

Contents

Contributors	ix
Preface	xi
I. INTRODUCTION TO TEST DESIGN	
1. Introduction to the Problem of Test Design	
<i>Susan E. Embretson (Whitely)</i>	
Introduction	3
Desiderata for Test Design	3
Current Practices in Test Development	5
Current Issues in Testing and Test Design	6
Organization of the Book	7
References	16
II. DESIGN VARIABLES FROM PSYCHOLOGICAL THEORY	
2. The Representation and Processing of Information in Real-Time Verbal Comprehension	
<i>Robert J. Sternberg and Timothy P. McNamara</i>	
Introduction	21
Alternative Approaches to Analyzing Verbal Comprehension	22
Theory of Representation and Information Processing	27
Implications for Test Design and Analysis	36
Conclusion	40
References	41

3. Analyses of Spatial Aptitude and Expertise

James W. Pellegrino, Randall J. Mumaw, and Valerie J. Shute

Introduction	45
Spatial Aptitude Analysis	46
Analysis of a Spatial Visualization Task	49
Engineering Design and Graphics	61
Conclusions and Future Directions	74
References	76

4. Theoretically Based Psychometric Measures of Inductive Reasoning

Earl C. Butterfield, Donn Nielsen, Kenneth L. Tangen, and Michael B. Richardson

Introduction	77
Describing and Generating Letter Series	78
Two Theories of Letter Series Continuation	93
Experimental Tests of Theories of Letter Series Continuation	101
Five Conclusions	123
Two Theoretically Derived Psychometric Measures of Inductive Reasoning	125
Summary	133
Appendix	134
References	147

5. Cognitive Analyses of Tests: Implications for Redesign

Richard E. Snow and Penelope L. Peterson

Introduction	149
Basic Examples	150
Recent Advances	155
Conclusion	163
References	164

III. LATENT TRAIT MODELS FOR TEST DESIGN

6. The Assessment of Learning Effects with Linear Logistic Test Models

Hans Spada and Barry McGaw

Introduction	169
The Linear Logistic Test Model	170

	Four Logistic Models of Learning between Tests	181
	Learning and the Validity of Logistic Test Models	189
	References	191
7.	Multicomponent Latent Trait Models for Test Design	
	<i>Susan E. Embretson (Whitely)</i>	
	Introduction	195
	Test Design and Construct Validity	196
	Component Latent Trait Models	200
	Conclusion	216
	References	217
8.	Psychometric Models for Speed-Test Construction: The Linear Exponential Model	
	<i>Hartmann Scheiblechner</i>	
	Speed in Psychological Research	219
	The Model	225
	Simplification and Generalization of the Model: Monotone Probabilistic Additive Conjoint Measurement Structure (MPAM)	236
	Appendix I	239
	Appendix II	242
	References	243
9.	A Latent Trait Model for Items with Response Dependencies: Implications for Test Construction and Analysis	
	<i>David Andrich</i>	
	Introduction	245
	The Rating Mechanism and Associated Models	247
	An Elaboration of the Dispersion Location Model	251
	Two Contexts for the Application of the DLIM (DLM of Items)	254
	The DLIM and Dependence among Responses	257

The Illustrative Data Sets	262
Discussion and Implications for Test Construction	271
Acknowledgments	273
References	273

IV. TEST DESIGN FROM THE TEST DEVELOPMENT PERSPECTIVE

10. Speculations on the Future of Test Design

Isaac I. Bejar

Introduction	279
Technology and Test Design	279
Cognitive Science and Psychometrics	284
Concluding Comments	292
References	292

Author Index	295
Subject Index	299
