LIST OF FIGURES AND TABLES . . . . .	XIII
CHAPTER 1: INTRODUCTION . . . . .	17
1.1 Background: Web Information System Reengineering . . . . .	17
1.2 Problem Definition . . . . .	18
1.3 Our Data-oriented Reengineering Approach . . . . .	18
1.4 Dissertation Outline . . . . .	21
CHAPTER 2: DATA-ORIENTED REENGINEERING: A CASE STUDY . . . . .	23
2.1 An Health Care Web Information System . . . . .	24
2.1.1 The Legacy (Web) Information System . . . . .	24
2.1.2 The Considered Target Web Information System . . . . .	25
2.2 The Data-oriented Reengineering process . . . . .	27
2.2.1 Understanding Phase . . . . .	27
2.2.2 Adapting Phase . . . . .	30
2.2.3 Model Maintenance . . . . .	33
CHAPTER 3: DATA-ORIENTED REVERSE ENGINEERING . . . . .	37
3.1 Reverse Engineering Data Components . . . . .	37
3.1.1 Reverse Engineering Steps . . . . .	38
3.1.2 Relationships and Data Dependencies . . . . .	40
3.1.3 Model Representation . . . . .	45
3.2 Data Model Recovery . . . . .	49
3.2.1 Schema Recovery . . . . .	49
3.2.2 Retrieval of Hidden Schema Parts . . . . .	50
3.2.3 Schema Mapping . . . . .	53
3.2.4 Conceptual Schema Refactoring . . . . .	63

3.3	Relationship Retrieval . . . . .	66
3.3.1	Code Fragment Extraction and Parsing . . . . .	67
3.3.2	Pattern Definition . . . . .	73
3.3.3	Pattern Instance Retrieval . . . . .	79
3.3.4	Handling Uncertainty using Fuzzy Beliefs . . . . .	85
3.4	Tool Support . . . . .	92
3.5	Related Work . . . . .	96
3.6	Summary and Future Work . . . . .	99
CHAPTER 4: DATA COMPONENT EXTENSION . . . . .		101
4.1	Extension Approach . . . . .	101
4.2	Data Component Clustering and Classification . . . . .	103
4.2.1	Data Component Clustering . . . . .	103
4.2.2	Clustering Strategies . . . . .	107
4.2.3	Data Component Classification . . . . .	110
4.3	Architectural Patterns for Data Mediation . . . . .	111
4.3.1	Architectural Pattern: Data Portal . . . . .	113
4.3.2	Architectural Pattern: Data Fusion . . . . .	116
4.3.3	Architectural Pattern: Data Transducer . . . . .	119
4.3.4	Architectural Pattern: Data Connection . . . . .	121
4.3.5	Architectural Pattern Application Examples . . . . .	124
4.4	Access Layer Generation and Model Execution . . . . .	126
4.4.1	Transactional Access Layer . . . . .	126
4.4.2	Mediation Layer . . . . .	129
4.4.3	Publishing Layer . . . . .	131
4.4.4	Multimedia extension . . . . .	134
4.5	Tool Support . . . . .	135
4.6	Related Work . . . . .	140
4.7	Summary and Future Work . . . . .	142

CHAPTER 5: MODEL CONSISTENCY MANAGEMENT . . . . .	143
5.1 Data Component Model Consistency Maintenance . . . . .	143
5.2 Graph-based History Mechanism . . . . .	145
5.2.1 Background: History Graph Mechanism. . . . .	145
5.2.2 Simple Undo History Graph Mechanism . . . . .	152
5.2.3 Selective Undo History Graph Mechanism. . . . .	158
5.2.4 Composed History Graph Mechanism . . . . .	163
5.3 Tool Support . . . . .	168
5.4 Related work. . . . .	170
5.5 Summary and Future Work. . . . .	172
CHAPTER 6: CONCLUSIONS . . . . .	173
6.1 Summary. . . . .	173
6.2 Transferability of Results . . . . .	175
6.3 Open Problems . . . . .	176
6.4 Future Directions . . . . .	176
REFERENCES . . . . .	179
Chapter 1: Introduction. . . . .	179
Chapter 2: Data-oriented Reengineering: A Case Study . . . . .	183
Chapter 3: Data-Oriented Reverse Engineering. . . . .	186
Chapter 4: Data Component Extension . . . . .	197

## CHAPTER 1: INTRODUCTION

Figure 1.1: Data-oriented Reengineering process.....	20
--	----

## CHAPTER 2: DATA-ORIENTED REENGINEERING: A CASE STUDY

Figure 2.1 Health Care Web Information System: Considered Target System .....	26
Figure 2.2: Case study understanding phase.....	28
Figure 2.3: Parsed data models overview .....	28
Figure 2.4: Table clone example.....	29
Figure 2.5: Palliative care conceptual schema excerpt in UML .....	30
Figure 2.6: Case study adapting phase.....	31
Figure 2.7: Clustering example.....	32
Figure 2.8: New data components integration examples.....	32
Figure 2.9: : Case study administrating phase .....	33
Figure 2.10: Consistency violation example.....	34

