

TABLE OF CONTENTS

Preface.....	v
Acknowledgments.....	ix
Chapter 1. Silica.....	1
1.1 INTRODUCTION.....	1
1.2 PRINCIPAL BUILDING BLOCKS AND CONCEPTS.....	1
1.3 STRUCTURE OF SiO ₂	4
1.3.1 Random network structure.....	5
1.3.2 Pseudocrystalline structure.....	7
1.3.3 Coexisting structures.....	10
1.4 SUMMARY.....	24
Chapter 2. Metal Oxide-Silica Systems.....	27
2.1 INTRODUCTION.....	27
2.2 BULK PROPERTIES.....	27
2.2.1 Refractive index.....	28
2.2.2 Molar volume and compressibility.....	29
2.2.3 Viscosity.....	31
2.2.4 Entropy and heat capacity.....	37
2.3 ACTIVITY-COMPOSITION RELATIONSHIPS.....	39
2.3.1 Phase equilibria.....	40
2.3.2 Thermodynamics of mixing.....	47
2.4 STRUCTURAL MODELS.....	48
2.4.1 Thermodynamic models.....	49
2.4.1.1 The Temkin model.....	50
2.4.1.2 The polymer model.....	51
2.4.1.3 Multicomponent mixing and the pseudocrystalline model.....	56
2.4.2 Numerical simulation of structure.....	58
2.4.2.1 Numerical calculations of local electronic structure and perturbations from network-modifying cations.....	60
2.4.2.2 Numerical simulation of anion and cation distribution.....	62
2.4.3 Experimental determination of melt structure.....	64
2.4.3.1 The anionic network structure.....	64
2.4.3.2 Abundance of structural units.....	74
2.5 SUMMARY.....	77
Chapter 3. Aluminosilicate Systems.....	79
3.1 INTRODUCTION.....	79
3.2 ALUMINUM CHARGE-BALANCE.....	80

ii *Table of Contents*

3.3 PROPERTIES OF ALUMINOSILICATE MELTS.....	80
3.3.1 Density and compressibility.....	81
3.3.2 Viscosity.....	84
3.3.3 Phase equilibria.....	91
3.3.3.1 Activity-composition relationships.....	92
3.3.3.2 The pseudocrystalline model.....	99
3.3.4 Thermodynamics of mixing.....	103
3.4 STRUCTURE OF ALUMINOSILICATE GLASSES AND MELTS.....	116
3.4.1 Properties of tetrahedral bonding in aluminosilicates.....	116
3.4.2 Structure of aluminosilicate melts and glasses at atmospheric pressure.....	122
3.4.2.1 Tectosilicate melts.....	124
3.4.2.2 Peralkaline aluminosilicate melts.....	136
3.4.2.3 Peraluminous aluminosilicate melts.....	140
3.4.3 Structure of aluminosilicate melts at high pressure.....	141
3.5 SUMMARY.....	145
Chapter 4. Iron Oxides.....	147
4.1 INTRODUCTION.....	147
4.2 STRUCTURAL POSITIONS OF FERRIC AND FERROUS IRON IN SILICATE MELTS.....	148
4.3 DETERMINATION OF $Fe^{3+}/\Sigma Fe$	155
4.4 REDOX EQUILIBRIA AND MELT STRUCTURE.....	157
4.4.1 Redox equilibria and extensive variables.....	157
4.4.2 Redox equilibria and intensive variables.....	164
4.5 RELATIONSHIPS BETWEEN SIMPLE AND COMPLEX SYSTEMS.....	170
4.6 REDOX EQUILIBRIA OF IRON AND MELT POLYMERIZATION.....	172
4.7 PHASE EQUILIBRIA IN IRON-BEARING SYSTEMS.....	176
4.8 PHYSICAL PROPERTIES OF IRON-BEARING SILICATE MELTS.....	179
4.8.1 Volume relations.....	179
4.8.2 Viscosity of iron-bearing silicate melts.....	182
4.9 SUMMARY.....	185
Chapter 5. Titanium.....	187
5.1 INTRODUCTION.....	187
5.2 PROPERTIES OF TITANIUM-BEARING SYSTEMS.....	188
5.3 STRUCTURAL ROLE OF TITANIUM IN MELTS AND GLASSES.....	193
5.3.1 The system SiO_2-TiO_2	194
5.3.2 Titanium in depolymerized melts.....	196
5.4 SUMMARY.....	200
Chapter 6. Phosphorous.....	201
6.1 INTRODUCTION.....	201

6.2 PROPERTIES OF PHOSPHOROUS-BEARING SYSTEMS.....	201
6.3 STRUCTURAL ROLE OF PHOSPHOROUS IN SILICATE MELTS AND GLASSES.....	206
6.3.1 The system $\text{SiO}_2\text{-P}_2\text{O}_5$	206
6.3.2 Phosphorous in depolymerized melts.....	208
6.4 SUMMARY.....	215
Chapter 7. Volatiles.....	217
7.1 INTRODUCTION.....	217
7.2 WATER.....	219
7.3 HYDROGEN.....	229
7.4 SULFUR.....	231
7.4.1 Reduced sulfur.....	231
7.4.2 Oxidized sulfur.....	235
7.5 CARBON.....	237
7.5.1 Carbon dioxide.....	238
7.5.2 Carbon monoxide.....	243
7.5.3 Methane.....	244
7.6 FLUORINE.....	247
7.7 SUMMARY.....	253
Chapter 8. Multicomponent, Complex Systems.....	255
8.1 INTRODUCTION.....	255
8.2 DATA BASE.....	259
8.2.1 Bulk chemical analyses.....	259
8.2.2 Structural information.....	259
8.2.2.1 Network-modifying cations.....	263
8.2.2.2 Aluminum.....	263
8.2.2.3 Ferric iron.....	266
8.2.2.4 Other cations.....	268
8.3 STRUCTURE OF MAGMATIC LIQUIDS.....	269
8.4 PETROLOGICAL IMPLICATIONS.....	279
8.4.1 Structure and properties.....	279
8.4.2 Redox equilibria and melt structure.....	286
8.5 SUMMARY.....	293
References.....	295
System Index.....	327
Subject Index.....	329
