

CONTENTS

Preface	V
1. Industrial production of dextrans by R.M. Alsop (Holmes Chapel)	1
2. Synthesis, regulation and biological function of bacterial alginate by J.A.M. Fyfe and J.R.W. Govan (Edinburgh)	45
3. The microbial synthesis of cellulose, chitin and chitosan by G.W. Gooday (Aberdeen)	85
4. Regulation of yeast and fungal polysaccharides excluding chitin and cellulose by B.J. Catley (Edinburgh)	129
5. Curdlan: its properties and production in batch and continuous fermentation by K.R. Phillips and H.G. Lawford (Toronto)	201
6. Some novel bacterial polysaccharides of recent development by K.S. Kang, G.T. Veeder and I.W. Cottrell (San Diego)	231
Subject index	255

INDUSTRIAL PRODUCTION OF DEXTRANS

CONTENTS

1	Introduction	1
2	Uses	2
3	Production of Native Dextran	5
	3.1 Conventional Fermentation Process	6
	3.2 Enzyme Producing Fermentation	12
4	Dextranucrase	21
	4.1 Mode of Action (Mechanisms)	22
	4.2 Action Under Practical Conditions	28
	4.3 Enzyme Purification and Immobilisation	36
5	Manufacture of Commercial Dextran Products from Native Dextran	39
	5.1 Hydrolysis	39
	5.2 Fractionation	41
6	Conclusions	41
	References	42
