Series Preface	v
Preface	vii
Contributors	xiii

Mathematical and Statistical Methods

Chapter 1	Structural Measurement Theory and Cognitive Development	1
	<i>Charles J. Brainerd</i>	
Chapter 2	The New Two-Stage Model of Learning: A Tool for Analyzing the Loci of Memory Differences in Intellectually Impaired Children	38
	<i>Johannes Kingma</i>	
Chapter 3	Learning a Cognitive Skill and Its Components	86
	<i>Alex Cherry Wilkinson and Beth A. Haines</i>	
Chapter 4	Formal Representation of Qualitative and Quantitative Reversible Operations	115
	<i>Colleen F. Surber</i>	
Chapter 5	Implicit Theories: An Alternative to Modeling Cognition and Its Development	155
	<i>Robert J. Sternberg</i>	
Chapter 6	Modeling X-Linked Mediated Development: Development of Sex Differences in the Service of a Simple Model	193
	<i>Hoben Thomas</i>	

Chapter 7	Geometric Methods in Developmental Research.....	216
	<i>Kevin F. Miller</i>	
Computer Simulation Methods		
Chapter 8	Computer Simulation, Cognition, and Development: An Introduction	263
	<i>F. Michael Rabinowitz, Malcolm J. Grant, and H. Louis Dingley</i>	
Chapter 9	Children's Knowledge of Simple Arithmetic: A Developmental Model and Simulation	302
	<i>Mark H. Ashcraft</i>	
Chapter 10	Mechanisms of Visual Development: An Example of Computational Models	339
	<i>Martin S. Banks</i>	
Chapter 11	Monte Carlo Simulation as a Method of Identifying Properties of Behavioral Organization.....	372
	<i>C. Donald Heth and Edward H. Cornell</i>	
	Index	399
