<i>Preface</i>	<i>page xi</i>
1 Introduction	1
1.1 <i>Interaction and behavior sequences</i>	1
1.2 <i>Alternatives to systematic observation</i>	2
1.3 <i>Systematic observation defined</i>	4
1.4 <i>A nonsequential example: Parten's study of children's play</i>	5
1.5 <i>Social process and sequential analysis</i>	8
1.6 <i>Another nonsequential example: Smith's study of parallel play</i>	10
1.7 <i>A sequential example: Bakeman and Brownlee's study of parallel play</i>	11
1.8 <i>Hypothesis-generating research</i>	15
1.9 <i>Summary: systematic is not always sequential</i>	17
2 Developing a coding scheme	19
2.1 <i>Introduction</i>	19
2.2 <i>What is the question?</i>	20
2.3 <i>Physically versus socially based coding schemes</i>	22

---

2.4	<i>Detectors versus informants</i>	28
2.5	<i>The fallacy of equating objectivity with physically based schemes</i>	29
2.6	<i>Keeping it simple</i>	30
2.7	<i>Splitting and lumping</i>	31
2.8	<i>Mutually exclusive and exhaustive codes</i>	33
2.9	<i>The evolution of a coding system</i>	35
2.10	<i>Example 1: interaction of prehatched chickens</i>	36
2.11	<i>Example 2: children's conversations</i>	38
2.12	<i>Example 3: baby behavior codes</i>	42
2.13	<i>Example 4: children's object struggles</i>	43
2.14	<i>Example 5: monkeys' activities</i>	45
2.15	<i>Summary</i>	46
3	<b>Recording behavioral sequences</b>	48
3.1	<i>Recording units: events versus intervals</i>	48
3.2	<i>Momentary versus duration events</i>	49
3.3	<i>Continuous versus intermittent recording</i>	50
3.4	<i>Coding events</i>	51
3.5	<i>Recording onset and offset times</i>	54
3.6	<i>Timing pattern changes</i>	57
3.7	<i>Coding intervals</i>	58
3.8	<i>Cross-classifying events</i>	61
3.9	<i>Nonsequential considerations: time sampling</i>	64
3.10	<i>The pleasures of pencil and paper</i>	65
3.11	<i>Why use electronics?</i>	66
3.12	<i>Summary</i>	69

---

4	Assessing observer agreement	70
4.1	<i>Why bother?</i>	70
4.2	<i>Reliability versus agreement</i>	74
4.3	<i>The problem with agreement percentages</i>	75
4.4	<i>The advantages of Cohen's kappa</i>	78
4.5	<i>Agreement about unitizing</i>	84
4.6	<i>Agreement about codes: examples using Cohen's kappa</i>	87
4.7	<i>Generalizability theory</i>	92
4.8	<i>Unreliability as a research variable</i>	96
4.9	<i>Summary</i>	97
5	Representing observational data	100
5.1	<i>Representing versus recording</i>	100
5.2	<i>Event sequences</i>	101
5.3	<i>Time sequences</i>	102
5.4	<i>Time-frame data</i>	105
5.5	<i>Cross-classified events</i>	112
5.6	<i>Transforming representations</i>	113
5.7	<i>Summary</i>	116
6	Analyzing sequential data: first steps	118
6.1	<i>Describing versus modeling</i>	118
6.2	<i>Rates and frequencies</i>	119
6.3	<i>Probabilities and percentages</i>	120
6.4	<i>Mean event durations</i>	122
6.5	<i>Transitional probabilities: an introduction</i>	123
6.6	<i>Summary</i>	128

7	Analyzing event sequences	129
7.1	<i>Describing particular sequences: basic methods</i>	129
7.2	<i>Determining significance</i>	130
7.3	<i>The problem of independence</i>	135
7.4	<i>How many data points are enough?</i>	137
7.5	<i>The type I error problem</i>	143
7.6	<i>Describing particular sequences: transitional probabilities revisited</i>	145
7.7	<i>How to compute z scores</i>	151
7.8	<i>Individual versus pooled data</i>	155
7.9	<i>Describing particular sequences: lag sequential methods</i>	158
7.10	<i>Describing general orderliness</i>	162
7.11	<i>Summary</i>	166
8	Analyzing time sequences	169
8.1	<i>The tyranny of time</i>	169
8.2	<i>The problem of independence revisited</i>	171
8.3	<i>Micro to macro</i>	174
8.4	<i>Time-series analysis</i>	175
8.5	<i>Summary</i>	189
9	Analyzing cross-classified events	191
9.1	<i>Describing cross-classified events</i>	191
9.2	<i>Log-linear models: a simple example</i>	194
9.3	<i>Summary</i>	198
10	Epilogue	200
10.1	<i>Kepler and Brahe</i>	200

*Contents*
