

Table of Contents

Chapter 1	Introduction	1
1.1	Aim of Study and Outline of Dissertation	2
1.2	Methods of Respiration Measurement	3
1.2.1	Impedance Pneumography	4
1.2.2	Inductive Plethysmography	5
1.2.3	Thermistor Method	7
1.2.4	Other Methods	8
Chapter 2	Related Physiological Basis	11
2.1	Blood Volume Pulse	11
2.2	Respiratory Fluctuations in Arterial Blood Pressure	15
2.3	Respiratory Sinus Arrhythmia	17
Chapter 3	Photoplethysmography	19
3.1	Measuring Principle	21
3.1.1	Light Extinction by the Hemoglobin	21
3.1.2	Measurement of Blood Volume Pulse	22
3.1.3	Pulse Oximetry	24
3.1.4	Photoplethysmographic Breath Detection	26
3.2	Development of a Photoplethysmograph	28
Chapter 4	Respiration Measurement Using PPG	31
4.1	Respiration Extraction with a Bandpass Filter	31
4.1.1	Results from Adults	31
4.1.2	Results from Children	35
4.2	Modeling toward Airflow Signal	38
4.2.1	Modeling Method	38
4.2.2	Simulation	41
Chapter 5	Time-Frequency Distribution	47
5.1	Definition of the Wigner Distribution	49

5.2	Properties of the Wigner Distribution	51
5.3	Band-Limited Signal	53
5.4	Optimization of the WD	55
5.4.1	Frequency Smoothing Using a Time Window	56
5.4.2	Smoothing in the Time Domain	59
5.4.3	Window Functions $h(k)$ and $g(p)$	59
5.4.4	Computational Formula of the SPWD	61
5.5	Examples	63
5.5.1	Comparison between the SPWD and the Spectrogram	63
5.5.2	Cross-Terms in the SPWD	66
5.5.3	Effect of Signal Pause on the SPWD	71
Chapter 6	Heart Rate Analysis toward Respiration	75
6.1	Determination of Instantaneous Heart Rate	75
6.1.1	Peak Detection Algorithm	77
6.1.2	Polynomial Approximation	79
6.1.3	Accuracy Assessment	81
6.2	Heart Rate Analysis Using the SPWD	84
6.2.1	Data Acquisition	84
6.2.2	Window Parameter Setting	85
6.2.3	Signal Preprocessing	88
6.3	Results	89
6.3.1	Results from Adults	89
6.3.2	Results from Children	95
Chapter 7	Summarization	99
References	103
Appendix	113
A1	Theoretical Formula of Oxygen Saturation	113
A2	Clinical Data for Apnea Identification	115
A3	Determination of Frequency Response Function	116
A4	Number of Frequency Supporting Points	119
