

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>Physical Propagation Model of Indoor Radio Channels</b>	<b>5</b>
2.1	Introduction . . . . .	5
2.2	Reflection and Transmission Mechanism . . . . .	6
2.2.1	Reflection and Transmission on the Boundary Surface of Dielectric Media with Loss . . . . .	6
2.2.2	Reflection and Transmission Mechanism of a Material Slab . . . . .	9
2.2.3	Reflection and Transmission through Multi-layered Ma- terials . . . . .	12
2.3	Investigation on the Electrical Parameters of Building Materials	13
2.3.1	Experimental Setup . . . . .	14
2.3.2	Reflection Coefficients of Various Materials . . . . .	16
2.3.3	Transmission Coefficients and Penetration Loss . . . .	21
2.3.4	Estimation of Dielectric Constants of Materials . . . .	23
<b>3</b>	<b>Simulation of the Indoor Radio Channels</b>	<b>27</b>
3.1	Introduction . . . . .	27
3.2	Ray Tracing Algorithm – 3D Model . . . . .	27
3.2.1	Initiation of the Rays . . . . .	28
3.2.2	Ray Tracing . . . . .	29
3.2.3	Reception of the rays . . . . .	32
3.3	2D Channel Model . . . . .	35
3.4	Comparison of the 2D to the 3D Model . . . . .	38
3.4.1	Narrowband Characteristics . . . . .	38
3.4.2	Wideband Characteristics . . . . .	42
3.4.3	Influence of the Characteristics of Antenna . . . . .	44

<b>4 Measurement of Indoor Radio Channels</b>	<b>49</b>
4.1 Measurement Setup . . . . .	49
4.2 Principle of Measurement . . . . .	51
4.3 Experimental Procedures . . . . .	52
<b>5 Predictions of the Narrowband Characteristics</b>	<b>55</b>
5.1 Introduction . . . . .	55
5.2 Spatial Distributions of the Received Power . . . . .	55
5.2.1 Physical Mechanism . . . . .	56
5.2.2 Cumulative Distribution Function of the Received Power	60
5.3 Path Loss Prediction . . . . .	65
5.3.1 Influence of the building layout and materials . . . . .	66
5.3.2 Influence of the furniture . . . . .	73
5.3.3 Distance-Dependent Rate of Decay . . . . .	75
5.3.4 Conclusion . . . . .	77
5.4 Coverage Area . . . . .	77
<b>6 Predictions of Wideband Characteristics</b>	<b>83</b>
6.1 General Description . . . . .	83
6.2 Statistical Distributions of the Path Arrival Time . . . . .	85
6.2.1 Theoretical Analysis . . . . .	86
6.2.2 Simulation Results . . . . .	90
6.2.3 Conclusion . . . . .	93
6.3 RMS Time Delay Spread Predictions . . . . .	94
6.3.1 Influence of the Building Layout and Materials . . . . .	95
6.3.2 Dependence upon Transmit or Receive Range . . . . .	97
6.3.3 Conclusion . . . . .	103
<b>7 Conclusion</b>	<b>105</b>
<b>Bibliography</b>	<b>109</b>
