

Basic and Clinical Aspects of Vertigo and Dizziness

Editors

MICHAEL STRUPP, ULRICH BÜTTNER, AND BERNARD COHEN

This volume is the result of a conference entitled **Basic and Clinical Aspects of Vertigo and Dizziness**, held on June 22–25, 2008, in Kloster Secon, Germany.

CONTENTS

Preface. *By* Michael Strupp, Ulrich Büttner, and Bernard Cohen xi

Part I. Vestibular Anatomy and Neurophysiology

Vestibular and Proprioceptive Contributions to Human Balance Corrections: Aiding These with Prosthetic Feedback. <i>By</i> C.G.C. Horlings, M.G. Carpenter, F. Honegger, and J.H.J. Allum	1
The Configuration and Attachment of the Utricular and Saccular Maculae to the Temporal Bone: New Evidence from Microtomography-CT Studies of the Membranous Labyrinth. <i>By</i> Ian S. Curthoys, Hilal Uzun-Coruhlu, Chris C. Wong, Allan S. Jones, and Andrew P. Bradshaw	13
How Vestibular Neurons Solve the Tilt/Translation Ambiguity: Comparison of Brainstem, Cerebellum, and Thalamus. <i>By</i> Dora E. Angelaki and Tatyana A. Yakusheva	19
How Actions Alter Sensory Processing: Reafference in the Vestibular System. <i>By</i> Kathleen E. Cullen, Jessica X. Brooks, and Soroush G. Sadeghi	29
Vestibulo-ocular Signal Transformation in Frequency-Tuned Channels. <i>By</i> Hans Straka, François M. Lambert, Sandra Pfanzelt, and Mathieu Beraneck	37
The Edinger–Westphal Nucleus Represents Different Functional Cell Groups in Different Species. <i>By</i> Anja K.E. Horn, Christina Schulze, and Susanne Radtke-Schuller	45
Parallel Ascending Vestibular Pathways: Anatomical Localization and Functional Specialization. <i>By</i> Andreas Zwergal, Michael Strupp, Thomas Brandt, and Jean A. Büttner-Ennever	51

Modification of the Cervico-ocular Reflex by Canal Plugging. <i>By</i> Sergei B. Yakushin, Yelena Tarasenko, Theodore Raphan, Jun-Ichi Suzuki, Charles C. Della Santina, Lloyd B. Minor, and Bernard Cohen	60
--	----

Part II. Vestibular Behavioral Physiology

The Human Vertical Translational Vestibulo-ocular Reflex: Normal and Abnormal Responses. <i>By</i> Ke Liao, Mark F. Walker, Anand Joshi, Millard Reschke, Michael Strupp, and R. John Leigh	68
Postural Compensation for Vestibular Loss. <i>By</i> Fay B. Horak	76
What the “Broken Escalator” Phenomenon Teaches Us about Balance. <i>By</i> Adolfo M. Bronstein, Karen L. Bunday, and Raymond Reynolds	82
Effect of Canal Plugging on Quadrupedal Locomotion in Monkey. <i>By</i> Bernard Cohen, Yongqing Xiang, Sergei B. Yakushin, Mikhail Kunin, Theodore Raphan, Lloyd Minor, and Charles C. Della Santina	89
Human Bipeds Use Quadrupedal Coordination during Locomotion. <i>By</i> Volker Dietz and Jan Michel	97
Structural Changes in the Human Brain following Vestibular Neuritis Indicate Central Vestibular Compensation. <i>By</i> Christoph Helmchen, Jan Klinkenstein, Björn Machner, Holger Rambold, Christian Mohr, and Thurid Sander	104
Galvanic Vestibular Stimulation Combines with Earth-Horizontal Rotation in Roll to Induce the Illusion of Translation. <i>By</i> Erich Schneider, Klaus Bartl, and Stefan Glasauer	116
Temporary Lesions of the Caudal Deep Cerebellar Nucleus in Nonhuman Primates: Gain, Offset, and Ocular Alignment. <i>By</i> Andreas Straube, Werner Scheuerer, Farrel R. Robinson, and Thomas Eggert	119
Balance before Reason in Rats and Humans. <i>By</i> Paul F. Smith, Thomas Brandt, Michael Strupp, Cynthia L. Darlington, and Yiwen Zheng	127
Anxiety-Related Behavior and Biogenic Amine Pathways in the Rat following Bilateral Vestibular Lesions. <i>By</i> Cynthia L. Darlington, Matthew Goddard, Yiwen Zheng, and Paul F. Smith	134
Estimating the Time Constants of the rVOR: A Model-Based Study. <i>By</i> S. Ramat and G. Bertolini	140

