

CONTENTS

CHAPTER	PAGE
I. THE PROBLEM DEFINED.....	1
Previous Studies Throwing Light Upon the Effect of Time on Size of Correlations	3
Summary and Statement of Present Problem	7
II. NATURE AND SOURCES OF DATA.....	10
Character of the Constant Group	11
Description of Tests Used	17
Method of Scaling Tests	18
Method of Equating Forms	22
Validity of the Scaling	25
The Criterion of Measurement	28
III. RESULTS: THE INFLUENCE OF TIME UPON SCORES.....	30
Intercorrelations Obtained	32
Reliability of the Coefficients	35
Influence of Time on Correlations	36
Coefficients of Reliability	42
Curves of Improvement	45
Influence of Time Upon Variability	47
IV. RESULTS: THE ADVANTAGES OF CUMULATION	51
The Multiple Correlations Obtained	53
Correlations with the Unweighted Mean	55
Limits to the Advantages of Simple Averaging	56
Average Errors of Estimate	60
Comparative Advantages of Different Types of Score	64
The Improvement Evaluated	69
V. SUMMARY AND CONCLUSIONS	74
BIBLIOGRAPHY	80

TABLES

TABLE	PAGE
A. Coefficients of Correlation for Stanford-Binet IQ's.....	4
B. Mean Intercorrelations for Raw Scores on Various Tests over the Intervals Indicated (After Gates and LaSalle)	7
I. Sex and School Derivation of the Constant Group.....	12
II. Grade Location of the Constant Group at Times of Testing..	12
III. Quotients of the Two Hundred Pupils, Indicating Distribution of Ability in the Constant Group	14
IV. Brightness Scores of the Two Hundreds Pupils as in Table III	15
V. Standard Deviation of Ages and Test Scores of the Constant Group in May, 1924, as Contrasted with Those for Pupils of the Nearest Corresponding Year-Grade in Twelve New York City Schools Combined	16
VI. Extract from Tables Employed in Determining T Scores for Thorndike-McCall Reading Form 1 by Percentile Equation with Form 2, Already T Scaled	24
VII. Constancy of Intelligence Quotient in Constant Group when Based on Present Scaling and Local Norms as Contrasted with Those of the National Intelligence Test Manual...	28
VIII. Coefficients of Correlation for Raw Scores on Tests.....	32
IX. Coefficients of Correlation for T Scores	33
X. Coefficients of Correlation for Quotients	33
XI. Coefficients of Correlation for Brightness Scores	34
XII. Probable Errors for Coefficients of Correlation Based on a Group of Two Hundred	35
XIII. Mean Coefficients of Correlation Over Varying Time Intervals	37
XIV. Corresponding Coefficients of Correlation Between Tests of Equal Reliability Given to Like Groups After Different Intervals of Time	40
XV. Coefficients of Reliability for Tests of the Present Study Expressed as for Groups of the Variability of Twelve-Year- Old Children of the Schools Concerned, and Corrected for the Effects of Time Elapsed Between Tests	43
XVI. Curves of Improvement of the Six Tests and Educational Batter Score, as Measured by Mean T Scores of Successive Testings	46
XVII. Standard Deviations of Scores of the Constant Group, Showing Tendency to Increase with Successive Testings	49

TABLE	PAGE
XVIII. Relative Variability in Terms of the Pearson Coefficient ($V = 100\sigma/M$) as Based on T Scores of the Constant Group on Successive Testings	50
XIX. Multiple Correlations Between Actual 1926 Performance and Predictions Based Upon Two or More Previous Testings Using Raw Scores in the Original Test Units	52
XX. Multiple Correlations Between Actual 1926 Performance and Predictions Based Upon Two or More Previous Testings Using Scores in Form of Quotients	53
XXI. Multiple Correlations Between Actual 1926 Performance and Predictions Based Upon Two or More Previous Testings Using Brightness Scores	54
XXII. Mean Correlations with 1926	57
XXIII. Multiple Correlations for a Hypothetical "Type Test" Given at One-Year Intervals Over a Period of Five Years.....	59
XXIV. Mean Error of Estimate, or Average Difference Between the Standing of Individual Pupils in 1926 as Measured and as Predicted by Simple Averaging of Their Standing in Previous Years	62
XXV. Correlations Between Final Scores and Those Predicted with and without the Use of Initial Measures of Brightness (Quotients or B Scores)	67
XXVI. Summary Table Indicating Degree of Improvement Attained Through Cumulation of Test Results for Various Tests and Types of Score with and without the Use of Weighting	70
