Acknowledgments	xi
<b>1 Questions</b>	<b>1</b>
1.1 Consciousness, the phenomenal self, and the first-person perspective	1
1.2 Questions	6
1.3 Overview: The architecture of the book	9
<b>2 Tools I</b>	<b>13</b>
2.1 Overview: Mental representation and phenomenal states	13
2.2 From mental to phenomenal representation: Information processing, intentional content, and conscious experience	15
2.2.1 Introspectability as attentional availability	32
2.2.2 Availability for cognitive processing	38
2.2.3 Availability for the control of action	39
2.3 From mental to phenomenal simulation: The generation of virtual experiential worlds through dreaming, imagination, and planning	43
2.4 From mental to phenomenal presentation: Qualia	62
2.4.1 What is a quale?	66
2.4.2 Why qualia don't exist	69
2.4.3 An argument for the elimination of the canonical concept of a quale	83
2.4.4 Presentational content	86
2.5 Phenomenal presentation	94
2.5.1 The principle of presentationality	96
2.5.2 The principle of reality generation	98
2.5.3 The principle of nonintrinsicity and context sensitivity	100
2.5.4 The principle of object formation	104
<b>3 The Representational Deep Structure of Phenomenal Experience</b>	<b>107</b>
3.1 What is the conceptual prototype of a phenomenal representatum?	107
3.2 Multilevel constraints: What makes a neural representation a <i>phenomenal</i> representation?	116
3.2.1 Global availability	117
3.2.2 Activation within a window of presence	126
3.2.3 Integration into a coherent global state	131
3.2.4 Convolved holism	143
3.2.5 Dynamicity	151
3.2.6 Perspectivalness	156

3.2.8	Offline activation	179
3.2.9	Representation of intensities	184
3.2.10	“Ultrasmoothness”: The homogeneity of simple content	189
3.2.11	Adaptivity	198
3.3	Phenomenal mental models	208
<b>4</b>	<b>Neurophenomenological Case Studies I</b>	<b>213</b>
4.1	Reality testing: The concept of a phenomenal model of reality	213
4.2	Deviant phenomenal models of reality	215
4.2.1	Agnosia	215
4.2.2	Neglect	222
4.2.3	Blindsight	228
4.2.4	Hallucinations	237
4.2.5	Dreams	251
4.3	The concept of a centered phenomenal model of reality	264
<b>5</b>	<b>Tools II</b>	<b>265</b>
5.1	Overview: Mental self-representation and phenomenal self-consciousness	265
5.2	From mental to phenomenal self-representation: Mereological intentionality	265
5.3	From mental to phenomenal self-simulation: Self-similarity, autobiographical memory, and the design of future selves	279
5.4	From mental to phenomenal self-presentation: Embodiment and immediacy	285
<b>6</b>	<b>The Representational Deep Structure of the Phenomenal First-Person Perspective</b>	<b>299</b>
6.1	What is a phenomenal self-model?	299
6.2	Multilevel constraints for self-consciousness: What turns a neural system-model into a <i>phenomenal self</i> ?	305
6.2.1	Global availability of system-related information	305
6.2.2	Situatedness and virtual self-presence	310
6.2.3	Being-in-a-world: Full immersion	313
6.2.4	Convolved holism of the phenomenal self	320
6.2.5	Dynamics of the phenomenal self	324
6.2.6	Transparency: From system-model to phenomenal self	330
6.2.7	Virtual phenomenal selves	340
6.2.8	Adaptivity: The self-model as a tool and as a weapon	344

6.3	Descriptive levels of the human self-model	353
6.3.1	Neural correlates	353
6.3.2	Cognitive correlates	361
6.3.3	Social correlates	362
6.4	Levels of content within the human self-model	379
6.4.1	Spatial and nonspatial content	380
6.4.2	Transparent and opaque content	386
6.4.3	The attentional subject	390
6.4.4	The cognitive subject	395
6.4.5	Agency	405
6.5	Perspectivalness: The phenomenal model of the intentionality relation	411
6.5.1	Global availability of transient subject-object relations	420
6.5.2	Phenomenal presence of a knowing self	421
6.5.3	Phenomenal presence of an agent	422
6.6	The self-model theory of subjectivity	427
<b>7</b>	<b>Neurophenomenological Case Studies II</b>	429
7.1	Impossible egos	429
7.2	Deviant phenomenal models of the self	429
7.2.1	Anosognosia	429
7.2.2	<i>Ich-Störungen</i> : Identity disorders and disintegrating self-models	437
7.2.3	Hallucinated selves: Phantom limbs, out-of-body-experiences, and hallucinated agency	461
7.2.4	Multiple selves: Dissociative identity disorder	522
7.2.5	Lucid dreams	529
7.3	The concept of a phenomenal first-person perspective	545
<b>8</b>	<b>Preliminary Answers</b>	547
8.1	The neurophenomenological caveman, the little red arrow, and the total flight simulator: From full immersion to emptiness	547
8.2	Preliminary answers	558
8.3	Being no one	625