Part III. Ocular Motor System, Visual System, and Perception

Signal Processing and Distribution in Cortical-Brainstem Pathways for Smooth Pursuit Eye Movements. <i>By</i> Michael J. Mustari, Seiji Ono, and Vallabh E. Das	147
Effect of Gravity on Vertical Eye Position. <i>By</i> C. Pierrot-Deseilligny	155
Some Perspectives on Saccade Adaptation. <i>By</i> Jing Tian, Vincent Ethier, Reza Shadmehr, Masahiko Fujita, and David S. Zee	166
Respiratory Impact on Motion Sickness Induced by Linear Motion. <i>By</i> Agali Mert, Ineke Klopping-Ketelaars, and Willem Bles	173
Vestibular Critical Period, Maturation of Central Vestibular Neurons, and Locomotor Control. <i>By</i> Daniel Eugène, Séverine Deforges, Nicolas Vibert, and Pierre-Paul Vidal	180

Distinct Roles for Eye and Head Movements in Selecting Salient Image Parts during Natural Exploration. <i>By</i> Wolfgang Einhäuser, Frank Schumann, Johannes Vockeroth, Klaus Bartl, Moran Cerf, Jonathan Harel, Erich Schneider, and Peter König	188
Reafferent Head-Movement Signals Carried by Pursuit Neurons of the Simian Frontal Eye Fields during Head Movements. <i>By</i> Kikuro Fukushima, Satoshi Kasahara, Teppei Akao, Hiroshi Saito, Sergei Kurkin, Junko Fukushima, and Barry W. Peterson	194
The Effect of Dual Tasks in Locomotor Path Integration. <i>By</i> Stefan Glasauer, Alexandra Stein, Anna L. Günther, Virginia L. Flanagan, Klaus Jahn, and Thomas Brandt	201
Posture Control in Vestibular-Loss Patients. <i>By</i> Thomas Mergner, Georg Schweigart, Luminous Fennell, and Christoph Maurer	206
Spatial Neglect: Hypothetical Mechanisms of Disturbed Interhemispheric Crosstalk for Orientation. <i>By</i> Thomas Brandt, Stefan Glasauer, Michael Strupp, and Marianne Dieterich	216
The Perception of Translational Motion: What Is Vestibular and What Is Not. <i>By</i> Scott H. Seidman, Nicholas Au Yong, and Gary D. Paige	222
Human Hippocampal Activation during Stance and Locomotion: fMRI Study on Healthy, Blind, and Vestibular-Loss Subjects. <i>By</i> Klaus Jahn, Judith Wagner, Angela Deutschländer, Roger Kalla, Katharina Hüfner, Thomas Stephan, Michael Strupp, and Thomas Brandt	229
Perceptual Encoding of Self-Motion Duration in Human Posterior Parietal Cortex. <i>By</i> Barry M. Seemungal, Vincenzo Rizzo, Michael A. Gresty, John C. Rothwell, and Adolfo M. Bronstein	236

