

Contents

Part I	Crystal Growth	
---------------	-----------------------	--

Czochralski Growth of Silicon By W. Zulehner (With 19 Figures)	2
Chemical and Physical Considerations in the Chemical Vapor Deposition Process By B.S. Meyerson (With 7 Figures)	24
Silicon Molecular Beam Epitaxy (Si-MBE) By E. Kasper (With 21 Figures)	36

Part II	Processing	
----------------	-------------------	--

Simulation of Silicon Processing By M.E. Law, C.S. Rafferty, and R.W. Dutton (With 15 Figures) . . .	62
Simulation of Laser-Assisted Doping of Silicon – The Temperature Distribution By W. Zittel (With 2 Figures)	80
Ion Implantation By J.M. Poate (With 14 Figures)	84
Low Temperature Epitaxial Crystallization of Amorphous Si by Ion- Beam Irradiation By F. Priolo, A. La Ferla, and E. Rimini (With 4 Figures)	100
On the Generation of Ripples on Silicon By D. Jost and G. Benedek (With 1 Figure)	104

Part III	Defects	
-----------------	----------------	--

Theory of Defects in Crystalline Silicon By M.A. Schlüter (With 9 Figures)	112
Defects in CZ Silicon By W. Zulehner (With 21 Figures)	127

Tellurium Related Deep Traps in Silicon By I.D. Desnica and U.V. Desnica (With 1 Figure)	153
---	-----

Part IV Characterization Methods

High Resolution Electron Microscopy of Defects in Silicon By J. Thibault-Desseaux (With 8 Figures)	160
Tunneling Microscopy and Surface Analysis By H.W.M. Salemink (With 10 Figures)	174
Scanning Minority Carrier Transient Spectroscopy: A Method to Investigate the Lateral Distribution of Defects in Semiconductors By A. Mesli and T. Heiser (With 5 Figures)	184
Optical Characterization of Silicon Materials and Structures By G. Harbeke (With 12 Figures)	189
Oxygen-Free Silicon; How Does IR See It? By B. Pivac (With 3 Figures)	207

Part V Insulating Films

Characterization of the SiO ₂ -Si Interface By M. Schulz (With 12 Figures)	212
Advanced Silicon on Insulator Materials: Processing, Characterization and Devices By S. Cristoloveanu (With 20 Figures)	223

Part VI Silicide Films

Properties of Transition Metal Silicides By C. Calandra (With 12 Figures)	252
State Density Gap in Ti-Silicide/p-Si/p ⁺ Si Schottky Barriers By W. Cabanski and M. Schulz (With 4 Figures)	271
Morphology and Structure of Thin TiSi ₂ Films on Silicon By A. Catana, M. Heintze, F. Lévy, P.É. Schmid, and P. Stadelmann (With 6 Figures)	276
Modelling Diffusion in Silicides By A.A. Brown, P.B. Moynagh, and P.J. Rosser (With 4 Figures)	280

4 Mbit Technology By S. Röhl (With 12 Figures)	288
Technology and Reliability Problems of Trench Cell Capacitors By S. Röhl (With 12 Figures)	298
Heavy Doping Effects and Their Influence on Silicon Bipolar Transistors By R. Mertens (With 8 Figures)	309
Ionizing Radiation Effects in MOS Devices By J.M. McGarrity, F.B. McLean, T.R. Oldham, and H.E. Boesch, jr. (With 13 Figures)	317
Crystalline Silicon Solar Cells By R. Mertens (With 5 Figures)	339
Index of Contributors	345
