Preface . . . . .	1
Study Guide for Students . . . . .	3
<b>1. Introduction to Psychological Research . . . . .</b>	<b>5</b>
1.1 The experimental hypothesis . . . . .	7
1.2 Manipulation of variables . . . . .	8
1.3 Correlational designs . . . . .	10
PROGRESS BOX ONE . . . . .	11
<b>2. Experimental Designs . . . . .</b>	<b>12</b>
2.1 Experimental designs with one independent variable . . . . .	12
2.1.1 Experimental and control conditions . . . . .	13
2.1.2 Three or more experimental conditions . . . . .	14
2.2 Experimental designs with two or more independent variables . . . . .	15
2.2.1 Two-by-two designs . . . . .	15
2.2.2 Extensions of $2 \times 2$ designs . . . . .	18
PROGRESS BOX TWO . . . . .	19
2.3 Related and unrelated designs . . . . .	19
2.3.1 Different subjects . . . . .	20
2.3.2 Same subjects . . . . .	21
2.3.3 Matched subjects . . . . .	22
PROGRESS BOX THREE . . . . .	24
2.4 Levels of measurement . . . . .	25
PROGRESS BOX FOUR . . . . .	26
<b>3. Statistical Analysis . . . . .</b>	<b>27</b>
3.1 Variability of scores . . . . .	27
3.2 Statistical probabilities . . . . .	31
3.3 Selecting a level of significance . . . . .	32
PROGRESS BOX FIVE . . . . .	34
<b>4. Selecting a Statistical Test . . . . .</b>	<b>35</b>
4.1 Decisions about experimental designs . . . . .	35
4.2 Using the Decision Chart . . . . .	36
4.3 Looking up probabilities in statistical tables . . . . .	37
4.3.1 Degrees of freedom . . . . .	37
4.3.2 One-tailed and two-tailed hypotheses . . . . .	39
PROGRESS BOX SIX . . . . .	40

<b>5. Non-parametric Tests: An Introduction</b>	41
5.1 Tests for related and unrelated designs	41
5.2 Rank ordering of scores	42
5.2.1 Overall ranking of scores	42
5.2.2 Zero scores	43
5.2.3 Tied ranks	43
5.2.4 Ranking differences between scores	44
5.2.5 Tied differences between scores	45
5.2.6 Ranking of positive and negative scores	45
PROGRESS BOX SEVEN	46
5.3 Non-parametric statistical tables	46
PROGRESS BOX EIGHT	47
<b>6. Non-parametric Tests: Step-by-Step</b>	48
6.1 Wilcoxon signed-ranks test	49
6.2 Mann–Whitney test	52
6.3 Friedman test	55
6.4 Page's <i>L</i> trend test	59
6.5 Kruskal–Wallis test	62
6.6 Jonckheere trend test	66
6.7 Chi-square test	69
<b>7. Parametric Tests: An Introduction</b>	74
7.1 Proportions of variability	74
7.2 Parametric tests for one independent variable	75
7.3 Parametric tests for two or more variables	75
PROGRESS BOX NINE	77
7.4 Requirements for parametric tests	77
PROGRESS BOX TEN	80
7.5 When to use parametric and non-parametric tests	81
PROGRESS BOX ELEVEN	82
<b>8. Parametric Tests: Step-by-Step</b>	
8.1 The <i>t</i> test (unrelated)	89
8.2 The <i>t</i> test (related)	91
8.3 General method for ANOVA	93
8.3.1 Sums of squares	93
8.3.2 Degrees of freedom	94
PROGRESS BOX TWELVE	94
8.3.3 Mean squares	95
8.3.4 Preparing data for ANOVA	98
PROGRESS BOX THIRTEEN	

8.4	One-way ANOVA (unrelated)	98
8.5	One-way ANOVA (related)	103
8.6	Two-way ANOVA (unrelated)	109
8.7	Two-way ANOVA (related)	116
8.8	Two-way ANOVA (mixed)	125
8.9	Extensions of ANOVA	131
9.	Tests for Correlational Designs	132
9.1	Measuring correlations	133
9.2	Testing the significance of correlations	136
	PROGRESS BOX FOURTEEN	138
9.3	Spearman rank correlation coefficient	138
9.4	Pearson product moment correlation	141
	Epilogue	145
	PROGRESS BOX FIFTEEN	148
	Answers to Questions	149
	References	159
	Statistical Tables A to K	161
	Decision Chart	(inside front and back covers)
