<i>Preface</i>	xi
<i>Contributor contact details</i>	xiii
Introduction: talking the talk but not walking the walk	xv
<i>Rodney Tolley, CAST (The Centre for Alternative and Sustainable Transport), UK</i>	
Part I Principles	1
1 Ecological footprints and urban transportation	3
<i>William Rees, University of British Columbia, Canada</i>	
2 The relevance of climate change to future policy on walking and cycling	20
<i>Mayer Hillman, Policy Studies Institute, UK</i>	
3 The role of non-motorised modes in an environmentally sustainable transport system	32
<i>Karst Geurs and Bert van Wee, National Institute for Public Health and the Environment, The Netherlands</i>	
4 Walking in a historical, international and contemporary context	48
<i>Peter Newman, Murdoch University, Australia</i>	
5 Does anyone walk anymore?	59
<i>Werner Brög and Erhard Erl, Socialdata, Germany, and Bruce James, Government of Western Australia, Australia</i>	
6 The decline of everyday walking in the UK: explanations and policy implications	70
<i>Rachel Goodman, Stoke-on-Trent City Council, UK, and Rodney Tolley, CAST (The Centre for Alternative and Sustainable Transport), UK</i>	

7	Visions for city traffic and mobility	84
	<i>Rolf Monheim, University of Bayreuth, Germany</i>	
8	Winning back public space	97
	<i>Jan Gehl and Lars Gemzøe, Royal Danish Academy of Fine Arts, Denmark</i>	
9	Formal indicators of social urban sustainability	107
	<i>Sergio Porta, Polytechnic of Milan, Italy</i>	
10	The role of cycling for women	123
	<i>Ursula Lehner-Lierz, velo:consult, Switzerland</i>	
11	The potential of non-motorised transport for promoting health	144
	<i>Nick Cavill, Cavill Associates, UK</i>	
12	The walking economy	159
	<i>Ian Napier, IN Partnership Consulting Pty Ltd, Australia</i>	
13	Planning for cycling supports road safety	172
	<i>Roelof Wittink, I-ce Interface for Cycling Expertise, The Netherlands</i>	
14	Walking and its relationship to public transport	189
	<i>Carmen Hass-Klau, Environmental and Transport Planning, UK</i>	
15	Perceptions of walking – ideologies of perception	200
	<i>Daniel Sauter, Urban Mobility Research, Switzerland</i>	
16	Attitudes to walking and cycling	210
	<i>Sonja Forward, Swedish Road and Transport Research Institute, Sweden</i>	
17	Overcoming the attitude barriers to greater cycle use	224
	<i>Hugh McClintock, University of Nottingham, UK</i>	
18	Social and cultural influences on the future of walking – the experts' opinion	238
	<i>Rodney Tolley, CAST (The Centre for Alternative and Sustainable Transport), UK, Karen Bickerstaff, University of East Anglia, UK, and Les Lumsdon, Manchester Metropolitan University, UK</i>	
19	Cars and behaviour: psychological barriers to car restraint and sustainable urban transport	252
	<i>René Diekstra, Rotterdam City Council, The Netherlands, and Martin Kroon, Ministry of the Environment, The Netherlands</i>	

Part II Strategies	265
20 Infrastructure planning for cycling	267
<i>Jan Ploeger, Interprovincial Co-operative Body (IPO), The Netherlands</i>	
21 Creating a better walking environment	282
<i>Carlton Roberts-James, Institution of Highways & Transportation (IHT), UK</i>	
22 Making pedestrian facilities more usable and safer for all ..	298
<i>Barbara McMillen, Federal Highway Administration, USA</i>	
23 Walkable towns: the Liveable Neighbourhoods strategy	314
<i>Evan Jones, Government of Western Australia, Australia</i>	
24 The role of pedestrian precincts in adapting city centres to new lifestyles	326
<i>Rolf Monheim, University of Bayreuth, Germany</i>	
25 Safety of pedestrians and cyclists in Europe: the DUMAS approach	339
<i>Maurizio Tira, University of Brescia, Italy</i>	
26 Traffic safety for walkers and cyclists: the danger reduction approach	351
<i>Ken Spence, Road Danger Reduction Forum, UK</i>	
27 Walking and cycling: what to promote where	358
<i>Tim Pharoah, Independent Consultant, UK</i>	
28 Fundamentals of pedestrian advocacy	375
<i>Ellen Vanderslice, America Walks, USA</i>	
29 TravelSmart/Individualised Marketing in Perth, Western Australia	384
<i>Bruce James, Government of Western Australia, Australia, and Werner Brög, Socialdata, Germany</i>	
30 Creating supportive environments for physical activity: encouraging walking	402
<i>Cheryl Wright, National Heart Foundation of Australia, Australia</i>	
31 Health conscious transport planning: barriers and opportunities to inter-sector collaboration	421
<i>Adrian Davis, Adrian Davis Associates, UK</i>	
32 Green modes and US transport policy: TEA-21	433
<i>Andy Clarke, Association of Pedestrian and Bicycle Professionals, USA</i>	

