

Preface	xv
----------------	-----------

UNIT I

FOUNDATIONS OF PSYCHOLOGICAL RESEARCH

Chapter 1	
Scientific Foundations of Psychological Research	3
The Quest for Knowledge	4
Science	5
Attributes of Science	5
Philosophical Assumptions	6
Scientific Methods	7
Products of Science	13
Criteria for the Evaluation of Theories	15
Operationism	16
Measurement and Instrumentation	17
Objectives of Science	18
Basic and Applied Science	21
Summary	22
Exercises	24
Recommended Readings	24

Chapter 2	
Trends and Issues in the History of Psychology	25
Introduction	26
The Beginnings of the Science of Psychology	27
Early Systems of Psychology	31
The Beginnings of Modern Associationism and Behaviorism	32
Gestalt Psychology	35
Psychoanalysis	35
Neobehaviorism	37
The Behaviorism of B. F. Skinner	38
Eclecticism	41
Physiological and Cognitive Psychology	42

Humanistic Psychology	46
Limits on Learning	48
Reflections on Contemporary Psychology	48
Summary	51
Exercises	52
Recommended Readings	52

Chapter 3

Conceptual Foundations of Experimental Psychology	55
The Definition of Psychology	56
The Difficulties of Conducting Psychological Research	57
The Schema of the Psychological Event	58
Descriptive and Experimental Research	59
The Structure of the Typical Experiment	60
Variables	62
Empirical Research Variables	63
Selection of Variables	65
Identifying a Problem's Variables	65
The Relationship between Variables	65
S-R and S-O-R Psychology	70
Measurement	72
Sampling	75
Statistics	76
Reliability and Validity	77
Summary	78
Exercises	79
Recommended Readings	80

UNIT II

DEVELOPMENT OF THE RESEARCH PROBLEM

Chapter 4

The Literature Search	83
Selection of a Research Area	84
Review of the Literature	85
Selection of a Research Problem	106
Summary	106
Exercises	107
Literature Review Sources	107

Chapter 5

Identification of a Research Problem	113
Occasions for the Identification of a Research Problem	114
Nature of the Research Problem	116

Assessment of the Literature	116
Sources of Research Ideas	117
Idea List	123
Evaluation of Research Ideas	123
Peer Reviews	127
Formulation of the Hypotheses	128
Development of a Research Program	128
Implementation of the Research Problem	130
Summary	131
Exercises	132
Recommended Readings	132

UNIT III

IMPLEMENTATION OF THE RESEARCH PROBLEM

Chapter 6

Methodology: The Means of Achieving External and Internal Validity **135**

Internal and External Validity	136
Developing the Research Plan	137
Selecting a Research Method	137
Selecting an Organism	138
Sampling from the Species Selected	140
Selecting Independent Variables	143
Selecting Independent Variable Conditions	143
Selecting Dependent Variables	144
Selecting an Experimental Design	149
Selecting Experimental Procedures	150
Selecting a Research Environment	154
Selecting Materials and Instrumentation	155
Selecting Statistical Procedures	156
The Proposal	159
Pilot Studies	159
Summary	159
Exercises	161
Recommended Readings	161

Chapter 7

Research Methods **163**

Nonexperimental Research Methods	164
Experimental Research Methods	176
Developmental Research Methods	185
Relative Importance of the Research Methods	185
Research Methods in Combination	186
Summary	186

Exercises	187
Recommended Readings	188

Chapter 8

Experimental Control: The Means for Achieving Internal Validity 189

Confounding	190
Relevant and Irrelevant Variables	191
Sources of Confounding	192
Selecting Experimental Control Methods	201
Methods of Control	202
Summary	220
Exercises	221
Recommended Readings	222

UNIT IV

STATISTICAL PROCEDURES

Chapter 9

Descriptive Statistics 225

Introduction	226
The Nature of Statistics	226
The Nature of Data	226
Summation Notation	228
Frequency Distributions	230
Graphing Frequency Distributions	231
Graphing	233
Statistics	235
Measures of Central Tendency	235
Measures of Dispersion	237
The Correlation Coefficient	240
Selection of Descriptive Statistics	245
Summary	245
Exercises	247
Recommended Readings	248

Chapter 10

Inferential Statistics 249

Sampling of Populations	250
Testing for a Difference between Independent Data Sets	252
Statistical Hypotheses	258
Testing for a Difference between Matched and Repeated-Measures Data Sets	260
Testing for a Difference among Three or More Data Sets	262
Summary Table of the ANOVA	266
Evaluation of the F Statistic	267

Testing for a Difference between Three or More Matched or Repeated-Measures Data Sets	267
Paired Comparisons among Data Sets	268
Choosing a Statistical Test	269
Using the Statistical Test Summary Table	271
Mann-Whitney U Test	273
Chi-Square	274
Computer Data Analysis	278
Summary	279
Exercises	281
Recommended Readings	283

UNIT V

EXPERIMENTAL DESIGNS

Chapter 11

Quasi-Experimental and One-Variable Experimental Designs	287
Introduction	288
Quasi-Experimental Designs	288
Experimental Designs	295
Summary	312
Exercises	314
Recommended Readings	315

Chapter 12

Multifactor Experimental Designs	317
Multifactor Designs	318
Two-Factor Designs	320
Three-Factor Designs	338
Computer Data Analysis	341
Summary	342
Exercises	343
Recommended Readings	344

Chapter 13

Small-N Research	345
Introduction	346
Advantages of Small- N Research	347
Small- N Research Methods	348
Small- N Designs	348
The A-B Design	349
The A-B-A Design	351
The A-B-A-B Design	353
The A-B-C-B Design	354
Interaction Designs	356
Multiple-Baseline Designs	358

The Role of Statistics in Small- <i>N</i> Research	364
The Relative Merits of Small- <i>N</i> and Large- <i>N</i> Research	366
Summary	368
Exercises	369
Recommended Readings	370

UNIT VI

DATA INTERPRETATION AND COMMUNICATION OF RESULTS

Chapter 14

Data Interpretation and Generalization 373

Evaluation of the Methodology of the Experiment	374
Statistical Evaluation of the Results	376
Confirmation of the Hypothesis	379
Inferences about Concepts and Processes	379
Converging Operations	384
Relating the Results to Theory	385
Explanation	387
External Validity	388
Relating the Study to the Literature	391
Data Interpretation: The Stimulus of New Problems	392
Summary	393
Exercises	395
Recommended Readings	395

Chapter 15

Communication of the Research 397

The Importance of Communication	398
Rudiments of Effective Communication	398
APA Style	399
The Structure of the Research Report	401
A Guide to Writing in APA Style	405
An Example of a Published Research Report	405
Appendix	407
Exercises	426
Recommended Readings	426

UNIT VII

RESEARCH ISSUES

Chapter 16

Research Ethics 429

Introduction	430
Ethical Principles of Human Subjects Research	430

Ethics Procedures and Methodologies	439
Ethical Issues	447
The Ethics of Animal Research	450
Summary	452
Exercises	455
Recommended Readings	455
Appendix: Statistical Tables	457
A.1 Random Numbers	459
A.2 Critical Values of the t Distribution	461
A.3 Critical Values of the F Distribution	462
A.4 Critical Values of the Studentized Range Statistic	468
A.5 Critical Values of the Mann-Whitney U Test	470
A.6 Critical Values of the Chi-Square (χ^2) Distribution	477
References	479
Glossary	493
Indexes	501
Subject Index	
Author Index
