<b>Preface</b>	xv
<b>To the Student</b>	xix

<b>1</b>	<b>WHY UNDERSTAND PSYCHOLOGICAL RESEARCH METHODS</b>	<b>2</b>
	Preview	2
	Why You Need to Know This Material	2
	A Skeptical View of Knowledge	3
	An Empirical Base of Knowledge	6
	Excitement of Research	7
	A Consumer of Research	7
	Who Does Psychological Research?	8
	Ethical Principles for Research with Human Participants	9
	Ethical Principles for the Care and Use of Animals	12
	Example of Psychological Research	14
	Summary	21
<b>2</b>	<b>THE BASIS OF PSYCHOLOGICAL RESEARCH</b>	<b>22</b>
	Preview	22
	Why You Need to Know This Material	22
	Choosing a Research Problem	23
	Characteristics of Scientific Research	25
	<i>Causality</i>	25
	<i>Empirical knowledge</i>	26
	<i>Replicability</i>	26
	Role of Theory and Research Hypotheses	27
	<i>What is psychological theory?</i>	27
	<i>Research hypotheses</i>	29

	<i>Empirical evaluation of theories and research hypotheses</i>	32
	<i>Current theorizing in psychology</i>	36
	<i>Usefulness of theories in psychological research: pro and con</i>	37
	<i>Applying the criteria of science: parapsychology</i>	40
	<i>The Empirical Test</i>	41
Summary		41
<b>3</b>	<b>FUNDAMENTALS OF EXPERIMENTAL DESIGN</b>	<b>42</b>
	Preview	42
	Why You Need to Know This Material	42
	Variables of Psychological Research	43
	<i>Independent variables</i>	43
	<i>Dependent variables</i>	44
	<i>Extraneous variables</i>	45
	Variables as Constructs	47
	<i>Concepts and constructs</i>	47
	<i>Empirical referents</i>	48
	<i>Operational definitions</i>	48
	<i>Difference between conceptual variables and operationally defined variables</i>	53
	<i>Variables as either independent or dependent</i>	53
	The Experiment	54
	<i>Control and experimental conditions</i>	54
	<i>Confounding</i>	55
	The Basics of Experimental Design	57
	<i>Number of independent variables employed</i>	58
	<i>Between-Subjects and within-subjects designs</i>	58
	One-Factor Between-Subjects Designs	59
	<i>The true experiment</i>	59
	<i>Ex post facto studies</i>	61
	Summary	66
<b>4</b>	<b>DESIGNING AND CONDUCTING AN EXPERIMENT</b>	<b>68</b>
	Preview	68
	Why You Need to Know This Material	68
	Effects of Extraneous Variables	69
	<i>Confounding</i>	69
	<i>Error variation</i>	70
	Strategy of Experimental Design	75
	<i>Maximizing variation due to the independent variable</i>	75
	<i>Minimizing variation due to extraneous variables</i>	78
	<i>Techniques for controlling effects of extraneous variables</i>	78

Conducting the Experiment	89
<i>How many participants should be used?</i>	89
<i>Pilot studies: ensuring that the experiment can be run</i>	90
Summary	91

## 5 MEASUREMENT AND DESCRIPTIVE ANALYSIS OF DATA 92

Preview	92
Why You Need to Know This Material	92
Measurement	93
<i>Reliability</i>	94
<i>Validity</i>	94
<i>Levels of measurement</i>	95
<i>Rating scales and level of measurement</i>	102
Treatment of Raw Data from an Experiment	104
<i>What do the raw data tell us?</i>	106
<i>Organizing the raw data</i>	107
<i>Shapes of frequency distributions</i>	110
Descriptive Statistics	112
<i>Need for statistics</i>	112
<i>Measures of central tendency</i>	114
<i>When a mean is not the mean: the geometric mean</i>	118
Summary	120

## 6 MEASURES OF VARIABILITY AND ESTIMATION OF POPULATION PARAMETERS 122

Preview	122
Why You Need to Know This Material	122
Need for Measures of Variability	123
Measures of Variability	124
<i>Range</i>	124
<i>Interquartile range</i>	125
<i>Semi-interquartile range</i>	126
<i>Comparing range measures</i>	126
<i>Average deviation</i>	126
<i>Variance and the standard deviation</i>	128
<i>What does the standard deviation tell us?</i>	131
<i>Comparing measures of variability</i>	135
Choosing Descriptive Statistics	136
<i>Level of measurement of the dependent variable</i>	137
<i>Shape of the frequency distribution</i>	138
<i>Using descriptive statistics for further analysis of data</i>	139

