

Contents

List of Acronyms	v
List of Symbols	vii
1 Introduction	1
1.1 Multi-objective Optimization	1
1.2 Existing Work	5
1.3 Challenges and Problems	7
1.4 Research Goals and Specific Objectives	9
1.5 Document Organization	11
2 Multi-Objective Evolutionary Algorithm (MOEA)	13
2.1 Evolutionary Algorithms	13
2.2 MOEA Methods	17
2.2.1 Strength Pareto Evolutionary Algorithm 2 (SPEA2)	20
2.2.2 Summary	22
2.3 Convergence	23
2.4 Test Functions	24
2.5 Performance Metrics	25
2.5.1 Cardinality-based Performance Metrics	27
2.5.2 Convergence-based Performance Metrics	27
2.5.3 Diversity-based Performance Metrics	30
2.6 Conclusion	33
3 Data Structures	35
3.1 Linear Lists	35
3.2 Dominated and Non-dominated Trees	36
3.3 Quad-trees	40
3.4 Data Structures in MOEA	50
3.5 Experiments	51

3.5.1	Influence of Population Size	51
3.5.2	Influence of Number of Objectives	54
3.5.3	Influence of Archive Size	55
3.5.4	Comparison	58
3.6	Conclusion	61
4	Hybrid Multi-Objective Evolutionary Algorithm (HMOEA)	63
4.1	Subdivision Technique	64
4.2	HMOEA	66
4.2.1	Static Recovering	68
4.2.2	Dynamic Recovering	69
4.3	Experiments	70
4.3.1	Discussion	72
4.4	Conclusion	74
5	Multi-Objective Particle Swarm Optimization (MOPSO)	75
5.1	Particle Swarm Optimization (PSO)	76
5.2	MOPSO	77
5.3	Finding Best Local Guides	79
5.3.1	Sigma Method	81
5.4	Turbulence Factor	85
5.5	MOPSO vs. MOEA	85
5.5.1	Archiving in MOPSO	87
5.6	Sigma Diversity Metric	88
5.6.1	Median Sigma Value ($\bar{\sigma}$)	93
5.7	Experiments	96
5.7.1	2-objective MOPs	96
5.7.2	3-objective MOPs	100
5.7.3	4-objective MOPs	103
5.7.4	Parameter Setting of a MOPSO	105
5.8	Covering Pareto-fronts by MOPSO	109
5.8.1	Experiments	111
5.9	Conclusion	115
6	ϵ-MOPSO	117
6.1	Definitions	118
6.2	Bounding the Archive Size	119
6.2.1	Clustering	119
6.2.2	Lebesgue Archiving Hill Climber (LAHC)	120

6.2.3	ϵ -dominance	121
6.3	Experiments	123
6.3.1	Results	123
6.3.2	Influence on Computational Time	124
6.3.3	Influence on Convergence	124
6.3.4	Influence on Diversity	126
6.4	Conclusion	128
7	Applications	133
7.1	Application in Antenna Design	133
7.1.1	Experiments	134
7.2	Application in Computational Chemistry	137
7.2.1	Parameterization of Molecular Force Fields	137
7.2.2	Molecular Force Fields	138
7.2.3	Description of Objective Functions	140
7.2.4	Experiments	142
7.2.5	Case Study: Set of Two Alcohols	143
7.2.6	Comparison of Different Algorithms	143
7.2.7	Analysis of Physical Properties	146
7.3	Conclusion	151
8	Conclusion and Outlook	153
8.1	Fundamental Results	153
8.2	Future Directions in MOEA	154
A	Convergence of MOEA	157
A.1	Background	157
A.1.1	Markov Chains	158
A.2	Convergence	159
A.2.1	Proof	160