33	Bicycle transport in the US: recent trends and policies	450
	<i>Charles Komanoff, Komanoff Energy Associates, USA, and John Pucher, Rutgers University, USA</i>	
34	Planning for recreational cycling in the UK	465
	<i>Les Lumsdon, Manchester Metropolitan University, UK</i>	
35	The politics of changing to green modes	474
	<i>Lynn Sloman, University of Westminster Transport Studies Group (formerly Transport 2000), UK</i>	
Part III	Practice	489
36	Segregation or integration of cycling in the road system: the Dutch approach	491
	<i>Tom Godefrooij, Province of Noord-Brabant, The Netherlands</i>	
37	Conserving walkable environments in Japan	501
	<i>Toshio Kitahara, Chiba University, Japan</i>	
38	The Cycle Balance: benchmarking local cycling conditions	511
	<i>Frank Borgman, The Dutch Cyclists' Union, The Netherlands</i>	
39	Implementing local cycling policies in Great Britain	525
	<i>Philine Gaffron, Technical University of Hamburg-Harburg, Germany</i>	
40	Barring the way: gated communities and walking	539
	<i>Matthew Burke, University of Queensland, Australia</i>	
41	Promoting walking in the US: overcoming the 'stickiness' problem	550
	<i>Mark Fenton, University of North Carolina Pedestrian and Bicycle Information Center, USA</i>	
42	Promoting walking in the UK: bottling walking and making it sell	564
	<i>Jim Walker, London Walking Forum, UK</i>	
43	Non-motorised Transportation Demand Management	573
	<i>Todd Litman, Victoria Transport Policy Institute, Canada</i>	
44	Safer routes to Danish schools	588
	<i>Søren Underlien Jensen, Atkins, Denmark, and Camilla Hviid Hummer, Danish Transport Research Institute, Denmark</i>	
45	Cycling and social inclusion	599
	<i>Jake Elster, London School of Economics, UK</i>	

Part IV Case studies	617
46 Best practice in pedestrian facility design: Cambridge, Massachusetts	619
<i>Cara Seiderman and Rosalie Anders, City of Cambridge, MA, USA</i>	
47 Designing streets for people	629
<i>Barry Sellers, Wandsworth Borough Council, UK</i>	
48 Bicycle theft in France	641
<i>Nicolas Mercat, Altermodal Research Consultancy, France, and Frédéric Héran, IFRESI-CNRS, France</i>	
49 Breaking out by bike: cycling courses as a means of integration and emancipation	650
<i>Angela van der Kloof, Centre for Foreign Women, The Netherlands</i>	
50 Network promotion: increasing bicycle use in Perth, Western Australia	659
<i>Colin Ashton-Graham, Government of Western Australia, Australia</i>	
51 Promoting cycling in Italian cities: the case of Padua	670
<i>Marcello Mamoli, University Institute of Architecture of Venice (IUAV), Italy</i>	
52 Promoting walking in British cities: the case of York	679
<i>Daniel Johnson, City of York Council, UK, and Tim Carter, Cambridgeshire County Council, UK</i>	
53 The UK 'Walking the way to Health' Initiative	687
<i>Peter Ashcroft, Countryside Agency, UK</i>	
54 Cycle training and the promotion of cycling	692
<i>Ken Spence, Road Danger Reduction Forum, UK</i>	
Index	699
