PREFACE TO THE FIRST EDITION	iii
PREFACE TO THE SECOND EDITION	v
TO THE STUDENT	vi
INTRODUCTION	vii
CHAPTER	
I. THE NATURE OF THE PSYCHOLOGICAL EXPERIMENT	3
1. LATIN	3
2. MATHEMATICS	5
3. ROD DIVINING	10
4. MIND READING	14
5. EXTRA-SENSORY PERCEPTION	17
6. RED AND ANGER	22
7. BLOOD AND EXCITEMENT IN CATTLE	24
II. PHRENOLOGY, PHYSIOGNOMY, GRAPHOLOGY, AND CHARACTER ANALYSIS	28
1. PHRENOLOGY	28
2. PHYSIOGNOMY	31
3. BLOND AND BRUNET TRAITS	33
4. GRAPHOLOGY	36
III. APTITUDES	40
1. CLERICAL APTITUDE	41
2. INDIVIDUAL DIAGNOSIS	47
3. ACHIEVEMENT AND APTITUDE	51
4. ARTISTIC ABILITIES	58
IV. INHERITANCE	62
1. ANIMAL EXPERIMENTS	63
2. THE WILD BOY OF AVEYRON	67
3. THE APE AND THE CHILD	68

	PAGE
V. MATURATION AND GROWTH	83
1. EXPERIMENTS WITH FROGS AND SALAMANDERS	83
2. GRASPING AND CREEPING	93
3. HOPI CHILDREN	96
4. NURSERY SCHOOL CHILDREN	97
5. IDENTICAL TWINS	101
6. PERMANENCE OF ADVANTAGE	105
VI. INTELLIGENCE	109
1. BINET'S CONTRIBUTION	109
2. THE I.Q.	113
3. TERMAN'S CONTRIBUTION	115
4. THE 1937 REVISION	118
5. THE EFFECTS OF PRACTICE ON TEST SCORES	120
VII. THE MEANING OF INTELLIGENCE TEST SCORES	124
1. LACK OF OPPORTUNITY	124
2. CITY LIFE	128
3. ISOLATED LIFE	129
4. PRIMITIVE PEOPLE	133
5. THE FEEBLE-MINDED	135
6. TRAINING THE FEEBLE-MINDED	142
VIII. PHYSIOLOGICAL CONDITIONS	144
1. THE EFFECTS OF TOBACCO	146
2. THE EFFECTS OF ALCOHOL	157
3. HIGH ALTITUDES	165
4. DISEASED TONSILS AND ADENOIDS	169
IX. DRIVES AND MOTIVES	172
1. PHYSIOLOGICAL DRIVES	174
2. HUNGER DRIVE AND RATE OF LEARNING	180
3. INCENTIVE AND LEARNING IN RATS	181
4. CHANGE OF INCENTIVE	182
5. SUBSTITUTE INCENTIVES	183
X. MOTIVES AND INCENTIVES	188
1. MOTIVATION IN SCHOOL	188
2. BONUSES	191
3. INCREASING THE INCENTIVE	193
4. PUNISHMENT AND KNOWLEDGE OF RESULTS	196

CONTENTS

CHAPTER

xi

PAGE

5. PRAISE AND REPROOF	198
6. HABITS OF WORK AS MOTIVATORS	201
7. INDUSTRIAL MOTIVATION	205
XI. FRUSTRATION	210
1. EXPERIMENTAL NEUROSIS	211
2. NEUROSIS IN ADULTS	213
3. THE PREDICTION OF BREAKDOWN	216
4. REGRESSION	224
XII. THE DEVELOPMENT OF EMOTIONAL BEHAVIOR	233
1. FEAR OF SNAKES	233
2. CHILDREN'S FEARS	235
3. ELIMINATION OF CHILDREN'S FEARS	243
4. ANGER	247
XIII. EMOTION IN ADULTS	256
1. DR. RITTER'S REPORT	256
2. A LABORATORY EXPERIMENT	260
3. LIE DETECTION	262
4. GALVANIC SKIN RESPONSES	264
5. EMOTION AND THE MOVIES	269
XIV. SUGGESTIBILITY AND HYPNOSIS	274
1. SUGGESTIBILITY	274
2. SLEEP AND HYPNOSIS	280
3. AMNESIA	284
4. RAPPORT	287
5. POSTHYPNOTIC SUGGESTION	292
6. ANESTHESIA	296
XV. PERCEPTUAL BEHAVIOR	303
1. STRATTON'S EXPERIMENT	303
2. AUDITORY REVERSAL	309
XVI. CONDITIONING	314
1. PAVLOV'S DISCOVERY	314
2. TIME RELATIONS	317
3. SENSORY PRECONDITIONING	319
4. SUBSTITUTE RESPONSES?	323