Part IV. Vestibular Clinical Studies

Progressive Vestibular Impairment in Patients with Polyneuropathy. <i>By</i> D. Straumann, A. Schmid-Priscoveanu, A. Studer, K. Hess, and A. Palla	239
Vertigo as a Symptom of Migraine. <i>By</i> Thomas Lempert, Hannelore Neuhauser, and Robert B. Daroff	242
Familial Episodic Ataxia: A Model for Migrainous Vertigo. <i>By</i> Joanna C. Jen and Robert W. Baloh	252
Vestibular "PREHAB." <i>By</i> Måns Magnusson, Babar Kahlon, Mikael Karlberg, Sven Lindberg, Peter Siesjö, and Fredrik Tjernström	257
Impact of Vertigo and Spatial Disorientation on Concurrent Cognitive Tasks. <i>By</i> Michael Andrew Gresty and John Foster Golding	263
Tell Me Your Vestibular Deficit, and I'll Tell You How You'll Compensate. <i>By</i> Michel Lacour, Sophie Duthiel, Brahim Tighilet, Christophe Lopez, and Liliane Borel	268
Vibrotactile Biofeedback Improves Tandem Gait in Patients with Unilateral Vestibular Loss. <i>By</i> Fay B. Horak, Marco Dozza, Robert Peterka, Lorenzo Chiari, and Conrad Wall III	279
Functional Magnetic Resonance Imaging Activations of Cortical Eye Fields during Saccades, Smooth Pursuit, and Optokinetic Nystagmus. <i>By</i> Marianne Dieterich, Stefanie Müller-Schunk, Thomas Stephan, Sandra Bense, Klaus Seelos, and Tarek A. Yousry	282

The Intensity of Downbeat Nystagmus during Daytime. <i>By</i> Rainer Spiegel, Nicole Rettinger, Roger Kalla, Nadine Lehnen, Dominik Straumann, Thomas Brandt, Stefan Glasauer, and Michael Strupp	293
The Presence of Lytic HSV-1 Transcripts and Clonally Expanded T Cells with a Memory Effector Phenotype in Human Sensory Ganglia. <i>By</i> Tobias Derfuss, Viktor Arbusow, Michael Strupp, Thomas Brandt, and Diethilde Theil	300
Effects of Acute Vestibular Lesions on Visual Orientation and Spatial Memory, Shown for the Visual Straight Ahead. <i>By</i> Karl-Friedrich Hamann, Udo Weiss, and Andrea Ruile	305
Applying Knowledge—Challenges in Bringing Scientific Advances to Dizzy Patients. <i>By</i> Thomas Haslwanter and James Ong	309
Lateral Canal Paroxysmal Positional Vertigo Revisited. <i>By</i> Daniele Nuti, Marco Mandalà, and Lorenzo Salerni	316

Part V. Short Papers

Vestibular-Evoked Myogenic Potentials in “Vestibular Migraine” and Menière’s Disease: A Sign of an Electrophysiological Link? <i>By</i> Bernhard Baier and Marianne Dieterich	324
Gait Deviations Induced by Visual Motion Stimulation in Roll Depend on Head Orientation. <i>By</i> Stanislavs Bardins and Erich Schneider	328
Head Impulse Testing Using Video-oculography. <i>By</i> Klaus Bartl, Nadine Lehnen, Stefan Kohlbecher, and Erich Schneider	331
Why Do Subjective Vertigo and Dizziness Persist over One Year after a Vestibular Vertigo Syndrome? <i>By</i> Christoph Best, Annegret Eckhardt-Henn, Regine Tschan, and Marianne Dieterich	334
Head-Shaking Nystagmus in Central Vestibulopathies. <i>By</i> Kwang-Dong Choi and Ji Soo Kim	338
Testing Human Otolith Function Using Bone-Conducted Vibration. <i>By</i> I.S. Curthoys, A.M. Burgess, H.G. MacDougall, L.A. McGarvie, G.M. Halmagyi, Y.E. Smulders, and S. Iwasaki	344
Displacement of Listing’s Plane by Galvanic Vestibular Stimulation Measured by 3-Dimensional Video-oculography. <i>By</i> Thomas Dera	347
Vestibular Cortex Activation during Locomotor Imagery in the Blind. <i>By</i> Angela Deutschländer, Thomas Stephan, Katharina Hüfner, Judith Wagner, Martin Wiesmann, Michael Strupp, Thomas Brandt, and Klaus Jahn	350
Eye–Head Coordination during Free Exploration in Human and Cat. <i>By</i> Wolfgang Einhäuser, Gudrun U. Moeller, Frank Schumann, Jörg Conradt, Johannes Vockeroth, Klaus Bartl, Erich Schneider, and Peter König	353
Adaptation of Orientation of Central Otolith-only Neurons. <i>By</i> Julia N. Eron, Bernard Cohen, Theodore Raphan, and Sergei B. Yakushin	367
Driving Dreams: Cortical Activations during Imagined Passive and Active Whole Body Movement. <i>By</i> Virginia L. Flanagan, Magdalena Wutte, Stefan Glasauer, and Klaus Jahn	372
Modality-dependent Indication of the Subjective Vertical during Combined Linear and Rotational Movements. <i>By</i> Anna L. Guenther, Klaus Bartl, Josef Nauderer, Erich Schneider, Alexander Huesmann, Thomas Brandt, and Stefan Glasauer	376