Exploratory Data Analysis	140	
<i>Stem-and-leaf displays</i>	140	
<i>Box-and-whisker plots</i>	141	
Using Statistics for Inference and Estimation	142	
<i>Sample mean as an estimator of population mean</i>	143	
Summary	154	
<b>7 STATISTICAL HYPOTHESIS TESTING AND THE <math>t</math> TEST</b>		<b>156</b>
Preview	156	
Why You Need to Know This Material	156	
The Experimenter's Dilemma	157	
<i>Numerical illustration of the experimenter's dilemma</i>	158	
<i>Statistical hypothesis testing: resolving the experimenter's dilemma</i>	161	
Statistical hypothesis testing	162	
<i>Statistical model for an experiment</i>	162	
<i>Statistical tests</i>	163	
The $t$ Test for Independent Groups	173	
<i>Sampling distribution of differences in sample means</i>	174	
<i>Statistical decision making with a <math>t</math> test for independent groups</i>	177	
Mann-Whitney $U$ Test	189	
<i>Perception of ambiguous figures: an example experiment</i>	190	
Summary	197	
<b>8 ONE-FACTOR BETWEEN-SUBJECTS ANALYSIS OF VARIANCE</b>		<b>200</b>
Preview	200	
Why You Need to Know This Material	200	
Overview of Analysis of Variance	201	
Analysis of Variance Statistical Model	202	
<i>Constructing a score</i>	202	
<i>Deriving variance estimates from the components of scores</i>	205	
<i>Summarizing an analysis of variance</i>	210	
<i>Mean squares as estimates of the population variance</i>	211	
<i>Statistical decision making with analysis of variance</i>	217	
Analysis of Variance and Principles of Research Design	223	
Analysis of Variance on the Data of McCarthy and Betz	224	
<i>Relationship between <math>t</math> and <math>F</math></i>	225	
Summary	226	
<b>9 ONE-FACTOR MULTILEVEL DESIGNS: ANALYSIS OF VARIANCE, FOLLOW-UP TESTS, AND STRENGTH OF ASSOCIATION MEASURES</b>		<b>228</b>
Preview	228	
Why You Need to Know This Material	228	

Tonic Immobility as a Research Problem	230
Example of a Multilevel One-Factor Design	231
<i>Analyzing data of a multilevel experiment</i>	232
Multiple Comparison Procedures	235
<i>A simple comparison</i>	236
<i>Problem of Type I errors</i>	236
<i>Planned vs. post hoc comparisons</i>	237
<i>Comparison procedure for multiple F tests</i>	238
<i>Post hoc comparisons and control of Type I errors</i>	240
<i>Choosing a test of multiple comparisons</i>	242
<i>Multiple comparisons on the tonic immobility experiment</i>	242
Pitfalls of Data Fishing	244
Strength of a Treatment Effect	245
<i>Measuring strength of association with a significance test</i>	245
<i>Measures of strength of association</i>	246
<i>Examples of using strength of association measures</i>	247
<i>Interpreting measures of the strength of association</i>	248
<i>Kruskal-Wallis analysis of variance by ranks</i>	250
Summary	254

## 10 FACTORIAL DESIGNS AND TWO-WAY ANALYSIS OF VARIANCE

256

Preview	256
Why You Need to Know This Material	256
Factorial Designs	257
The $2 \times 2$ Between-Subjects Design	258
<i>Information obtained from a factorial design</i>	259
<i>Importance of factorial designs and interactions</i>	260
Example of a $2 \times 2$ Between-Subjects Design	262
<i>Descriptive data analysis of a factorial experiment</i>	263
Inferential Data Analysis of a Factorial Design	265
<i>An overview</i>	265
<i>Components of a score</i>	265
<i>Deriving variance estimates from the components of scores</i>	267
<i>Mean squares as estimates of the population variance</i>	271
<i>Statistical decision making with factorial analysis of variance</i>	272
<i>Analysis of variance on the example data</i>	273
<i>Interpreting an analysis of variance</i>	276
Extensions of the $2 \times 2$ Design	286
<i>Number of subjects required</i>	286
<i>Analysis of variance</i>	286
Follow-up Tests for the Analysis of Variance	288
<i>Follow-up tests for statistically significant main effects</i>	288
<i>Follow-up tests for a statistically significant interaction</i>	288

