---

Introduction	xiii
Acknowledgments	xvii
<b>1 HOW TO SPECIFY NETWORK PROTOCOLS</b>	<b>1</b>
1.1 Semantics of Traditional Protocol Specifications	3
1.2 Syntax of Traditional Protocol Specifications	5
1.3 New Protocol Specifications	8
1.4 Bibliographical Notes	8
<b>2 FIRST PROTOCOL EXAMPLES</b>	<b>9</b>
2.1 A Vending Machine Protocol	9
2.2 A Request/Reply Protocol	12
2.3 A Manchester Encoding Protocol	14
2.4 The Current Internet	16
2.5 Bibliographical Notes	18
Exercises	19
<b>3 NETWORK PROCESSES</b>	<b>23</b>
3.1 Constants, Inputs, and Variables	24
3.2 Actions	25
3.3 Protocol Execution	27
3.4 Processes in the Internet	32

3.5 Bibliographical Notes	37
Exercises	37

<b>4 MORE ON PROCESSES</b>	<b>41</b>
----------------------------	-----------

4.1 Messages with Fields	41
4.2 Nondeterministic Assignment	42
4.3 Process Arrays	43
4.4 Parameters	44
4.5 A Resource Allocation Protocol	45
4.6 Process Communication in the Internet	48
4.7 Bibliographical Notes	50
Exercises	50

<b>5 TRANSMISSION ERRORS</b>	<b>59</b>
------------------------------	-----------

5.1 Types of Transmission Errors	60
5.2 Protocol Execution under Error Occurrence	61
5.3 Protocols that Tolerate Error Occurrence	64
5.4 Normal Timeout Actions	68
5.5 Implementing Normal Timeout Actions	71
5.6 Transmission Errors in the Internet	72
5.7 Bibliographical Notes	74
Exercises	74

<b>6 CONNECTIONS</b>	<b>81</b>
----------------------	-----------

6.1 Connections Using Timeouts	84
6.2 Connections Using Identifiers	86
6.3 Full-Duplex and Half-Duplex Connections	89
6.4 Connections in the Internet	95
6.5 Bibliographical Notes	98
Exercises	99

<b>7 DATA TRANSFER AND MULTIPLEXING</b>	<b>105</b>
---	------------

7.1 Multiplexing Data with Idleness	106
7.2 Multiplexing Data with Control	109
7.3 Multiplexing Data with Data	113
7.4 Data Transfer and Multiplexing in the Internet	117
7.5 Bibliographical Notes	119
Exercises	119

<b>8 ERROR DETECTION</b>	<b>125</b>
--------------------------	------------

8.1 Detection of Message Corruption	126
8.2 Detection of Message Loss	133

8.3 Detection of Message Reorder	133
8.4 Error Detection in the Internet	133
8.5 Bibliographical Notes	137
Exercises	137
<b>9 ERROR RECOVERY</b>	<b>143</b>
9.1 Forward Error Recovery	144
9.2 Backward Error Recovery	146
9.3 Cumulative Acknowledgment	147
9.4 Individual Acknowledgment	151
9.5 Block Acknowledgment	155
9.6 Error Recovery in the Internet	157
9.7 Bibliographical Notes	160
Exercises	160
<b>10 FLOW CONTROL</b>	<b>165</b>
10.1 Window Size Control	166
10.2 Rate Control	168
10.3 Circular Buffer Control	169
10.4 Flow Control in the Internet	176
10.5 Bibliographical Notes	177
Exercises	177
<b>11 MAINTAINING TOPOLOGY INFORMATION</b>	<b>183</b>
11.1 Local and Global Topology Information	183
11.2 Maintaining Local Topology Information	186
11.3 Maintaining Global Topology Information	188
11.4 Hierarchical Topology Information	191
11.5 Maintaining Hierarchical Topology Information	193
11.6 Maintaining Topology Information in the Internet	197
11.7 Bibliographical Notes	200
Exercises	200
<b>12 THE ABSTRACTION OF PERFECT CHANNEL</b>	<b>207</b>
12.1 Using the Abstraction of Perfect Channel	208
12.2 The Abstraction of Perfect Channel in the Internet	212
12.3 Bibliographical Notes	213
Exercises	213
<b>13 ROUTING</b>	<b>215</b>
13.1 Hierarchical Routing	216
13.2 Random Routing	220

