Contents	v
List of Publications	IX
ABSTRACT	XI
1 Introduction	1
1.1 Background	1
1.2 Motivation	2
1.2.1 An Integrated Optical Network Analyzer	3
1.2.2 An Integrated Optical PMD Compensator	5
1.3 Organization Of Thesis	5
2 Measurement Setup: Integrated Optical Network Analyzer	7
2.1 Measurement Setup	7
2.2 The DFB Laser	8
2.3 Design and Development of LiNbO ₃ -based IOC	9
2.3.1 Polarizer	13
2.3.2 Phase Modulator	17
2.3.3 TE↔TM Mode Converter	20
2.3.4 PI Temperature Controller	27
2.4 The 3x3 Fiber Coupler	28
2.4.1 Analysis of 3x3 Fiber Coupler	29
2.4.2 Basic MZI Using 3x3 Fiber Coupler	30
2.4.3 Advanced MZI Using LiNbO ₃ -based IOC and 3x3 Fiber Coupler	32
2.5 Conclusion	34
3 Longitudinal Structure Characterization of FBG	37
3.1 Fiber Bragg Gratings: An Introduction	37
3.2 Longitudinal Structure Characterization of FBG	40
3.2.1 Measurement of Complex Reflection Coefficient	40
3.2.2 Calculation of Impulse Response	41
3.2.3 Calculation of Longitudinal Grating Structure	42

3.2.4	Scalar Measurements	44
3.3	Vectorial Structure Characterization of FBG	47
3.3.1	Concept of Birefringence and Dichroism	47
3.3.2	Birefringence and Dichroism in Optical FBG	49
3.3.3	Polarization Mode Coupling	51
3.3.4	Measurement of Complex Reflectance Jones Matrix	52
3.3.5	Polarization Orthogonalization	53
3.3.6	Calculation of Impulse Response Matrix	56
3.3.7	Calculation of Vectorial Grating Structure	56
3.3.8	Vectorial Measurements	58
3.4	Conclusion	61
4	Integrated Optical PMD Compensator	63
4.1	Design Issues for Integrated Optical PMDC	63
4.1.1	Operational Principle	63
4.1.2	Two vs. Three Phases	64
4.1.3	New Proposals for High-Bit Rate PMD Compensators	66
4.1.4	Conclusion	69
4.2	DGD Profile Characterization	70
4.2.1	Measurement Setup	71
4.2.2	Inverse Scattering Algorithm	72
4.2.3	DGD Profiles in Fibers	75
4.2.4	DGD Profiles of Distributed PMD Compensator in LiNbO ₃	77
4.2.5	Conclusion	77
4.3	Conclusion	78
5	Result Discussion and Future Scope	79
5.1	Characterization of LiNbO ₃ -based IOC	79
5.2	Longitudinal Structure Characterization	81
5.3	Integrated Optical PMD Compensator	82
5.4	Conclusion	83
A	Point Matching Method	85
A.1	Formulation	85
A.2	Satisfying Boundary Conditions	88
A.3	Computation	90
B	Generation of Optical Fields	91
C	Derivation of Coupled Differential Equations for FBG	95
C.1	Maxwell Equations	95
C.2	Constitutive Relations	96
C.3	Wave Equation	97

C.4	Coupled Differential Equations for FBG	97
D	Derivation of Discrete Equations for FBG	101
D.1	S-Matrix Characterization of Optical Components	101
D.2	Calculation of S-matrix for FBG	102
D.3	Down-Up Difference Schemes	106
