

CONTENTS

PREFACE

v

PART 1 PHYSIOLOGICAL FOUNDATIONS

- 1 Organization of Psychoendocrine Mechanisms; A Review and Reconsideration of Research *John W. Mason* 3
 - The Scope of Psychoendocrine Research 3
 - The Pituitary-Adrenal Cortical System 9
 - The Sympathetic-Adrenal Medullary System 28
 - The Pituitary-Thyroid System 42
 - Organization of the Multiple Endocrine Responses in the Monkey 52
 - Endocrine Organization Through Overall Hormonal Balance 64
 - References 76
- 2 Central Nervous System Substrates of Some Psychophysiological Variables *William H. Rickles, Jr.* 93
 - Neuroanatomy 94
 - Neurophysiology of the Central Autonomic Nervous System 99
 - Some Speculations 115
 - References 117

PART 2 EXPERIMENTAL DESIGN AND METHODS

- 3 On Planning Psychophysiological Experiments: Design, Measurement, and Analysis *Laverne C. Johnson and Ardie Lubin* 125
 - Experimental Variables 126
 - Internal Variables 126
 - Measurement of Responses 131
 - Experimental Design and Analysis 141
 - Common Procedural and Interpretational Difficulties 149
 - References 153
- 4 Instruments in Psychophysiology *Clinton C. Brown* 159
 - Basic Definitions and Concepts 160
 - The Instrumentation Problem 162
 - Sources of Biologic Signals 168

Instrumental Detection of Psychophysiological Responses	170
Conclusion	192
References	193
5 Physiological Response Measures During Classical Conditioning <i>John A. Stern</i>	197
Procedures and Definitions	197
Some Problems in Classical Conditioning	199
Measures of Conditioning	206
Conditioning and the Orienting Response	207
Types of Conditional Response	209
Other Factors Affecting Conditioning	220
Conclusion	223
References	224
6 Operant Analysis in Psychophysiology <i>Donald W. Shearn</i>	229
Elements of Operant Analysis	230
Psychophysiological Side Effects of Operant Analysis	232
Operant Reinforcement and Punishment of Physiological Responses	236
Controversial Issues in Using Autonomic Responses as Operants	246
Some Considerations for Further Research	253
References	254
 PART 3 RESPONSE SYSTEMS	
7 Electrical Activity of the Brain <i>Charles Shagass</i>	263
Historical Introduction	263
Techniques	266
Analysis and Quantification of the EEG	275
Normal EEG Rhythms and Their Variations	278
Physiological Basis of the EEG	282
Biochemical Factors Influencing the EEG	282
Age and the EEG	286
Sex and the EEG	290
The EEG and Individual Differences	290
EEG Correlates of Awareness, Mental Activity, and Sensory-Motor Responsiveness	296
Conditioning of the EEG	303
Sensory Evoked Responses	304
Concluding Remarks	319
References	320
8 Electromyography: A Measure of Skeletal Muscle Response <i>Iris Balshan Goldstein</i>	329
Historical Background	330
Muscle Action Potentials (MAPs) and Their Relationship to Muscle Tension	330
Methods in Electromyographic Research	333

	The Relationship Between the Electromyogram and Performance	339
	Electromyographic Studies Relating to Personality Theory	350
	Muscle Control by the Use of Feedback Mechanisms	358
	References	359
9	Electrical Activity of the Skin: Its Measurement and Uses in Psychophysiology <i>Robert Edelberg</i>	367
	Bases of Electrodermal Activity	367
	Experimental Methods and Findings	378
	Behavioral Correlates and Applications	401
	Conclusions	409
	References	409
10	The Gastrointestinal Tract as a Responsive System <i>Stewart Wolf and Jack D. Welsh</i>	419
	Methods of Investigation	422
	Effects of Hunger and Satiety	425
	Salivary Glands	425
	Esophagus	426
	Stomach	428
	Small Intestine	440
	Liver and Biliary Passages	443
	Pancreas	443
	The Colon	445
	References	452
11	Psychophysiology of the Cardiovascular System <i>C. G. Gunn, Stewart Wolf, R. T. Block, and R. J. Person</i>	457
	Methodology of Cardiovascular Physiology	458
	Innervation of the Heart and Vessels	466
	Neurophysiology	470
	Psychophysiological Mechanisms	477
	Conclusion	483
	References	483
12	Pupillometrics: A Method of Studying Mental, Emotional, and Sensory Processes <i>Eckhard H. Hess</i>	491
	History of Research on the Psychopupil Response	492
	Neuroanatomical and Neurophysiological Substrates of Pupillary Activity	497
	Pupillometric Research Activity	501
	Research Findings Based on Pupillometrics	508
	References	527

