

PART I THE THEORY OF FINANCE

1 Introduction: Capital Markets, Consumption

- A. Introduction 3
- B. Consumption and Investment without Capital Markets 4
- C. Consumption and Investment with Capital Markets 8
- D. Marketplaces and Transaction Costs 12

2 Investment Decisions: The Certainty Case

- A. Introduction 17
- B. Fisher Separation: The Separation of Individual Utility Preferences from the Investment Decision 18
- C. The Agency Problem 19
- D. Shareholder Wealth Maximization 20
- E. Capital Budgeting Techniques 24

3 The Theory of Choice: Utility Theory and

- A. Five Axioms of Choice under Uncertainty 46
- B. Developing Utility Functions 48
- C. Establishing a Definition of Risk Aversion 52
- D. Comparison of Risk Aversion in the Small and in the Large 57
- E. Stochastic Dominance 59

ption, and Investment 3

- E. Transaction Costs and the Breakdown of Separation 13
 - Summary 14
 - Problem Set 14
 - References 15

Case 17

- F. Comparison of Net Present Value with Internal Rate of Return 29
- G. Cash Flows for Capital Budgeting Purposes 34
- H. Relaxing the Assumptions 39
 - Summary 40
 - Problem Set 40
 - References 43

Given Uncertainty 45

- F. Using Mean and Variance as Choice Criteria 62
- G. A Mean Variance Paradox 66
- H. Recent Thinking and Empirical Evidence 68
 - Summary 69
 - Problem Set 69
 - References 73

4 State Preference Theory 75

- A. Uncertainty and Alternative Future States 76
- B. Definition of Pure Securities 77
- C. Complete Capital Market 77
- D. Derivation of Pure Security Prices 78
- E. No-Arbitrage Profit Condition 80
- F. Economic Determinants of Security Prices 81
- G. Optimal Portfolio Decisions 84
- H. The Efficient Set with Two Risky Assets (and No Risk-Free Asset) 86

5 Objects of Choice: Mean-Variance Port

- A. Measuring Risk and Return for a Single Asset 102
- B. Measuring Portfolio Risk and Return 109
- C. The Efficient Set with Two Risky Assets (and No Risk-Free Asset) 121
- D. The Efficient Set with One Risky and One Risk-Free Asset 125

6 Market Equilibrium: CAPM and APT

- A. Introduction 147
- B. The Efficiency of the Market Portfolio 148
- C. Derivation of the CAPM 149
- D. Properties of the CAPM 152
- E. Use of the CAPM for Valuation: Single-Period Models with Uncertainty 156
- F. Applications of the CAPM for Corporate Policy 157
- G. Extensions of the CAPM 159
- H. Empirical Tests of the CAPM 164

7 Pricing Contingent Claims: Option Pric

- A. Introduction 199
- B. A Description of the Factors that Affect Prices of European Options 201

- I. Firm Valuation, the Fisher Separation Principle, and Optimal Investment Decisions 89
 - Summary 92
 - Problem Set 92
 - References 94
- Appendix 4A. Forming a Portfolio of Pure Securities 96
- Appendix 4B. Use of Prices of State-Contingent Claims in Capital Budgeting 97

Portfolio Theory 101

- E. Optimal Portfolio Choice: Many Assets 127
- F. Portfolio Diversification and Individual Asset Risk 137
 - Summary 141
 - Problem Set 141
 - References 144

147

- I. The Market Risk Premium 171
- J. The Empirical Market Line 174
- K. The Problem of Measuring Performance: Roll's Critique 174
- L. The Arbitrage Pricing Theory 176
- M. Empirical Tests of the Arbitrage Pricing Theory 186
 - Summary 188
 - Problem Set 188
 - References 193

Option Pricing Theory and Evidence 199

- C. Combining Options: A Graphic Presentation 204
- D. Equity as a Call Option 206

- E. Put-Call Parity 208
- F. Some Dominance Theorems that Bound the Value of a Call Option 209
- G. Derivation of the Option Pricing Formula—The Binomial Approach 217
- H. Valuation of a Call On a Stock with No Dividends 230
- I. Pricing American Put Options 237
- J. Extensions of the Option Pricing Model 240

8 The Term Structure of Interest Rates, 259

- A. The Term Structure of Interest Rates 259
- B. Models of the Term Structure 265
- C. Forward and Futures Contracts 273
- D. The Theory of Futures Markets and Futures Contract Pricing 281
- E. Empirical Evidence 291

9 Multiperiod Capital Budgeting under Uncertainty, 305

- A. Introduction 305
- B. Comparing NPV with Decision Trees and Real Options 306
- C. Three Key Assumptions for Pricing Real Options 313
- D. Valuing Real Options on Dividend-Paying Assets 317
- E. Types of Real Options 321
- F. Valuing Combinations of Simple Real Options 322

10 Efficient Capital Markets: Theory and Evidence, 353

- A. Defining Capital Market Efficiency 353
- B. A Formal Definition of the Value of Information 355
- C. The Relationship between the Value of Information and Efficient Capital Markets 359
- D. Rational Expectations and Market Efficiency 360

- K. Empirical Evidence on the Option Pricing Model 244
 - Summary 250
 - Problem Set 250
 - References 252