13.3	Distributed Routing	222
13.4	Backward Learning Routing	226
13.5	Source Routing	229
13.6	Routing as a Black Box	233
13.7	Mobile Routing	234
13.8	Routing in the Internet	237
13.9	Bibliographical Notes	242
	Exercises	243

## **14 SWITCHING** 253

14.1	Circuit Switching	254
14.2	Datagram Switching	261
14.3	Switching in Networks with Changing Topologies	264
14.4	Switching in the Internet	266
14.5	Bibliographical Notes	269
	Exercises	269

## **15 CONGESTION CONTROL** 275

15.1	Congestion Control in Circuit Networks	277
15.2	Congestion Control in Datagram Networks	280
15.3	Deadlock Prevention in Datagram Networks	284
15.4	Congestion Control in the Internet	288
15.5	Bibliographical Notes	290
	Exercises	290

## **16 THE ABSTRACTION OF VIRTUAL NEIGHBORHOOD** 295

16.1	Using the Abstraction of Virtual Neighborhood	296
16.2	The Abstraction of Virtual Neighborhood in the Internet	298
16.3	Bibliographical Notes	298
	Exercises	298

## **17 NAMING AND NAME RESOLUTION** 301

17.1	Hierarchical Names	302
17.2	Name Resolution	304
17.3	Name Caches	308
17.4	Naming and Name Resolution in the Internet	310
17.5	Bibliographical Notes	311
	Exercises	312

## **18 SECURITY** 315

18.1	Asymmetric and Symmetric Keys	316
18.2	Authentication Using Asymmetric Keys	318
18.3	Authentication Using Symmetric Keys	322

18.4 Privacy and Integrity	327
18.5 Non-Repudiation	329
18.6 Authorization	330
18.7 Message Digest	332
18.8 Security in the Internet	333
18.9 Bibliographical Notes	337
Exercises	337

<b>19 DATA COMPRESSION</b>	<b>345</b>
----------------------------	------------

19.1 Huffman Coding	346
19.2 Static Huffman Compression	351
19.3 Dynamic Huffman Compression	353
19.4 Context-Sensitive Compression	354
19.5 Lossy Compression	357
19.6 Data Compression in the Internet	357
19.7 Bibliographical Notes	358
Exercises	358

<b>20 BROADCAST AND MULTICAST</b>	<b>363</b>
-----------------------------------	------------

20.1 Maintaining Spanning Trees	364
20.2 Low-Level Broadcast	367
20.3 High -Level Broadcast	369
20.4 Ordered, Precedence, and Recall Broadcasts	372
20.5 A Hierarchy of Broadcast Primitives	374
20.6 Broadcast and Multicast in the Internet	375
20.7 Bibliographical Notes	379
Exercises	380

<b>21 APPLICATION STRUCTURES</b>	<b>383</b>
----------------------------------	------------

21.1 Sockets	384
21.2 Clients and Servers Using Sockets	386
21.3 Clients and Servers Using Remote Procedures	392
21.4 Application Structures in the Internet	396
21.5 Bibliographical Notes	404
Exercises	404

<b>22 APPLICATIONS</b>	<b>407</b>
------------------------	------------

22.1 Echo	408
22.2 File Transfer	409
22.3 Remote Login	413
22.4 Applications in the Internet	416
22.5 Bibliographical Notes	422
Exercises	422

<b>23 RING NETWORKS</b>	<b>425</b>
23.1 Types of Ring Networks	425
23.2 Slotted Ring Networks	426
23.3 Token Ring Networks	430
23.4 Ring Networks in the Internet	437
23.5 Bibliographical Notes	440
Exercises	441
<b>24 BROADCAST NETWORKS</b>	<b>445</b>
24.1 Broadcast Processes	446
24.2 Collision Prevention	450
24.3 Collision Resolution	457
24.4 Broadcast Networks in the Internet	460
24.5 Bibliographical Notes	463
Exercises	463
<b>25 PROTOCOL LAYERS AND HIERARCHIES</b>	<b>465</b>
25.1 Protocols versus Protocol Layers	466
25.2 A Connection Protocol Layer	467
25.3 An Error Recovery Protocol Layer	470
25.4 A Protocol Hierarchy Example	473
25.5 Protocol Hierarchies in Computer Networks	479
25.6 The Next Internet	482
25.7 Bibliographical Notes	487
Exercises	487
Bibliography	491
Index for the Abstract Protocol	501
Index for Fundamental Protocols	503
Index for Internet Protocols	505