PART 4 CONCEPTS OF HUMAN NATURE DEVELOPED THROUGH PSYCHOPHYSIOLOGY

13	Studies of Autonomic Balance in Children and Adults <i>Marion A. Wenger and Thomas D. Cullen</i>	535
----	---	-----

	Early Studies of Children and Adults	535
	Later Studies of Adult Males	550
	Recent Investigations	558
	Concluding Statement	567
	References	568
14	Response Specificity <i>Bernard T. Engel</i>	571
	Definitions	572
	Some Interesting Problems	574
	References	575
15	Activation <i>Elizabeth Duffy</i>	577
	The Concept of Activation	578
	The Measurement of Activation	580
	Physiological Systems as Measures of Activation	583
	Factors Affecting Activation	590
	Activation and Performance	600
	Individual Differences	608
	References	614
16	The Psychophysiology of Emotion <i>Peter J. Lang, David G. Rice, and Richard A. Sternbach</i>	623
	Emotional Stimuli	625
	Physiological Response in Emotion	629
	Emotional Change and Control	634
	References	640
17	The Psychophysiology of Sleep <i>Frederick Snyder and Jimmy Scott</i>	645
	The Nature and Depth of Sleep	646
	The Psychophysiology of Dreaming	682
	References	697
18	Physiological Measures of Sexual Arousal in the Human <i>Marvin Zuckerman</i>	709
	Central Nervous System	710
	Autonomic Nervous System	711
	Hormones	713
	Electrodermal Measures	713
	Cardiovascular Changes	718
	Respiratory Changes	720
	Penile Erection Measures	721
	Scrotum and Testes	725
	Vaginal Blood Flow	726
	Uterine Contractions	727
	Temperature	728
	Pupillary Response	729
	Evoked Cortical Response	733
	Biochemical Determinations	733
	Critique and Conclusions	736
	References	738

PART 5 APPLICATIONS OF PSYCHOPHYSIOLOGICAL TECHNIQUES AND FINDINGS

19	On the Detection of Deception: A Model for the Study of the Physiological Effects of Psychological Stimuli	<i>Martin T. Orne, Richard I. Thackray, and David A. Paskewitz</i>	743
	Principles Underlying the Detection of Deception		744
	Lie Detection in the Field		745
	Laboratory Research		752
	Conclusions		779
	References		780
20	Psychophysiological Pharmacology	<i>Charles F. Stroebe</i>	787
	Definition of a Drug		789
	The Placebo Effect: Drug Effects Without Drugs		790
	The Stimulus Role of Drugs		791
	Drug Effects as Overt Behavioral Response Changes: Behavioral Pharmacology		796
	Neurochemical Mechanisms		798
	Neurotransmitters, Drugs, and Biochemical Theories of Mental Illness		804
	Drugs and Autonomic Response Patterns		806
	Guide to Classes of Drugs and Drug Effects		812
	The Electroencephalogram, Drugs, and Sleep		821
	Design of Drug Experiments		823
	References		833
21	Psychosomatic Medicine	<i>David T. Graham</i>	839
	The Psychosomatic Problem Defined		839
	The Specificity Problem and Other Issues		851
	Specific Diseases		862
	Summary		915
	References		917
22	Psychophysiological Concepts of Psychopathology	<i>A. A. Alexander</i>	925
	Responsivity-Reactivity Concepts		930
	Concepts of Activation/Arousal		936
	Defective Physiological Regulation		942
	Physiological Imbalance		944
	Homeostatic Concepts		947
	Central Nervous System Structure		949
	Approach and Avoidance Hypotheses		951
	Psychoanalytic Formulations		954
	Behavioral Correlates of Autonomic Response Patterns		954
	Conclusion		955
	References		956

PART 6 OVERVIEW AND INDEXES

Overview	<i>Robert B. Malmö</i>	967
Emotions and Bodily Changes		967
Stress		968
Elizabeth Duffy (1904–1970)		969
On Levels of Function in the Autonomic Nervous System		970
EMG Monitoring of Behavior		971
Motivation and Physiological Measures		973
On Physiological Monitoring in the Area of Activation		974
Sleep and Arousal		975
Anxiety		975
Psychophysiological Investigation of Bodily Symptoms		976
Brain Stimulation and Emotional Behavior		977
Further Complexities in the Research Area of Emotion		978
Apologia and Looking Ahead		978
References		978
NAME INDEX		981
SUBJECT INDEX		1003
