<i>Preface</i>	xi
<i>Acknowledgements</i>	xiii
<i>Dedication</i>	xiv
<i>Notation</i>	xviii
1 Equilibrium and welfare	1
1.1 <i>Introduction</i>	1
1.2 <i>The Gale–Nikaido–Debreu lemma and fixed point theorems</i>	6
1.3 <i>A decentralized exchange economy</i>	10
1.4 <i>Some variations</i>	24
1.5 <i>Cournot–Nash equilibrium in an abstract economy</i>	31
1.6 <i>Pareto optimality</i>	33
1.7 <i>Decentralization: public goods and externalities</i>	38
1.8 <i>The core of an exchange economy</i>	41
1.9 <i>The Arrow–Debreu model</i>	45
1.10 <i>Complements and Details</i>	52
2 Finiteness and comparative statics	65
2.1 <i>Introduction</i>	65
2.2 <i>Preliminaries</i>	66
2.3 <i>Generic finiteness</i>	67
2.4 <i>Comparative statics</i>	73
2.5 <i>The transfer problem</i>	77
2.6 <i>Complements and Details</i>	88
3 Chaotic tatonnement	90
3.1 <i>Introduction</i>	90
3.2 <i>Examples of Scarf and Gale</i>	91
3.3 <i>Dynamical systems: preliminaries</i>	94

3.4	<i>Complexity</i>	95
3.5	<i>Chaos in Cobb–Douglas economies</i>	97
3.6	<i>Complements and Details</i>	100
4	Special structures	101
4.1	<i>Introduction</i>	101
4.2	<i>The Leontief economy</i>	101
4.3	<i>The two-sector model</i>	105
4.4	<i>Identifying leading sectors: a computational approach</i>	107
4.5	<i>Complements and Details</i>	112
5	Decentralization in infinite horizon economies	113
5.1	<i>Introduction</i>	113
5.2	<i>Decentralized resource allocation mechanisms</i>	114
5.3	<i>An aggregative model of intertemporal allocation</i>	116
5.4	<i>On the optimality of competitive programs</i>	128
5.5	<i>Role of competitive prices in achieving optimality: some further results in the strictly concave case</i>	133
5.6	<i>Intertemporal decentralized mechanisms</i>	136
5.7	<i>Intertemporal mechanisms under incomplete information: an impossibility result</i>	142
5.8	<i>Decentralized evolutionary mechanisms</i>	144
5.9	<i>The overlapping generations model</i>	149
5.10	<i>Equilibrium of dynamic pure exchange models</i>	160
5.11	<i>Complements and Details</i>	167
6	General equilibrium under uncertainty: complete markets	173
6.1	<i>Introduction</i>	173
6.2	<i>The Arrow–Debreu model: complete markets for present and future contingent delivery</i>	174
6.3	<i>Diverse information structures</i>	178
6.4	<i>Choice of information</i>	183
6.5	<i>A critique of the extended Arrow–Debreu economy</i>	184
6.6	<i>Complements and Details</i>	185
7	Radner equilibrium	186
7.1	<i>Introduction</i>	186
7.2	<i>Sequential trading</i>	187
7.3	<i>Existence</i>	192

7.4	<i>Incomplete markets with nominal assets: existence</i>	194
7.5	<i>Local uniqueness and Pareto optimality</i>	199
7.6	<i>Complements and Details</i>	201
8	Survival: random exchange economies	207
8.1	<i>Introduction</i>	207
8.2	<i>The probability of survival: intrinsic uncertainty in a Cobb–Douglas economy</i>	209
8.3	<i>An extension</i>	217
8.4	<i>A general model of a random exchange economy</i>	223
8.5	<i>Complements and Details</i>	233
9	Equilibrium with an infinite number of commodities	250
9.1	<i>Introduction</i>	250
9.2	<i>The Peleg–Yaari model</i>	251
9.3	<i>The core of the economy \mathcal{E}: a digression</i>	253
9.4	<i>Existence of equilibrium</i>	254
9.5	<i>Pareto optimality in the Peleg–Yaari economy</i>	259
9.6	<i>Complements and Details</i>	263
10	An axiomatization of the Walras correspondence in infinite dimensional spaces	281
10.1	<i>Introduction</i>	281
10.2	<i>The model</i>	282
10.3	<i>Some properties of the Walras correspondence</i>	284
10.4	<i>An axiomatization of the Walras correspondence</i>	285
10.5	<i>Existence of acceptable classes of economies I: countably many commodities</i>	286
10.6	<i>Existence of acceptable classes of economies II: separable utilities</i>	289
10.7	<i>Complements and Details</i>	291
11	Appendix	292
	<i>References</i>	305
	<i>Index</i>	321
