Cell death regulation by BH3-only family proteins

Guest Editor Dr G Chinnadurai

Released for publication in July 2009

S1 Guest Editor

REVIEWS

- S2 **BH3-only proteins in apoptosis and beyond: an overview**
E Lomonosova and G Chinnadurai
- S20 **BIK, the founding member of the BH3-only family proteins: mechanisms of cell death and role in cancer and pathogenic processes**
G Chinnadurai, S Vijayalingam and R Rashmi
- S30 ***egl-1*: a key activator of apoptotic cell death in *C. elegans***
R Nehme and B Conradt
- S41 **Bim and Bmf in tissue homeostasis and malignant disease**
JD Piñon, V Labi, A Egle and A Villunger
- S53 **BAD: undertaker by night, candyman by day**
NN Danial
- S71 **PUMA, a potent killer with or without p53**
J Yu and L Zhang
- S84 **Noxa: at the tip of the balance between life and death**
C Ploner, R Kofler and A Villunger
- S93 **Bid: a Bax-like BH3 protein**
LP Billen, A Shamas-Din and DW Andrews
- S105 **The role of *HRK* gene in human cancer**
M Nakamura, K Shimada and N Konishi
- S114 **BNIP3 subfamily BH3-only proteins: mitochondrial stress sensors in normal and pathological functions**
G Chinnadurai, S Vijayalingam and SB Gibson

Contents continued...

- S128 BH3-only proteins and their roles in programmed cell death**
M Giam, DCS Huang and P Bouillet
- S137 The autophagy effector Beclin 1: a novel BH3-only protein**
S Sinha and B Levine
- S149 Mimicking the BH3 domain to kill cancer cells**
T Ni Chonghaile and A Letai
- S158 Cardiac reanimation: targeting cardiomyocyte death by BNIP3 and NIX/BNIP3L**
GW Dorn and LA Kirshenbaum
- S168 BH3-only proteins in rheumatoid arthritis: potential targets for therapeutic intervention**
J Hutcheson and H Perlman