CHAPTER	PAGE
XVII. LEARNING	325
1. KNOWLEDGE OF RESULTS	325
2. PRACTICE	327
3. FREQUENCY AND RECENCY	329
4. PRACTICE IN ERROR	333
5. BELONGING	335
6. MOTIVATION AND LEARNING	337
7. GUIDANCE	339
8. A PRACTICAL APPLICATION	342
XVIII. REMEMBERING	350
1. RELATIVITY OF REMEMBERING	350
2. PRACTICAL APPLICATION	353
3. REMINISCENCE	359
4. BURTT'S EXPERIMENT	362
5. MOTOR SKILLS REMEMBERED LONGER?	365
6. THE TRANSFER OF TRAINING	368
XIX. REASONING	377
1. RUGER'S STUDY	378
2. DEWEY'S CONTRIBUTION	379
3. MAIER'S EXPERIMENT	383
4. KÖHLER'S EXPERIMENTS	388
XX. LEARNING, THINKING, IMAGINING, DREAMING, AND THE BRAIN	396
1. BEHAVIOR STUDIES WITH RATS	397
2. CLINICAL OBSERVATIONS ON HUMAN BEINGS	402
3. THINKING	404
4. DEAF-MUTES	407
5. "BRAIN WAVES"	409
SUMMARY	414
1. STRUCTURE	416
2. ENVIRONMENT	419
3. BEHAVIORAL HISTORY	420
4. PERSONALITY	421
INDEX OF AUTHORS	427
INDEX OF SUBJECTS	430

LIST OF FIGURES

FIGURE	PAGE
1. The difference between the median grades of high school students who are taking Latin and those who are not	4
2. A phrenological chart	29
3. A section through a thick-walled skull on the left; a thin-walled skull on the right	30
4. Tests: Minnesota Rate of Manipulation; O'Connor Finger Dexterity; O'Connor Tweezer Dexterity	44
5. Profiles of different occupational groups	48
6. The profile of an individual student	49
7. The relation between premedical grades and success in medical school	54
8. The relation between medical aptitude scores and success in medical school	55
9. Medical aptitude and rating of success as an intern	56
10. The errors that rats made on a standard maze through eight generations of selective breeding	65
11. Average number of bladder errors per day for the ape and the child	77
12. The chimpanzee grasps a bulky object like a ball	78
13. In a few instances Gua picked up small round objects like beans	79
14. Nonmotile stage	89
15. Early flexure	89
16. Coil	89
17. S-stage	90

FIGURE	PAGE
18. Figure to explain bending	91
19. Showing the growth of proprioceptive collaterals in the motor pathway	92
20. Results in delayed vocabulary experiment	103
21. The same results, but the beginning of the training for each child is taken at the origin	103
22. The child rolls the steel ball through a pathway between posts	104
23. The three pathways	105
24. The results for the easiest and the hardest problem	107
25. Three successive testings of the same population	121
26. A comparison between urban and rural children in intelligence test score	127
27. The relation between intelligence test score and length of residence in the city	128
28. The road to Briarsville. The road to Needles Hollow	130
29. A Colvin Hollow group. A group of Briarsville children	131
30. One boy's solution to the "ball and field problem"	131
31. A drawing of the experimental pipe	147
32. The heart rate curve	148
33. The effect of tobacco on tremor	151
34. The effect of tobacco on the speed of adding	152
35. Five of the geometric characters used in the experiment	153
36. The effect of tobacco on learning names	155
37. The effect of alcohol in small and large doses	162
38. The effect of alcohol on the speed of adding	163
39. Handwriting samples under various degrees of anoxemia	168
40. Distribution curve for intelligence of children	170
41. Plan of Warden's apparatus	177

LIST OF FIGURES

<small>FIGURE</small>	<small>XV</small> <small>PAGE</small>
42. The average number of times rats will cross the grill in twenty minutes	178
43. Error records of rats running a maze	181
44. Effect of change of reward on maze performance	183
45. The effect of motivation on addition	189
46. The effect of motivation on substitution	189
47. Theoretical learning curves showing the physiological limit	191
48. Increase in production under a bonus system	192
49. Production under a constantly increasing incentive	195
50. The effect of motivation on reaction time	197
51. The effect of motivation in schoolwork	200
52. A tracing from one of Blatz's figures	261
53. A single galvanometric deflection	265
54. Emotional response to certain words	268
55. The arrangement of the apparatus and the subject in Bass's experiment	280
56. A sample of the record obtained	282
57. The amplitude of the patellar reflexes in sleeping, waking, and hypnosis	283
58. Learning curves for addition: hypnotized and control groups	286
59. The lower curve of Figure 58 is moved up to adjust for the difference in initial ability	286
60. The duration of posthypnotic suggestion	294
61. Comparison between number of errors of identification made by hypnotized and nonhypnotized subjects	299
62. A tracing of one of Levine's galvanic records	300
63. Relation between interval separating stimuli and frequency of conditioned responses established	318
64. The effect of knowledge of results on performance	326

FIGURE	PAGE
65. Percentage retained measured in five different ways	352
66. Retention curves showing reminiscence	360
67. A group of retention curves showing both reminiscence and obliviscence	362
68. The reconstruction of an extensive injury to the occipital, or visual area	400
69. The reconstruction of an injury confined to the temporal, or auditory regions	400
70. The relation between the per cent of destruction and the number of errors	401
71. Electromyographic responses during imagining	406
72. Electromyographic responses of the deaf	407
