

List of tablesIX

List of figures XVII

1. Introduction 1

2. Concept and realization 5

2.1 Objectives 5

2.2 Description of the Delphi methodology 5

2.3 Structure of the questionnaire 7

2.4 Development of the questionnaire 12

2.5 Selection of experts 18

2.6 Realization of the survey 22

2.7 Returned questionnaires/response rate 24

2.8 Statistical analysis 29

3. Results in different countries 31

3.1 Germany 31

3.2 Greece 55

3.3 Italy 64

3.4 The Netherlands 85

3.5 Spain 113

4. Comparative analysis 133

4.1 Differences between countries 133

4.1.1 Degree of knowledge 133

4.1.2 Personal attitude 134

4.1.3 Time of realization 139

4.1.4	Influential factors	146
4.1.5	Importance.....	152
4.2	Differences between the expert groups.....	159
5.	Future impacts of biotechnology in the Agro-Food sector.....	163
5.1	Acceptance of biotechnology.....	163
5.1.1	Introduction	163
5.1.2	Analysis of the statements in the domain "acceptance".....	164
5.1.3	General overview of the results	172
5.1.4	General trends and findings	181
5.2	Legal framework conditions	195
5.2.1	Introduction.....	195
5.2.2	General overview of the results	196
5.2.3	Expertise and attitudes towards norms and standards	200
5.2.4	Controls on marketing of gene food products	203
5.2.5	Labelling, public participation and economic impacts	212
5.2.6	Summary.....	216
5.3	Economic implications.....	218
5.3.1	Introduction	218
5.3.2	Relevance of the economic issues.....	218
5.3.3	Market aspects.....	222
5.3.4	Price and cost effects of genetically engineered products.....	236
5.3.5	Employment in the Agro-Food sector.....	237
5.3.6	Small and medium-sized enterprises (SMEs)	240
5.3.7	Branch-specific impacts of biotechnology	241
5.4	Environmental impacts.....	245
5.4.1	Biotechnological approaches to reduce environmental problems in animal husbandry, plant production and food industry.....	246
5.4.2	Scientific developments in plant production	252
5.4.3	Potential negative environmental impacts	258
5.4.4	Controversially discussed specific topics	260

5.4.5	Framework conditions.....	265
5.5	Health	272
5.5.1	Introduction	272
5.5.2	Methodology, analysis design.....	273
5.5.3	Promoting health by nutrition	279
5.5.4	Adverse health effects	281
5.5.5	Information on health effects of food	284
5.6	Scientific and technological development	286
5.6.1	Introduction	286
5.6.2	Enzymes	287
5.6.3	Genetic engineering of polygenic traits in plants	295
5.6.4	Reproduction techniques and genetic engineering in farm animals.....	303
5.6.5	Diagnostics and analytical methods.....	313
5.6.6	Summary and conclusions.....	323
6.	Conclusions and recommendations	327
6.1	Which scientific and technical developments can be expected in future?	327
6.2	Impacts on health of consumers and the environment.....	331
6.3	Future acceptance of Agro-Food biotechnology	334
6.4	Regulatory issues.....	336
6.5	Economic implications of Agro-Food biotechnology	338
6.6	Suitability of the Delphi methodology.....	340
6.7	Recommendations	342
7.	Summary	349
8.	Literature	363
	Annex: Questionnaire of the second round for Germany	379
