Introduction	iii
Chapter 1. Preliminaries	1
1.1. Covariant systems	2
1.2. Coactions on $C^*$ -algebras	3
1.3. Invariant ideals	7
Chapter 2. Pointwise unitary coactions on $C^*$ -algebras with continuous trace	11
2.1. Pointwise unitary cosystems	11
2.2. The localization property of pointwise unitary coactions on $C^*$ -algebras with continuous trace	15
2.3. Proper $G$ -bundles and pull-back $C^*$ -algebras	23
2.4. Applications	29
Chapter 3. Exterior equivalence and Morita equivalence for pointwise unitary coactions	35
3.1. Exterior equivalence	35
3.2. Morita equivalence	38
3.3. Morita equivalent coactions on stable continuous trace $C^*$ -algebras	42
3.4. The compact case	48
Chapter 4. Pointwise unitary coactions on type I $C^*$ -algebras	51
4.1. Invariant ideals and the restriction map	51
4.2. Pointwise unitary coactions on $C^*$ -algebras with generalized continuous trace	55
4.3. Strongly regular systems	60
Chapter 5. Upper and lower multiplicity for irreducible representations	63
5.1. Definition and basic properties	63
5.2. Pointwise unitary coactions and multiplicity	66
5.3. Strongly regular systems and multiplicity	69
Appendix A. Full coactions	75
A.1. The reduction process for normal coactions	76
A.2. Exterior equivalence for full coactions	78
A.3. Full pointwise unitary coactions on $C^*$ -algebras with continuous trace	81

Appendix B. $C^*$ -algebras and locally unitary cosystems	83
B.1. $C^*$ -algebras	83
B.2. Locally unitary coactions on $C^*$ -algebras with Hausdorff spectrum	85
Bibliography	87
