

# CONTENTS

	<b>preface</b>	<b>ix</b>
<b>PART 1</b>	<b>basic principles</b>	
<b>CHAPTER</b>		
<b>ONE</b>	<b>introduction</b> Measurement in science. Advantages of standardized measures. Measurement and mathematics. Measurement scales. Decisions about measurement scales.	<b>2</b>
<b>TWO</b>	<b>scaling models</b> Types of responses required of subjects. Methods for scaling stimuli. Models for scaling people. Deterministic models for scaling people. Probability models for scaling people.	<b>31</b>
<b>THREE</b>	<b>validity</b> Predictive validity. Content validity. Construct validity. Explication of constructs. Other issues concerning validity.	<b>75</b>
<b>PART 2</b>	<b>internal structure of measures</b>	
<b>FOUR</b>	<b>variance and covariance</b> Variance. Correlation and covariance. Product-moment correlation. Other uses of PM correlation. Estimates of PM coefficients. Other measures of correlation. Factors that influence the PM correlation. A universal measure of relationship.	<b>104</b>
<b>FIVE</b>	<b>multivariate correlational analysis</b> Variance of linear combinations. Characteristics of score distributions. Covariance of linear combinations. Partial correlation. Multiple correlation.	<b>137</b>
<b>SIX</b>	<b>theory of measurement error</b> The domain-sampling model. The model of parallel tests. Perspectives on the two models. Precision of reliability estimates. Deductions from the domain-sampling model. Alternative models.	<b>172</b>

<b>SEVEN</b>	<b>assessment of reliability</b> Sources of error. Estimation of reliability. Uses of the reliability coefficient. Making measures reliable. Reliability of linear combinations.	<b>206</b>
<b>EIGHT</b>	<b>test construction</b> Construction of achievement tests. The criterion-oriented approach to test construction. Constructing tests in terms of item difficulties. Construction of homogeneous tests. Special problems in test construction. Speed tests.	<b>236</b>
<b>PART 3 multivariate analysis</b>		
<b>NINE</b>	<b>fundamentals of factor analysis</b> Mathematical basis. The centroid method of condensation. Other methods of condensation: Principal axes, the square-root method. Rotation of factors. Methods for testing hypotheses: Spearman's general-factor solution, bifactor method, multiple-group method.	<b>288</b>
<b>TEN</b>	<b>special issues in factor analysis</b> The communality problem. Statistical decisions. Estimation of factor scores. Factor-analytic designs. Cluster analysis. Ad-lib factoring. Higher-order factors. Comparisons of factors in different analyses. How to fool yourself with factor analysis. An outlook on factor analysis.	<b>348</b>
<b>ELEVEN</b>	<b>profile analysis, discriminatory analysis, and multidimensional scaling</b> Problems in profile analysis. Clustering of profiles. Raw-score factor analysis. Discriminatory analysis. Pattern analysis. Multidimensional scaling: The geometric models, estimation of distances, ratio estimates of distances, interval estimates, ordinal estimates of distances.	<b>372</b>
<b>PART 4 the content areas</b>		
<b>TWELVE</b>	<b>measurement of abilities</b> Historical perspective. Pioneering research by the Thurstones. Present outlooks on studies of human abilities. Judging the importance of factors of ability. Guilford's concept of the structure of intellect. Hierarchical models.	<b>426</b>
<b>THIRTEEN</b>	<b>measurement of personality traits</b> Definitions of personality traits. Idiographic and nomothetic theories. Self-inventory measures. Observational methods. Projective techniques. Physiological measures of personality traits. Personality traits in perception and judgment. Other methods for the measurement of personality.	<b>469</b>

<b>FOURTEEN</b>	<b>measurement of sentiments</b> Types of sentiments: Interests, values, and attitudes. Properties of rating scales. Models for the scaling of verbalized attitudes. Construction of summative scales for verbalized attitudes. Semantic-differential scales. The Q sort. Scaling of stimuli.	<b>514</b>
<b>FIFTEEN</b>	<b>contingent variables</b> Effects of speed. Effects of guessing. Response styles. Summary of research on response styles. Effects of carelessness and confusion.	<b>559</b>
	<b>bibliography</b>	<b>623</b>
	<b>index</b>	<b>633</b>