Handing Over a Cube: Spatial Features of Physical Joint-Action. <i>By</i> Markus Huber, Alois Knoll, Thomas Brandt, and Stefan Glasauer	380
Gray-Matter Atrophy after Chronic Complete Unilateral Vestibular Deafferentation. <i>By</i> Katharina Hüfner, Thomas Stephan, Derek A. Hamilton, Roger Kalla, Stefan Glasauer, Michael Strupp, and Thomas Brandt	383
Vertigo and Cerebral Hemoglobin Changes during Unilateral Caloric Stimulation: A Near-Infrared Spectroscopy Study. <i>By</i> Masahiro Iida, Munetaka Haida, and Makoto Igarashi	386
Bilateral Vestibular Failure as an Early Sign in Creutzfeldt-Jakob Disease. <i>By</i> Klaus Jahn, Viktor Arbusow, Vera C. Zingler, Michael Strupp, Hans A. Kretschmar, and Thomas Brandt	390
Vestibular–Neck Interaction in Cerebellar Patients. <i>By</i> Stefan Kammermeier, Justus Kleine, and Ulrich Büttner	394
On-Line Classification and Prediction of Eye Movements by Multiple-Model Kalman Filtering. <i>By</i> Stefan Kohlbecher and Erich Schneider	400
Influence of Uninformative Visual Cues on Gravity Perception. <i>By</i> Aleksandra Kupferberg, Stefan Glasauer, Alexandra Stein, and Thomas Brandt	403
Reversal of Initial Positioning Nystagmus in Benign Paroxysmal Positional Vertigo Involving the Horizontal Canal. <i>By</i> Seung-Han Lee, Myeong-Kyu Kim, Ki-Hyun Cho, and Ji Soo Kim	406
Head-Free Gaze Control in Humans with Chronic Loss of Vestibular Function. <i>By</i> Nadine Lehnen, Ulrich Büttner, and Stefan Glasauer	409
On-Road Assessment of Driving Performance in Bilateral Vestibular-Deficient Patients. <i>By</i> Hamish G. MacDougall, Steven T. Moore, Ross A. Black, Neryla Jolly, and Ian S. Curthoys	413
Visual Search Disorders in Acute and Chronic Homonymous Hemianopia: Lesion Effects and Adaptive Strategies. <i>By</i> Björn Machner, Andreas Sprenger, Thurid Sander, Wolfgang Heide, Hubert Kimmig, Christoph Helmchen, and Detlef Kömpf	419
Long-Term Follow-up of Vestibular Neuritis. <i>By</i> Marco Mandalà and Daniele Nuti	427
Comparative Neurobiology of the Optokinetic Reflex. <i>By</i> Olivia Andrea Masseck and Klaus-Peter Hoffmann	430
Why Do Patients with Impaired Vergence Not Show “Saccadic” Vergence? <i>By</i> Holger Rambold, Thurid Sander, Andreas Sprenger, and Christoph Helmchen	440
Saccadometry of Conditional Rules in Presymptomatic Huntington’s Disease. <i>By</i> Matthieu P.A. Robert, Parashkev C. Nachev, Stephen L. Hicks, Charlotte V.P. Golding, Sarah J. Tabrizi, and Christopher Kennard	444
Modeling of Intrinsic and Synaptic Properties to Reveal the Cellular and Network Contribution for Vestibular Signal Processing. <i>By</i> Christian Rössert, Sandra Pfanzelt, Hans Straka, and Stefan Glasauer	451
Abnormal Connection between Lateral and Posterior Semicircular Canal Revealed by a New Modeling Process: Origin and Physiological Consequences. <i>By</i> Dominique Louise Rousie, Jean Paul Deroubaix, Olivier Joly, Jean Claude Baudrillard, and Alain Berthoz	455
Visual-Motion Suppression in Congenital Pendular Nystagmus. <i>By</i> P. Schindwein, M. Schreckenberger, and M. Dieterich	458

