

Contents

| | |
|---|-----------|
| 1. Introduction | 1 |
| 1.1. Problem Description | 2 |
| 1.2. Aim of the Study | 4 |
| 2. Mathematical Treatment of Two-Phase Flows | 5 |
| 2.1. Integral Balance | 6 |
| 2.2. Differential Balance | 10 |
| 2.3. Dimensionless Form of the Navier-Stokes Equations | 11 |
| 2.4. Jump Conditions | 12 |
| 3. Numerical Approach | 15 |
| 3.1. The Numerical Method | 16 |
| 3.2. Decoupling of the Simulation Process | 19 |
| 3.3. Method for the Simulation of the Ultrasonic Field | 21 |
| 3.4. Method for the Simulation of Free Fluid Surface | 25 |
| 3.4.1. Surface Tension | 27 |
| 3.4.2. Numerical Implementation of the Surface Forces | 29 |
| 3.4.3. Parasite Currents | 29 |
| 3.5. Coupling of the Numerical Tools | 31 |
| 3.5.1. Modeling of the Interfacial Source Terms | 32 |
| 3.5.2. Numerical Implementation of the Interfacial Source Terms | 33 |
| 4. Ultrasonic Standing Wave Fields | 37 |
| 4.1. Previous Investigations | 38 |
| 4.2. Theory on Sound Acoustics | 40 |
| 4.2.1. Linearization of the Wave Equation | 40 |
| 4.3. Plane Waves of Small Amplitude | 43 |

| | | |
|-----------|--|------------|
| 4.4. | Plane, Standing Waves of Small Amplitude | 44 |
| 4.4.1. | Oscillation-Reflection Unit | 44 |
| 4.4.2. | Twin-Oscillation Unit | 45 |
| 4.5. | Experimental Measurement of the Ultrasonic Field | 48 |
| 4.5.1. | Experimental Setup of the Pilot Plant | 48 |
| 4.5.2. | Interferometric Investigation of the Ultrasonic Field | 50 |
| 4.6. | Numerical Simulation of the Ultrasonic Field | 52 |
| 4.7. | Variation of Operational and Geometrical Parameters | 54 |
| 4.7.1. | Variation of the Sonotrode's Curvature | 56 |
| 4.7.2. | Variation of the Sonotrode's Diameter | 59 |
| 4.7.3. | Variation of the Gas Temperature | 62 |
| 4.8. | Acoustic Sound Pressure Level | 64 |
| 5. | Droplet Levitation | 67 |
| 5.1. | Previous Investigations | 67 |
| 5.2. | Mechanism of the Atomization Process | 68 |
| 5.3. | Deformation and Breakup Regimes | 69 |
| 5.3.1. | Bernoulli Pressure - Qualitative Characterization | 72 |
| 5.3.2. | Bernoulli Pressure - Quantitative Characterization | 75 |
| 5.4. | Experimental Investigations of the Deformation Process | 77 |
| 5.5. | Numerical Investigations of the Deformation Process | 78 |
| 5.6. | Size Determination of the Deformation Complex | 80 |
| 6. | Strand Breakup | 83 |
| 6.1. | Previous Investigations | 84 |
| 6.2. | Mechanism of the Disintegration Process | 86 |
| 6.3. | Experimental Investigation of the Strand Disintegration | 90 |
| 6.4. | Numerical Investigation of the Strand Disintegration | 92 |
| 6.5. | Experimental Determination of the Particle Size Distribution | 95 |
| 6.6. | Numerical Determination of the Particle Size Distribution | 98 |
| 7. | Conclusions and Future Perspective | 103 |
| A. | Mathematical Supplement | 107 |
| A.1. | Stokes Theorem | 107 |

| | |
|--|------------|
| A.2. Gaussian Divergence Theorem | 107 |
| A.3. Delta Distribution | 107 |
| B. Recursive Algorithm | 109 |
| B.1. Definition | 109 |
| B.2. Structure | 110 |
| C. The Modified Carreau Model | 113 |
| List of Tables | 115 |
| List of Figures | 117 |
| Bibliography | 121 |
