

CONTENTS

Foreword	5
<u>Part 1</u> FLUVIAL PROCESSES AND SEDIMENTATION	
1 Mechanisms and hydrodynamic factors of sediment transport in alluvial streams Roscoe G. Jackson 11	9
2 Aspects of flow resistance in steep channels having coarse particulate beds T.J. Day	45
3 Hydraulic factors controlling channel migration Edward J. Hickin	59
4 The interpretation of ancient alluvial successions in the light of modern investigations Brian R. Rust	67
<u>Part 2</u> SEDIMENT YIELD AND WATER QUALITY	
5 Interdisciplinary research on runoff and erosion processes in an arid area, Sde Boker Experimental site, Northern Negev, Israel Aaron Yair	109
6 Temporal and spatial patterns in erosion and fluvial processes W.T. Dickinson & G.J. Wall	133
7 An approach to the prediction of suspended sediment rating curves W.F. Rannie	149
8 Suspended sediment and solute response characteristics of the River Exe, Devon, England D.E. Walling	169
9 Chemical and mineralogical indices of sediment transformation during fluvial transport Terry J. Logan	199
French Summaries	209
