

CONTENTS

Preface

Y. Le Bissonnais & A. Bruand Crust micromorphology and runoff generation on silty soil materials during different seasons	1
T. Nishimura, M. Nakano & T. Miyazaki Properties of surface crusts of an Andisol and their effects on soil-hydrological processes	17
S.H. Luk, Q.G. Cai & G.P. Wang Effects of surface crusting and slope gradient on soil and water losses in the hilly loess region, North China	29
S.C. Chiang, D.E. Radcliffe & W.P. Miller Comparison of seal hydraulic properties between Ultisols and Alfisols/Mollisols	47
H.B. So & G.D. Cook The effect of slaking and dispersion on the hydraulic conductivity of clay soils	55
P. Rengasamy, R. Naidu, T.A. Beech, K.Y. Chan & C. Chartres Rupture strength as related to dispersive potential in Australian soils	65
L.D. Norton, I. Shainberg & K.W. King Utilization of gypsiferous amendments to reduce surface sealing in some humid soils of the eastern USA	77
K. Auerswald Influence of initial moisture and time since tillage on surface structure breakdown and erosion of a loessial soil	93
X.C. Zhang & W.P. Miller The effect of drying on runoff and interrill erosion of crusted soils	103
G.A. Lehrsch, R.E. Sojka & P.M. Jolley Freezing effects on aggregate stability of soils amended with lime and gypsum	115
Chi-hua Huang & J.M. Bradford Application of a laser scanner to quantify properties of soil crusts	129
