Preface vii

## PART I: INTRODUCTION

<b>1. Two Leftovers from Volume 3</b> .....	<b>3</b>
1.1 Developmental Change	3
1.2 Empirical Constraints on Deduction Models	4
1.3 Plan of This Work	4
<b>2. Some Methodological Issues</b> .....	<b>7</b>
2.1 Changes in Procedure	7
2.2 A Different "Null Hypothesis" for the Inventory Prediction	9
<b>3. A Deduction Model for Quantifiers</b> .....	<b>13</b>
3.1 A New Formulation for the Class of Deduction Models	13
3.2 The Language $Lq$	15
3.3 Some Useful Definitions	17
3.4 Rewrite Rules and Helping Conditions	21
3.5 The Operations $\alpha_{Lq}$	25
3.6 Derivations in $\alpha_{Lq}$	28
3.7 Six Remarks about $Mq$	33

## PART II: EXPERIMENTAL TEST OF $Mq$ , AND THE QUESTION OF DEVELOPMENTAL CHANGE

<b>4. Experiment 1:</b>	
<b>Test of <math>Mq</math> with Adolescent Subjects</b> .....	<b>39</b>
4.1 Design	39
4.2 Method	41
4.3 Preliminary Analysis of Results	53
4.4 Inventory Analysis	64
4.5 Additivity Analysis	64
4.6 Conclusion from Experiment 1	65

<b>5. Experiment 2:</b>	
<b>Test of <math>Mq</math> with Child Subjects</b>	<b>71</b>
5.1 Design	71
5.2 Method	72
5.3 Preliminary Analyses of Results	72
5.4 Inventory Analysis	82
5.5 Additivity Analysis	82
5.6 Conclusions from Experiment 2	85
<b>6. Experiment 3:</b>	
<b>Test of the Model with Arguments Based on Time</b>	<b>87</b>
6.1 Design	87
6.2 Method	88
6.3 Preliminary Analyses of Results	89
6.4 Inventory Analysis	107
6.5 Additivity Analysis	107
6.6 Conclusions from Experiment 3	112
<b>7. Experiment 4:</b>	
<b>Test of <math>Mt</math> with Child Subjects</b>	<b>115</b>
7.1 Design	115
7.2 Methods	115
7.3 Preliminary Analyses of Results	116
7.4 Inventory Analysis	121
7.5 Additivity Analysis	121
7.6 Conclusions from Experiment 4	128

### **PART III: EXPLANATORY ADEQUACY OF DEDUCTION MODELS**

<b>8. Explanatory Adequacy:</b>	
<b>General Considerations</b>	<b>131</b>
8.1 Conceptual Domains of English	131
8.2 Observational and Descriptive Adequacy	132
8.3 Research Problem and Plan of Attack	134
8.4 Properties of Derivations Evoked by Conceptual Domains	136
8.5 Explanatory Adequacy	137
8.6 Learning Theory and Two Kinds of Theories of Conceptual Domains	139
8.7 Explanatory Adequacy and Real-Time Considerations	141
8.8 Simplicity Metrics	143
8.9 The Analogy with the Goals of Generative Grammar	147
8.10 Summary	146
<b>9. Proposals for a Theory of Conceptual Domains</b>	<b>149</b>
9.1 Observational and Descriptive Adequacy of $Mq$	149
9.2 Formal Properties of $Mq$	152
9.3 What Set of Derivations Does the Theory Exclude?	157

## PART IV: AN INITIAL TEST OF THE THEORY

<b>10. A Deduction Model for the Conceptual Domain of Necessity and Possibility</b> . . . . .	<b>163</b>
10.1 The Deduction Model, $Mn$	163
10.2 Derivations in $\alpha_{Ln}$	166
10.3 Formalizability of $Mn$ under Conditions 1–9; Clarification of Condition 6	170
10.4 Experimental Test of $Mn$ : Design and Method	172
10.5 Preliminary Analysis of Results	187
10.6 Inventory and Additivity Analyses	192
10.7 Conclusions from Experiment 5	197
<b>11. A Deduction Model for the Conceptual Domain of Obligation and Permissibility</b> . . . . .	<b>201</b>
11.1 The Deduction Model, $Md$	201
11.2 Derivations in $\alpha_{Ld}$	208
11.3 Experimental Test of $Md$ : Design and Method	210
11.4 Preliminary Analyses of Results	220
11.5 Inventory and Additivity Analyses	221
11.6 Conclusions from Experiment 6	221
<b>Epilogue</b> . . . . .	<b>231</b>
<b>Appendix, Richard F. Poppen</b> . . . . .	<b>235</b>
<b>References</b> . . . . .	<b>245</b>
<b>Author Index</b>	<b>247</b>
<b>Subject Index</b>	<b>248</b>