Types of Independent Variables in Factorial Designs	290	
<i>Examples of various types of between-subjects factorial designs</i>		291
Summary	296	
<b>11 ONE-FACTOR WITHIN-SUBJECTS DESIGNS AND ANALYSIS OF VARIANCE</b>		<b>298</b>
Preview	298	
Why You Need to Know This Material	298	
Example of a Within-Subjects Experiment	299	
Characteristics of Within-Subjects Designs	300	
<i>Number of participants required</i>	301	
<i>Sensitivity of within-subjects designs</i>	301	
<i>Multiple-treatment effects</i>	302	
Analyzing Data of a One-Factor Within-Subjects Design	310	
<i>Descriptive analysis of data</i>	311	
<i>One-factor within-subjects analysis of variance</i>	311	
<i>Analysis of variance on the data from the example</i>	318	
The <i>t</i> Test for Related Measures	322	
Choice of Research Design: Between-Subjects or Within-Subjects	323	
<i>Multiple-treatment effects</i>	323	
<i>Statistical considerations</i>	326	
<i>The research hypothesis</i>	329	
Nonparametric Statistical Analyses for One-Factor Within-Subjects Designs	329	
<i>An experimental example</i>	330	
<i>Wilcoxon signed-ranks test</i>	331	
<i>Friedman analysis of variance by ranks</i>	333	
Small- <i>N</i> Designs: A Special Case of the Within-Subjects Design	335	
<i>Reversal design</i>	336	
<i>Characteristics of reversal designs</i>	337	
<i>Analyzing data for reversal designs</i>	340	
Summary	340	
<b>12 TWO-FACTOR WITHIN-SUBJECTS AND MIXED DESIGNS AND ANALYSES OF VARIANCE</b>		<b>342</b>
Preview	342	
Why You Need to Know This Material	342	
Two-Factor Within-Subjects Design	343	
<i>Characteristics of within-subjects factorial designs</i>	344	
<i>Descriptive analysis of data</i>	345	
<i>Two-factor within-subjects analysis of variance</i>	346	
<i>Example of a two-factor within-subjects experiment</i>	358	

Two-Factor Mixed Design	361
<i>Characteristics of a mixed factorial design</i>	362
<i>Descriptive analysis of data</i>	363
<i>Two-factor mixed-design analysis of variance</i>	363
<i>Example of a two-factor mixed experiment</i>	373
Comparison of Factorial Designs	375
<i>Type of independent variables that may be used</i>	375
<i>Number of participants required</i>	375
<i>Sensitivity to multiple-treatment effects</i>	375
<i>Statistical sensitivity to treatment effects</i>	376
Summary	378

### 13 VALIDITY OF EXPERIMENTS

380

Preview	380
Why You Need to Know This Material	380
Role of Replication in Establishing Validity	382
<i>Types of replication</i>	382
Statistical-Conclusion Validity	383
<i>Factors affecting statistical-conclusion validity</i>	384
<i>When is statistical-conclusion validity achieved?</i>	388
Internal Validity	390
<i>Threats to internal validity of experiments</i>	390
<i>When is internal validity achieved?</i>	392
Construct Validity	393
<i>Theoretical constructs</i>	393
<i>Development of empirical referents</i>	394
<i>Threats to construct validity of experiments</i>	395
<i>When is construct validity achieved?</i>	399
External Validity	400
<i>Population validity</i>	400
<i>Ecological validity</i>	406
<i>When is external validity achieved?</i>	407
Some Concluding Comments on Validity	407
Scientific Understanding	409
Is There a Sex Bias in Psychological Research?	410
<i>Choice of research topics</i>	410
<i>Participants employed</i>	411
<i>Empirical referents used</i>	411
<i>Statistically testing for sex differences</i>	412
<i>Conclusions reached from the results</i>	412
<i>What can be done?</i>	412
Summary	413

<b>14</b>	<b>NONEXPERIMENTAL RESEARCH METHODS</b>	<b>414</b>
	Preview	414
	Why You Need to Know This Material	414
	Correlational Approaches to Research	415
	<i>Pearson product-moment correlation coefficient</i>	418
	<i>Spearman rank-order correlation coefficient</i>	426
	<i>Ex post facto study as correlational research</i>	428
	<i>Correlation and causality</i>	430
	Naturalistic Observation	431
	<i>Observation in naturalistic observation</i>	432
	<i>Example of naturalistic observation</i>	433
	Case-Study Method	437
	<i>Characteristics of the case study</i>	438
	<i>Example of a case study</i>	439
	<i>Value of case studies</i>	439
	Analysis-of-Frequency Data: The CHI Square Test	443
	<i>Example employing a CHI Square analysis</i>	443
	<i>Computing the <math>\chi^2</math> statistic</i>	445
	<i>Correcting for continuity in a <math>2 \times 2</math> contingency table</i>	446
	<i>Limitations on use of a CHI Square Test</i>	446
	Summary	447
<b>15</b>	<b>WRITING THE RESEARCH REPORT</b>	<b>448</b>
	Preview	448
	Why You Need to Know This Material	448
	Overview of a Research Report	450
	<i>Title</i>	450
	<i>Abstract</i>	451
	<i>Introduction</i>	451
	<i>Method</i>	455
	<i>Results</i>	458
	<i>Discussion</i>	461
	<i>References</i>	463
	<i>Appendix</i>	464
	Summary	465
	Sample Laboratory Report	466
	<b>References</b>	<b>500</b>
	<b>Appendix</b>	<b>513</b>
	<b>Name Index</b>	<b>525</b>
	<b>Subject Index</b>	<b>531</b>
