

# INTEGRATED OPTICAL CIRCUIT ENGINEERING II

Volume 578

## Contents

Conference Committee .....	v
Introduction .....	vi
<b>SESSION 1. LiNbO<sub>3</sub> SUBSTRATE AND WAVEGUIDE CHARACTERIZATION .....</b>	<b>1</b>
578-01 <b>Proton-exchange optical waveguides on lithium niobate: devices, characterisation and future prospects,</b> S. M. Al-Shukri, J. Duffy, R. M. De La Rue, Univ. of Glasgow (UK); M. N. Armenise, Univ. of Bari (Italy); C. Canali, A. Carnera, Univ. of Padova (Italy) (Invited Paper) .....	2
578-02 <b>Analysis of proton exchanged channel waveguides in LiNbO<sub>3</sub>,</b> N. A. Sanford, Polaroid Corp.; W. E. Lee, Case Western Reserve Univ. ....	7
578-03 <b>Methods of characterizing photorefractive susceptibility of LiNbO<sub>3</sub> waveguides,</b> R. A. Becker, MIT/Lincoln Lab. ....	12
578-04 <b>Compositional effects on lithium niobate substrates,</b> W. J. Silva, Crystal Technology, Inc.; C. H. Bulmer, U.S. Naval Research Lab. ....	19
578-05 <b>Maker fringe analysis of lithium niobate integrated optical substrates,</b> S. R. Lunt, G. E. Peterson, R. J. Holmes, Y. S. Kim, AT&T Bell Labs. ....	22
578-06 <b>Refractive index measurements of lithium niobate integrated optical substrates by total internal reflection,</b> G. E. Peterson, S. R. Lunt, R. J. Holmes, Y. S. Kim, AT&T Bell Labs. ....	31
<b>SESSION 2. MONOLITHIC OPTOELECTRONICS .....</b>	<b>39</b>
578-12 <b>Optical control of microwave devices,</b> R. G. Hunsperger, Univ. of Delaware (Invited Paper) .....	40
578-14 <b>An experiment for studying monolithic integrated optics performance in the space environment,</b> E. W. Taylor, U.S. Air Force Weapons Lab. ....	46
578-15 <b>Thin-film photodetectors for integrated optics,</b> M. L. McWright, T. E. Batchman, R. F. Carson, Univ. of Virginia .....	52
578-16 <b>Doubly cleaved coupled cavity monolithic laser amplifier,</b> T. E. Suppan, E. W. Taylor, U.S. Air Force Weapons Lab. ....	58
578-17 <b>Design and fabrication of integrated coupled-cavity lasers for stability, tunability and single-frequency,</b> L. A. Coldren, Univ. of California/Santa Barbara .....	63
<b>SESSION 3. LiNbO<sub>3</sub> WAVEGUIDE DEVICES .....</b>	<b>69</b>
578-08 <b>Proton exchanged ring resonators in lithium niobate: operation at .79<math>\mu</math>m and 1.3<math>\mu</math>m,</b> A. Mahapatra, W. C. Robinson, Polaroid Corp. ....	70
578-11 <b>Design considerations for mode extinction modulators in LiNbO<sub>3</sub> waveguides,</b> P. R. Ashley, U.S. Army Missile Command; W. S. C. Chang, Univ. of California/San Diego .....	75
<b>SESSION 4. PROCESSING TECHNOLOGY .....</b>	<b>81</b>
578-18 <b>Dry etching of indium phosphide at room temperature,</b> G. F. Doughty, C. L. Dargan, C. D. W. Wilkinson, Univ. of Glasgow (UK) (Invited Paper) .....	82
578-19 <b>Novel V-groove structures on silicon,</b> S. Sriram, Allied Amphenol Products .....	88
578-20 <b>Plasma deposition of integrated optical waveguides,</b> N. Nourshargh, E. M. Starr, J. S. McCormack, GEC Research Ltd. (UK) .....	95
578-21 <b>Use of thermal nitridation to fabricate low loss planar optical waveguides in SiO<sub>2</sub>,</b> D. E. Zelmon, H. E. Jackson, J. T. Boyd, Univ. of Cincinnati .....	100
578-22 <b>Effects of annealing on the optical properties of proton irradiated n-type gallium arsenide,</b> L. L. Liou, W. G. Spitzer, Univ. of Southern California; J. M. Zavada, U.S. Army Research Office; H. A. Jenkinson, U.S. Army ARDC .....	103
<b>SESSION 5. INVITED PAPERS ON NONLINEAR GUIDED WAVE OPTICS .....</b>	<b>109</b>
578-23 <b>Nonlinear propagation in GaAs/GaAlAs multiple quantum well waveguides,</b> P. Li Kam Wa, J. H. Marsh, P. N. Robson, J. S. Roberts, N. J. Mason, Univ. of Sheffield (UK) .....	110
578-24 <b>Physics and applications of quantum wells in waveguides,</b> J. S. Weiner, AT&T Bell Labs. ....	116

