Acknowledgements	xiii
<b>Introduction</b>	<b>1</b>
<b>Section One</b>	<b>3</b>
Preliminaries	3
Psychology and common sense explanation	4
Choosing a research question, aims and hypotheses	6
Hypotheses	6
<i>Which hypotheses are you expected to include when writing a report?</i>	7
<i>Points on the wording of hypotheses</i>	8
<i>Some further examples</i>	9
<i>Why do we have all these types of hypotheses?</i>	10
<i>Directional and non-directional hypotheses</i>	10
Independent and dependent variables	13
<b>Section Two</b>	<b>15</b>
Preliminaries	15
The experimental method	16
<i>Laboratory experiments</i>	17
<i>Field experiments</i>	19
Natural experiments and quasi-experiments	20
<i>Natural experiments</i>	20
<i>Quasi-experiments</i>	21

Introduction to non-experimental methods	23
Observational methods	24
<i>Naturalistic observation</i>	27
<i>Participant observation</i>	28
<i>Controlled observations</i>	29
<i>Recording and interpreting data from observational studies</i>	30
Content analysis	33
Case studies	34
<i>Conducting a case study</i>	36
Interviews	36
Correlational research	39
<i>Common uses of the correlational method</i>	41
Summary table of methods of investigation	42
Qualitative and quantitative methods	43
<b>Section Three</b>	<b>47</b>
Designs used in research	47
The advantages and disadvantages of different experimental designs	49
<i>Independent groups design</i>	50
<i>Repeated measures design</i>	50
<i>Matched pairs design</i>	51
<i>Single participant design</i>	52
Design of studies in developmental psychology	52
<i>Longitudinal studies</i>	52
<i>Cross-sectional studies</i>	53
<i>Cohort studies</i>	54
<b>Section Four</b>	<b>57</b>
Sampling	57
<i>Methods of choosing a sample</i>	58
<i>Sample size</i>	61
<b>Section Five</b>	<b>65</b>
The experiment as a social situation	65
<i>Experimenter bias</i>	66
<i>Participant expectations and demand characteristics</i>	67
Reducing bias	69

<b>Section Six</b>	<b>73</b>
Reliability	73
<i>Methods of measuring reliability</i>	73
Validity	75
<i>Internal validity</i>	75
<i>External validity</i>	75
<i>Test validity</i>	76
<b>Section Seven</b>	<b>79</b>
Controlling variables	79
<i>Standardisation of procedures in research</i>	80
Counterbalancing	80
Confounding variables	81
<i>Constant errors</i>	81
<i>Random errors</i>	82
<b>Section Eight</b>	<b>85</b>
Ethnocentric, cultural and androcentric biases	85
Ethical issues in research	87
<i>The deception dilemma</i>	89
<i>Research on non-human animals</i>	90
<b>Section Nine</b>	<b>91</b>
Presentation of data in reports	92
Tables of scores	92
Graphical representation	94
<i>Line graphs</i>	94
<i>Histograms and bar charts</i>	96
<i>Pie charts</i>	99
<i>General points on drawing graphs</i>	100
<i>Stem and leaf diagrams</i>	102
<i>Box and whisker plots</i>	103
<i>Scattergrams or scattergraphs</i>	105
<i>Correlation coefficients</i>	110
Measures of central tendency	112
<i>The mean</i>	112
<i>The median</i>	113
<i>The mode</i>	114
Distribution curves	116

<i>Normal distributions</i>	116
<i>Skewed distributions</i>	118
<i>Bimodal distributions</i>	120
Measures of dispersion or variability	120
<i>The range</i>	121
<i>The semi-interquartile range</i>	122
<i>Variance</i>	122
<i>Standard deviation (SD)</i>	123
Standard scores and z-scores	130
<b>Section Ten</b>	<b>133</b>
Measurement	133
<i>Data at the nominal level</i>	134
<i>Data at the ordinal level</i>	134
<i>Data at the interval level</i>	135
<i>Data at the ratio level</i>	135
Why is knowledge of levels of measurement important?	136
<b>Section Eleven</b>	<b>139</b>
Tests of statistical inference	139
Different types of statistical tests	140
<i>When do you use a parametric or non-parametric test?</i>	141
<i>Parametric tests</i>	141
<i>Non-parametric tests</i>	144
<i>Comparison of parametric and non-parametric tests</i>	145
Test selection	145
<i>Tests for a difference between two sets of scores</i>	146
<i>Tests for correlation</i>	147
Summary	148
<b>Section Twelve</b>	<b>151</b>
Tests for data at the nominal level	151
<i>Chi-square test</i>	152
<i>Some controversies over the use of chi-square</i>	157
<i>Sign test</i>	159
Two sample tests for data at the ordinal level	162
<i>Ranking</i>	162
<i>The Mann-Whitney test</i>	165
<i>Wilcoxon signed ranks test</i>	167

Two sample tests for data fulfilling the requirements for the use of parametric tests	169
<i>The t-test for unrelated data</i>	170
<i>The t-test for related data</i>	173
Tests for correlation	176
<i>Spearman's rank order correlation coefficient</i>	176
<i>Pearson's product moment correlation coefficient</i>	179
<b>Section Thirteen</b>	<b>183</b>
Interpreting the results of a statistical test	183
<i>At what level of significance can we accept the alternative hypothesis?</i>	185
Type I and Type II errors	187
<i>At what point in the research do you set the level of significance that you will accept?</i>	188
Conclusion	189
<b>Section Fourteen</b>	<b>191</b>
Interpreting qualitative research	191
<i>Reliability and validity</i>	194
Interpreting observational studies	195
<i>Content analysis</i>	197
<i>Discourse analysis</i>	198
Interpreting interviews	199
Interpreting case studies	199
Conclusion	200
<b>Section Fifteen</b>	<b>201</b>
Writing reports	201
<i>Title</i>	202
<i>Abstract</i>	202
<i>Introduction</i>	202
<i>Method</i>	203
<i>Results</i>	204
<i>Treatment of results</i>	204
<i>Discussion</i>	204
<i>Conclusion</i>	205
<i>References</i>	205
<i>Appendices</i>	205

<b>Section Sixteen: Study aids</b>	<b>207</b>
Sample exam questions	207
Appendix: Critical value tables	215
Glossary	233
Bibliography	245
Answers to exercises	249
Index	261