EyeSeeCam: An Eye Movement–Driven Head Camera for the Examination of Natural Visual Exploration. <i>By</i> Erich Schneider, Thomas Villgratner, Johannes Vockeroth, Klaus Bartl, Stefan Kohlbecher, Stanislavs Bardins, Heinz Ulbrich, and Thomas Brandt	461
Changes in Dynamic and Kinematic Properties of Saccades in Ocular Myasthenia following Intravenous Immunoglobulin Treatment. <i>By</i> Alessandro Serra, Matthew J. Thurtell, and R. John Leigh	468
Stimulus Profile and Modeling of Continuous Galvanic Vestibular Stimulation in Functional Magnetic Resonance Imaging. <i>By</i> Thomas Stephan, Katharina Hüfner, and Thomas Brandt	472
Upbeat-Torsional Nystagmus and Contralateral Fourth-Nerve Palsy due to Unilateral Dorsal Ponto Mesencephalic Lesion. <i>By</i> Matthew J. Thurtell, Robert L. Tomsak, and R. John Leigh	476
Prognosis of Idiopathic Downbeat Nystagmus. <i>By</i> Judith Wagner, Nadine Lehnen, Stefan Glasauer, Michael Strupp, and Thomas Brandt	479
Enhancement of the Bias Component of Downbeat Nystagmus after Lesions of the Nodulus and Uvula. <i>By</i> Mark F. Walker, Jing Tian, Xiaoyan Shan, Howard Ying, Rafael J. Tamargo, and David S. Zee	482
Impulsive Testing of Semicircular-Canal Function Using Video-oculography. <i>By</i> Konrad P. Weber, Hamish G. MacDougall, G. Michael Halmagyi, and Ian S. Curthoys	486
Electrotactile Feedback of Sway Position Improves Postural Performance during Galvanic Vestibular Stimulation. <i>By</i> Scott J. Wood, F. Owen Black, Hamish G. MacDougall, and Steven T. Moore	492
Effects of the Linear Vestibulo-ocular Reflex on Accommodative Vergence Eye Movements. <i>By</i> Sergei B. Yakushin, Mikhail Kunin, Dmitri Ogorodnikov, Bernard Cohen, and Theodore Raphan	499
Causative Factors, Epidemiology, and Follow-up of Bilateral Vestibulopathy. <i>By</i> Vera Carina Zingler, Eva Weintz, Klaus Jahn, Doreen Huppert, Christian Cnyrim, Thomas Brandt, and Michael Strupp	505

The New York Academy of Sciences believes it has a responsibility to provide an open forum for discussion of scientific questions. The positions taken by the participants in the reported conferences are their own and not necessarily those of the Academy. The Academy has no intent to influence legislation by providing such forums.