578-25	<b>All-optical logic devices using group III-V semiconductor waveguides</b> , H. A. Haus, N. A. Whitaker, Jr., M. C. Gabriel, MIT	122
578-26	<b>Organic nonlinear optical materials</b> , K. D. Singer, S. J. Lalama, J. E. Sohn, AT&T Engineering Research Ctr.	130
578-27	<b>Polydiacetylenes as nonlinear waveguide materials</b> , R. J. Seymour, G. M. Carter, Y. J. Chen, B. S. Elman, C. J. Jagannath, M. F. Rubner, D. J. Sandman, M. K. Thakur, S. K. Tripathy, GTE Labs.	137
578-28	<b>Intensity-dependent guided wave phenomena</b> , C. T. Seaton, G. I. Stegeman, Optical Sciences Ctr./Univ. of Arizona; H. G. Winful, GTE Labs.	143
578-29	<b>Nonlinear effects in LiNbO<sub>3</sub> waveguides</b> , M. De Micheli, Univ. of Nice (France); M. Papuchon, Thomson CSF/LCR (France)	150
578-30	<b>Parametric fluorescence, amplification and oscillation in Ti:LiNbO<sub>3</sub> optical waveguides</b> , H. Suche, B. Hampel, H. Seibert, W. Sohler, Univ.-GH-Paderborn (West Germany)	156
578-31	<b>Fabrication of integrated nonlinear optical devices</b> , C. N. Ironside, T. J. Cullen, R. H. Hutchins, Univ. of Glasgow (UK)	162
<b>SESSION 6. WAVEGUIDE PHENOMENA</b>		167
578-32	<b>Organic materials for integrated optics</b> , S. J. Lalama, J. E. Sohn, K. D. Singer, AT&T Engineering Research Ctr.	168
578-33	<b>Waveguide diffraction gratings in integrated optics</b> , L. A. Weller-Brophy, D. G. Hall, Univ. of Rochester	173
578-34	<b>Simulation of waveguide grating lenses in GaAs</b> , H. Turk, F. G. Christie, G. E. Kandel, Gould, Inc.; M. Halioua, New York Institute of Technology	178
578-35	<b>Semiconductor waveguides: analysis of coupling between rib waveguides and optical fibres</b> , M. J. Robertson, S. Ritchie, P. Dayan, British Telecom Research Labs. (UK)	184
578-36	<b>Cross-talk characteristics of <math>\Delta\beta</math> phase reversal directional coupler switches</b> , S. Thaniyavarn, TRW Electro-Optics Research Ctr.	192
<b>SESSION 7A. SYSTEMS CONSIDERATIONS AND APPLICATIONS</b>		199
578-37	<b>Integrated optical circuits in ultra-high speed fiber optics LANs</b> , C. Yen, M. Gerla, Univ. of California/ Los Angeles (Abstract only)	200
578-38	<b>Implementing a Ti:LiNbO<sub>3</sub> 4 × 4 nonblocking interconnection network</b> , J. R. Erickson, H. S. Hinton, AT&T Bell Labs.	201
578-39	<b>Integrated optical combinatorial logic using electro-optic Bragg gratings</b> , R. Arrathoon, E. R. Schroeder, F. Westervelt, Wayne State Univ.	207
578-40	<b>Lithium niobate electro-optic frequency translators for coherent optical fibre systems</b> , B. E. Daymond-John, A. R. Beaumont, W. A. Stallard, R. C. Booth, British Telecom Research Labs. (UK)	214
<b>SESSION 7B. SYSTEMS CONSIDERATIONS AND APPLICATIONS</b>		221
578-41	<b>Polarization effects in acousto-optic signal processors: theory and experiment</b> , S. W. Li, E. Bourkoff, Johns Hopkins Univ.; C. Garvin, N. J. Berg, Harry Diamond Labs.	222
578-42	<b>Integrated optical wavefront sensor</b> , H. E. Tomaschke, Greenville College; R. R. Rice, McDonnell Douglas Astronautics Co.	228
578-43	<b>Integrated-optical components for fiber sensors</b> , L. M. Johnson, MIT/Lincoln Lab.	233
