	The Structure of the Algorithm	3
1.3	Practical Relevance	4
1.4	Interconnection Networks	5
1.5	The Main Contributions of this Thesis	5
1.6	Organization of the Thesis	6
2	Definitions	9
2.1	Communication Problems	9
2.2	The Standard Communication Mode	10
2.3	The Vertex- and Edge-Disjoint Paths Modes	11
2.4	Systolic Communication	13
2.5	Graph Notation	13
2.6	Interconnection Networks	14
3	The Standard Communication Mode	21
3.1	Broadcasting in the Butterfly Network	22
3.1.1	The Distance Argument	23
3.1.2	The Small Cycles Argument	25
3.1.3	Overview for Small Butterfly Networks	28
3.2	Broadcasting in the DeBruijn Network	28
3.3	Further Applications and Outlook	30
4	The Vertex- and Edge-Disjoint Paths Modes	33
4.1	Basic Concepts	35
4.1.1	Description of the Proof Techniques	35
	The Concept of Three-Phase Algorithms	35

The Lower Bound Technique	36
4.1.2 Illustration of the Proof Techniques	36
4.2 Gossiping in Two-Dimensional Grids and Planar Graphs	37
4.2.1 An Upper Bound for the Vertex-Disjoint Paths Mode	37
4.2.2 A Lower Bound for the Vertex-Disjoint Paths Mode	38
4.2.3 Optimal Gossiping in the Edge-Disjoint Paths Mode	41
The Concept of Pipelined Gossiping	41
Gossiping in the Two-Dimensional Grid	42
4.3 On the Power of the Lower Bound Method	47
4.3.1 A Lower Bound on $r_{VDP}^2(n, k)$	48
4.3.2 An Upper Bound on $r_{VDP}^2(n, k)$	50
4.4 Further Applications and Outlook	52
5 Systolic Communication	57
5.1 Systolic Gossiping in the Path	57
5.1.1 Systolic Gossiping in the Two-Way Mode	57
5.1.2 Systolic Gossiping in the One-Way Mode	58
Upper Bounds for the One-Way Mode	58
The Concept of Systolically Conflicting Time-Paths	60
Optimal Lower Bounds for the One-Way Mode	63
5.2 Further Applications and Outlook	68
6 Summary of the Thesis	69
7 Outlook	71
Appendix: Calculus for Chapter 3	73
A.1 Calculus for the Proof of Theorem 3.2	73
A.2 Calculus for the Proof of Theorem 3.4	76
A.3 Calculus for the Computation of Table 3.1	81
A.4 Calculus for the Proof of Theorem 3.7	82
Bibliography	87
List of References	87
Own Publications	93
Index	95
Subject Index	95
Index of Symbols	97
List of Algorithms	98
