<b>Foreword</b>	<i>Walter J. Freeman</i>	<b>ix</b>
<b>PART I: INTRODUCTION TO CHAOS THEORY</b>		<b>1</b>
<b>1. Chaos Theory and the Relationship Between Psychology and Science</b>		<b>3</b>
	<i>Robin Robertson</i>	
<b>2. Chaos, Evolution, and Deep Ecology</b>		<b>17</b>
	<i>Sally Goerner</i>	
<b>3. The Tower of Babel in Nonlinear Dynamics: Toward the Clarification of Terms</b>		<b>39</b>
	<i>Jeffrey Goldstein</i>	
<b>PART II: RESEARCH METHODS AND CHAOS THEORY</b>		<b>49</b>
<b>4. The Nostril Cycle: A Study in the Methodology of Chaos Science</b>		<b>51</b>
	<i>Allan Combs and Michael Winkler</i>	
<b>5. Constraint, Complexity, and Chaos: A Methodological Follow-Up on the Nostril Cycle</b>		<b>61</b>
	<i>Tracy L. Brown and Allan Combs</i>	

<b>6. Anger, Fear, Depression, and Crime: Physiological and Psychological Studies Using the Process Method</b>	<b>65</b>
<i>Hector C. Sabelli, Linnea Carlson-Sabelli, M. Patel, A. Levy, and Justo Diez-Martin</i>	
<b>7. Is There Evidence for Chaos in the Human Central Nervous System?</b>	<b>89</b>
<i>Paul E. Rapp</i>	
<b>PART III: COGNITION AND CHAOS THEORY</b>	<b>101</b>
<b>8. Naturally Occurring Computational Systems</b>	<b>103</b>
<i>William Sulis</i>	
<b>9. Belief Systems as Attractors</b>	<b>123</b>
<i>Ben Goertzel</i>	
<b>10. A Cognitive Law of Motion</b>	<b>135</b>
<i>Ben Goertzel</i>	
<b>11. Dynamics, Bifurcation, Self-Organization, Chaos, Mind, Conflict, Insensitivity to Initial Conditions, Time, Unification, Diversity, Free Will, and Social Responsibility</b>	<b>155</b>
<i>Frederick David Abraham</i>	
<b>PART IV: EDUCATION, SOCIAL SCIENCE, AND CHAOS THEORY</b>	<b>175</b>
<b>12. Chaos, Creativity, and Innovation: Toward a Dynamical Model of Problem Solving</b>	<b>179</b>
<i>Carlos Antonio Torre</i>	
<b>13. Fractals and Path-Dependent Processes: A Theoretical Approach for Characterizing Emergency Medical Responses to Major Disasters</b>	<b>199</b>
<i>Gus Koehler</i>	
<b>14. Chaos Theory and Social Dynamics: Foundations of Postmodern Social Science</b>	<b>217</b>
<i>T. R. Young</i>	

<b>PART V: PSYCHOTHERAPY AND CHAOS THEORY</b>	<b>235</b>
<b>15. Unbalancing Psychoanalytic Theory: Moving Beyond the Equilibrium Model of Freud's Thought</b> <i>Jeffrey Goldstein</i>	<b>239</b>
<b>16. Chaotic Phenomena in Psychophysiological Self-Regulation</b> <i>Stephen E. Francis</i>	<b>253</b>
<b>17. Strange Attractors in Patterns of Family Interaction</b> <i>Linda Chamberlain</i>	<b>267</b>
<b>18. The Fractal Geometry of Human Nature</b> <i>Terry Marks-Tarlow</i>	<b>275</b>
<b>19. The Princess and the Swineherd: Applications of Chaos Theory to Psychodynamics</b> <i>Isla E. Lonie</i>	<b>285</b>
<b>20. Regression as Chaotic Uncertainty and Transformation</b> <i>Phyllis Ann Perna</i>	<b>295</b>
<b>PART VI: PHILOSOPHY AND CHAOS THEORY</b>	<b>305</b>
<b>21. Chaos, Psychology, and Spirituality</b> <i>Peter Ainslie</i>	<b>309</b>
<b>22. Cross-Cultural Chaos</b> <i>Michael R. Bütz, Eduardo Duran, and Benjamin R. Tong</i>	<b>319</b>
<b>23. Emergence in Neurological Positivism and the Algorithm of Number in Analytical Psychology</b> <i>Michael R. Bütz</i>	<b>331</b>
<b>24. How Predictable Is the Future: The Conflict Between Traditional Chaos Theory and the Psychology of Prediction, and the Challenge for Chaos Psychology</b> <i>David Loye</i>	<b>345</b>
<b>25. Chaos: The Geometrization of Thought</b> <i>F. David Peat</i>	<b>359</b>
