PREFACE	vii
1. INTRODUCTION	1
Definition of Attitude	2
The Method of Direct Questioning	3
Direct Observation of Behavior	5
Attitude Statements	9
Informal Criteria for Attitude Statements	13
Questions and Problems	14
References and Suggested Readings	17
2. THE METHOD OF PAIRED COMPARISONS	19
Thurstone's Contribution	20
Schematic Representation of Paired Comparison Data	28
The <i>F</i> Matrix	28
The <i>P</i> Matrix	30
The ζ Matrix	30
Case V: Complete Data	31
Obtaining the Scale Values	34
The Internal Consistency Check	37
Case V: Incomplete Data	40
Attitude Scales	47
Questions and Problems	50
References and Suggested Readings	51
3. SIGNIFICANCE TESTS FOR PAIRED COMPARISON JUDGMENTS	53
Test of Significance for the Case V Model	55
Calculation of Discriminal Dispersions	58
Derivation of Formulas Used in Calculating Discriminal Dispersions	63
Scale Values Using the Case III Model	66
Circular Triads and the Coefficient of Consistence	66
Significance Test for the Coefficient of Consistence	70
Hill's Study Using the Coefficient of Consistence	72
The Coefficient of Agreement	76
χ^2 Test for the Coefficient of Agreement	78
Questions and Problems	81
References and Suggested Readings	81

4.	THE METHOD OF EQUAL-APPEARING INTERVALS	83
	The Sorting Procedure	83
	Calculation of Scale and Q values	86
	The Attitude Scale	92
	Number of Judges Required	94
	Variations in the Method of Obtaining Judgments	95
	The Criterion of Irrelevance	98
	Attitude as a Latent Variable	101
	The Influence of Attitude on Scale Values	106
	Questions and Problems	116
	References and Suggested Readings	117
5.	THE METHOD OF SUCCESSIVE INTERVALS	120
	Estimating Interval Widths	124
	Scale Values of the Statements	129
	Statements with Scale Values in the First Interval	131
	Statements with Scale Values in the Last Interval	133
	An Internal Consistency Test	135
	Influence of Attitude on Scale Values	139
	Discriminal Dispersions	141
	Attitude Scales	144
	The Distribution of Judgments on the Psychological Continuum	145
	Questions and Problems	147
	References and Suggested Readings	147
6.	THE METHOD OF SUMMATED RATINGS	149
	Normal Deviate Weighting of Response Categories	149
	Selection of Items	152
	Interpretation of Scores	156
	Expressing Attitude Scores as T Scores	158
	Reliability of Attitude Scores	159
	Thurstone Scale Values of Statements in Likert Scales	162
	The Edwards and Kenney Study	165
	Ease of Construction of Summated-Rating and Equal-Appearing Interval Scales	168
	Questions and Problems	169
	References and Suggested Readings	170
7.	SCALOGRAM ANALYSIS	172
	Unidimensional Scales	173
	Universe of Content	176
	The Cornell Technique	178
	Another Method of Scalogram Analysis	184

More Than Two Categories of Response	188
Modal Categories and Minimal Marginal Reproducibility	191
Scale and Non-Scale Types	193
Quasi-Scales	197
Questions and Problems	198
References and Suggested Readings	199
8. THE SCALE-DISCRIMINATION TECHNIQUE	201
Cutting Points for Thurstone Statements	203
An Empirical Test of the Scalability of Statements in Thurstone Scales	207
The Scalability of Statements in Summated-Rating Scales	208
The Scale-Discrimination Technique	210
Obtaining Scale and Q Values	210
Obtaining Summated-Rating Responses	211
Dichotomizing Response Categories	212
Finding the Discriminating Power of the Statements	213
Selection of Statements for the Scale	214
Advantages Claimed for the Scale-Discrimination Technique	216
Questions and Problems	217
References and Suggested Readings	218
9. THE IMPROVEMENT OF CUMULATIVE SCALES	220
Marginals and the Stability of Response Patterns	221
H-Technique	227
Cutting Points	229
Contrived Statements	235
Scoring Contrived Statements	235
Reproducibility of Responses	236
W-technique	238
Questions and Problems	242
References and Suggested Readings	243
APPENDIX:	
Table I. Table of normal deviates z corresponding to proportions p of a dichotomized unit normal dis- tribution	246
Table II. Table of the angular transformation of percentages to degrees	248
Table III. Table of χ^2	251
INDEX OF NAMES	252
INDEX OF SUBJECTS	254
