List of Tables

2.1	Comparison of GDR -Mark and D-Mark	14
3.1	Main economic indicators of Germany	38
3.2	Interest rates and exchange rates in Germany, Japan and the USA	39
3.3	European comparisons	41
4.1	Effects on GDP of a large German fiscal shock: percentage difference from base	73
4.2	Effects on West Germany of removing the collapse in Soviet trade (imports in the CPEs higher)	75
4.3	Effects on GDP in Europe of a removal of the German fiscal shock of late 1990 (percentage difference from base without the Soviet Collapse)	78
4.4	Effects on output in Europe of not GEMU (GDP percentage from actual)	82
5.1	Partial adjustment model (dependent variable D_{LGI})	90
5.2	Partial adjustment model (semi-elasticity) (dependent variable D_{LGI})	91
5.3	Effects of investment diversion on the EU (and, in particular, the UK)	95
6.1	Policy strategies to resolve the bad-asset problem and their economic, fiscal and social impact	111
7.C1	Real GDP growth rates	137
8.1	Estimates of differences in credit-taking after GEMSU and in the GDR	144
8.2	Estimates of the significance of credit-taking after GEMSU	145
8.3	Expected consequences of not being able to repay a bank loan	145
8.4	Attitudes towards loan-taking, banks and the bill of exchange	147
8.5	Estimation of respondents' own knowledge about the bill of exchange	148
8.6	Information policy of the banks	148
8.7	Correlation between perceived knowledge and attitude	149
9.1	Privatisation results	160
9.2	Treuhandanstalt financial flows, July 1990 to December 1994 (DM billion)	164

11.1	Consolidated balance sheet of the banking system of the GDR at 31 May 1990	208
11.2	Conversion rates on the basis of a non-inflationary money stock for the GDR (1989)	210
11.3	Derivation of the monetary targets of the Bundesbank	213
11.4(a)	Real total domestic demand (DM billion, 1991 prices)	215
11.4(b)	Real GDP (DM billion, 1991 prices)	215
11.C1	Structural equations for entire sample (1988Q2 to 1994Q3)	225
11.C2	Chi-squared parameter stability tests (break 1990Q3)	226
12.1	Economic indicators for West Germany (1948–52) and East Germany (1989–94)	228
12.2	Central bank money, deposits and government debt (RM million)	230
12.3	Legal and black-market prices	230
12.4	Consolidated balance sheet of the banking sector in East Germany at 31 May 1990 (GDR-Mark billion)	232
12.5	Net migration from East Germany to West Germany	238
12.6	Foreign exchange revenue ratio	243
12.C1	Real and monetary features of monetary reforms in 1948 and 1990	252

List of Figures

2.1	Key economic indicators for Germany	20
2.2	External value of the D-Mark	23
2.3	Effects of German unification on the external value of the D-Mark	27
3.1	Short-term interest rates	40
3.2	Long-term interest rates	40
3.3	Short-term interest rate differentials	42
3.4	Long-term interest rate differentials	42
4.1	German GDP, % difference from base	71
4.2	D-Mark – US Dollar exchange rate: % difference from base	71
4.3	German three-month interest rate: points different from base	72
4.4	Collapse of Soviet imports (index 1987 = 100)	74
4.5	Effects of the removal of the fiscal shock of late 1990 on the level of West German GDP	76
4.6	Effect on short-term interest rates of the removal of the fiscal shock of late 1990	77
4.7	Effect on the D-Mark–US dollar rate of the removal of the fiscal shock of late 1990: percentage difference from base	77
4.8	Output in West Germany with and without GEMU (GDP in DM billion)	79
4.9	Government deficit as a percentage of GDP with and without GEMU	80
4.10	Government debt stock as a percentage of GDP with and without GEMU	80
4.11	Short-term interest rates with and without GEMU	81
4.12	D-Mark–US dollar exchange rate with and without GEMU	81
8.1	Discount credits share of short-term credits to domestic non-banks	143
11.1	Velocity of <i>M3</i> and nominal GNP per capita in OECD countries	206
11.C1	Interest rates and assets	223
