

TABLE OF CONTENTS

Preface	v
---------------	---

PART I - THEORY, METATHEORY, AND MEASUREMENT

P. Suppes	3
<i>Current directions in mathematical learning theory</i>	
P. Wakker	29
<i>Transforming probabilities without violating stochastic dominance</i>	
Edw. E. Roskam	49
<i>Formal models and axiomatic measurement</i>	
A. Diederich and B. Orth	69
<i>An axiomatic approach towards testing bilinear attitude models</i>	
R. Hübner	77
<i>The representation of dynamic structures</i>	
R. Suck	85
<i>Random variables and qualitative probability representations</i>	
D. Heyer and R. Niederée	99
<i>Elements of a model-theoretic framework for probabilistic measurement</i>	

PART II - CHOICE, PERCEPTION, COGNITION, AND PERFORMANCE

G.J.P. Van Breukelen	115
<i>Some modified inhibition models for response time series</i>	
R.W. Jansen and Edw.E.Roskam	133
<i>Mental processing and distraction</i>	
C.E. Müller	157
<i>A procedure for facilitating an expert's judgements on a set of rules</i>	
R. Mausfeld and R. Niederée	171
<i>A generalized "discounting the background" model extending the traditional Grassmannian approach to colour vision</i>	
J.P. Barthélemy and E. Mullet	179
<i>Choice basis, a model for multi-attribute preference: some more evidence</i>	
A.J. Smolenaars	197
<i>An elementary formal categorization of a corpus of spelling errors</i>	
M. Müller	215
<i>Rules for parallelprocessing networks with adaptive structure</i>	

PART III - PSYCHOMETRICS AND THEORY OF DATA

W.H. Batchelder and A. Kimball Romney	229
<i>New results in test theory without an answer key</i>	
M.A. García-Pérez	249
<i>Item sampling, guessing, partial information and decision-making in achievement testing</i>	
L. van Maanen, P.H. Been, and K. Sijtsma	267
<i>The linear logistic test model and heterogeneity of cognitive strategies</i>	
B. Orth	289
<i>Testable conditions for the existence of a qualitative J-scale in unfolding</i>	
B.Orth	299
<i>Graph theoretical representations of proximities by monotonic network analysis (MONA)</i>	
R.A.W. Van Blokland-Vogelansang	309
<i>Midpoint sequences, intransitive J scales, and scale values in unidimensional unfolding</i>	
P. Theuns	329
<i>Predicting an optimal threshold in Boolean analysis of questionnaires</i>	
M.B. Gassner	345
<i>An impossibility theorem for fair bidimensional representation: towards a biproportional solution</i>	
X. Hubaut	367
<i>Thresholds and independence in proportional representation</i>	
Subject index	375
Author index	381
