

<i>Acknowledgements</i>	4
<i>Editor's Introduction</i>	6
1 Designing an experiment	9
2 Presenting the results of an experiment	27
3 Drawing inferences from experiments: the general approach	54
4 Drawing inferences from experiments: independent samples	70
5 Drawing inferences from experiments: related samples	92
6 Some additional techniques	102
7 Experimental design and beyond	114
<i>Appendices:</i>	
1 Calculating the mean, median, and mode from a frequency distribution	123
2 Calculating the variance and standard deviation from a frequency distribution	128
3 Statistical tables	131
<i>References (and Name Index)</i>	139