Appendix 7A. Two Alternative Derivations of the Black-Scholes Option Pricing Model 255

Forward Contracts, and Futures 259

- F. Synthetic Futures and Options on Futures 293
 - Summary 296
 - Problem Set 297
 - References 299

Uncertainty: Real Options Analysis 305

- G. Valuing Compound Options 325
- H. Switching Options 333
- I. An Example of How to Evaluate an Investment Program 337
- J. Empirical Evidence 344
 - Summary 345
 - Problem Set 346
 - References 349

3

- E. Market Efficiency with Costly Information 364
- F. Statistical Tests Adjusted for Risk 366
- G. The Joint Hypothesis of Market Efficiency and the CAPM 370
 - Summary 372
 - Problem Set 373
 - References 375

11 Efficient Capital Markets: Evidence

- A. Empirical Models Used for Residual Analysis 377
- B. Relevant Information (Earnings versus Cash Flow) 378
- C. Speed of Adjustment 383
- D. Rejection of Strong-Form Efficiency 389
- E. Common Errors of Empirical Studies 389

12 Information Asymmetry and Agency

- A. Information Asymmetry 415
- B. Agency Theory 439
- C. Agency Theory and Finance 449

PART II CORPORATE POLICY: THEORY AND APPLICATIONS 465

13 The Role of the CFO, Performance Measurement

- A. The Role of the Chief Financial Officer 470
- B. Performance Measurement 471
- C. Incentive Design 482

14 Valuation and Tax Policy 497

- A. Formula Approach for Valuing Companies 497
- B. Spreadsheet Approach for Valuing Companies 506

15 Capital Structure and the Cost of Capital

- A. The Value of the Firm Given Corporate Taxes Only 559
- B. The Value of the Firm in a World with Both Personal and Corporate Taxes 570
- C. Introducing Risk—A Synthesis of the Modigliani-Miller Model and CAPM 574
- D. The Cost of Capital with Risky Debt 579

- F. Semistrong-Form Anomalies: Long Term 391
- G. Semistrong-Form Anomalies: Short Term 399
- H. Cross-Sectional Puzzles 404
 - Summary 406
 - Problem Set 406
 - References 409

Theory 415

- Summary 460
- Problem Set 461
- References 462

DRY, EVIDENCE,

Measurement, and Incentive Design 469

- Summary 494
- Problem Set 494
- References 495

- C. Corporate Tax Policy and Value 541
 - Summary 553
 - Problem Set 553
 - References 554

Capital: Theory and Evidence 557

- E. A Model with Business Disruption and Tax-Deductible Interest 588
- F. Business Disruption Costs: Evidence 593
- G. Agency Costs—Another Equilibrium Theory of Optimal Capital Structure 594
- H. Nonequilibrium Effects 596

- I. Empirical Evidence Concerning Capital Structure 604
- J. How Does a Practitioner Use the Theory to Determine Optimal Capital Structure? 611
- K. The Maturity Structure of Debt 615
- L. The Effect of Other Financial Instruments on the Cost of Capital 617

16 Dividend Policy: Theory and Empiric

- A. The Irrelevance of Dividend Policy in a World without Taxes 646
- B. Dividend Policy in a World with Personal and Corporate Taxes 650
- C. Toward a Theory of Optimal Dividend Policy 654
- D. Behavioral Models of Dividend Policy 661
- E. Clientele Effects and Ex Date Effects 663

17 Applied Issues in Corporate Finance

- A. Introduction 697
- B. Leasing 697
- C. Interest Rate Swaps 714
- D. Risk Management 718
- E. Pension Fund Management 728

18 Acquisitions, Divestitures, Restructu

- A. Merger Activity 753
- B. Alternative Growth Strategies 753
- C. M&As as an Adjustment Process 756
- D. Theories of Mergers, Implications, and Empirical Evidence 760
- E. Potential Sources of Synergy in Conglomerate Mergers 772
- F. The Performance of M&As 778
- G. Joint Ventures 781
- H. Alliances and Partnerships 783

19 International Financial Management

- A. Volatility in Exchange Rates 819
- B. International Financial Systems 821
- C. Analysis of International Transactions 825
- D. The International Parity Relationships 829
- E. Empirical Evidence and Exchange Rate Forecasting 837

20 Unsolved Issues, Undiscovered Territory

- A. Corporate Finance 866
- B. Risk Management 870
- C. Managerial Finance 871
- D. Real Option Pricing 871
- E. Valuation—Expert Systems and Neural Networks 872
- F. Regulation 872
- G. Empirical Studies 872

Appendix A Discounting 881

- A. Introduction 881
- B. The Time Value of Money: Discrete Compounding 881

Appendix B Matrix Algebra 893

- A. Matrices and Vectors 893
- B. The Operations of Matrices 894
- C. Linear Equations in Matrix Form 896
- D. Special Matrices 897
- E. Matrix Inversion Defined 897
- F. Matrix Transposition 898

Appendix C An Introduction to Multiple

- A. Ordinary Least Squares, Linear Estimation 909
- B. Bias and Efficiency 916

- F. Management of Foreign Exchange Risks 839
- G. International Asset Pricing Models 844
- H. The Cost of Capital and Currency Risk 848
