1 Introduction	1
2 The Ecosystem Services Approach to Natural Resource Management	3
Ecosystem services defined	5
The ecosystem services approach	9
3 Policy Appraisal Perspectives and Socio-economic Appraisal Approaches	19
Policy contexts	19
Existing socio-economic appraisal approaches	21
4 The Ecosystem Services Approach: Valuation of Multi-functional Wetlands	25
Overview of approach and analytical stages	25
Stage 1 Wetland classification: The simplified hydrogeomorphic method (HGM)	31
Stage 2 Wetland ecosystem functioning and the services of wetlands	32
Stage 3 Wetland functioning service benefits	36
Stage 4 Wetland valuation/evaluation	39
5 Economic Valuation of Wetland Ecosystem Services in Practice	59
Practical constraints	59
Wetland benefits	66
Valuation of hydrological service benefits	68
Valuation of biogeochemical service benefits	84
Valuation of ecological service benefits	96
6 Valuation of Multi-functional Wetland: Case Studies	111
7 Conclusions and Future Prospects	143

Appendix A: Economic Valuation Techniques	147
Appendix B: Wetland Ecosystem Services: Overview of Empirical Studies	171
Appendix C: Case Studies Used for Policy Review and Survey	193
<i>Bibliography</i>	209
<i>Index</i>	225

List of Figures, Tables and Boxes

FIGURES

2.1	Framework for an Ecosystem Services Approach (ESApp)	4
2.2	Relationships among intermediate services, final services and benefits	6
2.3	An example of joint products stemming from a single ecosystem process	7
2.4	Mapping layers integral to the ESApp	11
2.5	The integration of mapping exercises and scenario analysis	12
3.1	Ecosystem damages and valuation	20
3.2	Project appraisal framework CBA+MCA	22
4.1	Wetland functioning, uses and values	26
4.2	Ecosystem service approach	31
4.3	On-site and off-site wetland service benefits	36
4.4	Components of the total economic value of wetlands	43
5.1	Summary diagram of the fate of nitrogen entering a wetland	86
5.2	Ecological services and economic value	97
6B.1	Managed realignment	120
6B.2	Coastal squeeze	121
6B.3	Areas suitable for managed realignment in the Humber	124

TABLES

4.1	Examples of wetland characteristics	27
4.2	HGM wetland classification	33
4.3	Simplified wetlands classification	33
4.4	Wetland classes and representative services and benefits sets	35
4.5	Wetland services and associated socio-economic service outcomes	37–38
4.6	Wetland services and service outcomes (benefits)	40–41
4.7	Wetland ecosystem service outcomes, TEV and accounting values	44–45
4.8	Valuation methodologies relating to wetland services	55–56
5.1	Valuation methods used to estimate the socio-economic benefits of wetland ecosystem services	69

5.2	Wetland service outcomes and valuation techniques used	70–71
6A.1	Mean WTP per annum by distance zone and visitation experience (payment principle refusals included as zeros)	113
6A.2	The present non-user's benefits of preserving the present condition of Broadland aggregated across Great Britain using various procedures (£million/annum)	114
6A.3	Measures of users' WTP to preserve the Norfolk Broads from saline flooding obtained using various elicitation techniques	116
6A.4	Costs and benefits of policy responses to sea level rise in East Anglia	119
6B.1	Details of areas suitable for realignment	125
6B.2	Values used to estimate the costs and benefits of realignment	126
6B.3	Net Present Values at 25, 50 and 100 years of providing flood defence for the BAU, PT, DG and EDG scenarios as compared to the hold-the-line scenario using a declining discount rate	128
6B.4	Year in which NPV (scenario costs – HTL costs) becomes positive under alternative discount rates and alternative cost and benefit value scenarios	129
6C.1	Results from the non-parametric modelling of the voluntary payment scheme data (local sub-sample)	135
6C.2	Results from the non-parametric modelling of the voluntary data (tourist sub-sample)	136
6C.3	Costs of alternative 10 per cent Culm Grassland expansion schemes (current £million)	137
6C.4	The net benefits of implementing the 10 per cent expansion scheme (current £million)	137

BOX

2.1	Obstacles to market-based conservation mechanisms	14–15
