<b>Introduction</b>	<b>7</b>
<b>1 Additive functions</b>	<b>13</b>
1.1 Definition and introduction . . . . .	13
1.2 The Turán-Kubilius inequality . . . . .	18
1.3 Finitely distributed functions . . . . .	19
<b>2 Multiplicative functions of modulus <math>\leq 1</math></b>	<b>21</b>
2.1 Definition . . . . .	21
2.2 Mean-value theorem for multiplicative functions of modulus $\leq 1$ . . . . .	22
<b>3 Uniformly summable functions</b>	<b>27</b>
3.1 Definition . . . . .	27
3.2 Mean behaviour of uniformly summable multiplicative functions . . . . .	28
3.3 Mean behaviour of $\alpha$ -almost-periodic multiplicative functions . . . . .	31
<b>4 <math>\mathcal{Q}</math>-additive and <math>\mathcal{Q}</math>-multiplicative functions</b>	<b>35</b>
4.1 Definition . . . . .	35
4.2 Generalized Turán-Kubilius inequalities for $\mathcal{Q}$ -additive functions . . . . .	37
4.3 Limit distributions of $\mathcal{Q}$ -additive functions . . . . .	45
4.4 Mean-value theorem for $\mathcal{Q}$ -multiplicative functions . . . . .	47

<b>5</b>	<b>Mean behaviour of uniformly summable <math>q</math>-multiplicative functions and its applications</b>	<b>51</b>
5.1	Main results . . . . .	51
5.2	Preliminary results . . . . .	54
5.3	Proof of main results . . . . .	66
5.4	Application to $q$ -additive functions . . . . .	69
5.5	Characterization of almost-periodic $q$ -multiplicative functions . . . . .	71
<b>6</b>	<b>Mean behaviour of uniformly summable <math>\mathcal{Q}</math>-multiplicative functions</b>	<b>77</b>
6.1	Main results . . . . .	77
6.2	Preliminary results . . . . .	79
6.3	Proof of main results . . . . .	85
	<b>Bibliography</b>	<b>91</b>