## CHAPTER 3: DATA-ORIENTED REVERSE ENGINEERING

Figure 3.1: Web information system understanding .....	38
Figure 3.2: Data Component Reverse Engineering - Overview .....	39
Figure 3.3: Relationships and Data Dependencies Overview.....	41
Figure 3.4: Conceptual schema view (relationships).....	46
Figure 3.5: Physical aspect view as package diagram .....	47
Figure 3.6: Conceptual schema view example .....	48
Figure 3.7: Variant and optimisation structure example .....	51
Figure 3.8: Patient variant example .....	52
Figure 3.9: Optimisation structure example .....	53
Figure 3.10: Triple-graph-grammar fundamental idea example.....	53
Figure 3.11: Schema mapping graph model .....	56
Figure 3.12: MapEntityToClass mapping rule.....	58
Figure 3.13: MapEntityToClass relating rule (story diagram).....	59

Figure 3.14: MapEntityToClass forward rule (story pattern) .....	60
Figure 3.15: MapEntityToClass reverse rule (story pattern) .....	60
Table 3.1: Mapping Rule Overview .....	61
Figure 3.16: Mapping rule features in the MapAttrToAttr rule .....	62
Figure 3.17: Graphical constraint with story diagram .....	62
Figure 3.18: moveAttribute refactoring operation .....	63
Figure 3.19: splitClass refactoring operation .....	64
Table 3.2: Refactoring operation overview .....	65
Figure 3.20: Extracting code fragments of interest .....	68
Figure 3.21: Code fragment of interest .....	70
Figure 3.22: sliced code fragment of interest .....	71
Figure 3.23: Type Graph Model .....	73
Figure 3.24: Simplified annotated abstract syntax graph instance .....	74
Figure 3.25: IND pattern definition .....	75
Figure 3.26: Sample IND code and annotated abstract syntax graph .....	76
Figure 3.27: IND annotations .....	76
Figure 3.28: R-IND pattern definition .....	77
Figure 3.29: Association code example and pattern definition .....	78
Figure 3.30: Replication code example and pattern definition .....	79
Figure 3.31: Duplication pattern definition .....	81
Figure 3.32: Sample analysis execution .....	82
Figure 3.33: Retrieval process statechart .....	85
Figure 3.34: Code samples for duplication .....	86
Figure 3.35: Alternative duplication pattern definitions .....	87
Figure 3.36: Imprecise duplication and insert pattern definitions .....	88
Figure 3.37: Sample analysis execution with fuzzy values .....	89
Figure 3.38: Annotated conceptual view .....	91
Figure 3.39: Conceptual schema view (data dependencies) .....	91
Figure 3.40: Architecture of the REDDMOM reverse engineering tools .....	93
Figure 3.41: SplitClass composed transformation example .....	94

## CHAPTER 4: DATA COMPONENT EXTENSION

Figure 4.1: Web information system adaption .....	101
---	-----

Figure 4.2: Data Component Extension: Overview.....	102
Figure 4.3: Sample of the palliative care conceptual schema.....	105
Figure 4.4: Clustered palliative care conceptual schema: sample 1 .....	106
Figure 4.5: Clustered palliative care conceptual schema: sample 2 .....	106
Figure 4.6: Schema Integration.....	108
Figure 4.7: Application Integration .....	108
Table 4.1: Relationship Weighting for Clustering .....	109
Figure 4.8: Architectural patterns: overview .....	112
Figure 4.9: Data Portal Pattern use .....	113
Figure 4.10: Structure of the Data Portal Pattern.....	114
Figure 4.11: Participant View of the Data Portal Pattern.....	115
Figure 4.12: Data Portal Pattern sample .....	116
Figure 4.13: Data Fusion Pattern use.....	117
Figure 4.14: Structure of the Data Fusion Pattern .....	117
Figure 4.15: Data Fusion Pattern sample.....	118
Figure 4.16: Data Transducer Pattern use.....	119
Figure 4.17: Structure of the Data Transducer Pattern .....	120
Figure 4.18: Data Transducer Pattern sample.....	121
Figure 4.19: Data Connection Pattern use .....	122
Figure 4.20: Structure of the Data Connection Pattern.....	123
Figure 4.21: Architectural pattern application examples.....	125
Figure 4.22: Modelled and generated layers.....	126
Figure 4.23: Access layer generator overview.....	127
Figure 4.24: ACID transaction related patterns [Gra99] .....	127
Figure 4.25: Transactional access layer generator overview .....	128
Figure 4.26: Examples of links between different object kinds .....	130
Figure 4.27: Examples of a <<search>> link.....	130
Figure 4.28: Sample Data Fusion pattern modelled with a story diagram .....	131
Figure 4.29: Abstract syntax graph publishing .....	132
Figure 4.30: Sample publishing layer: web portal.....	132
Figure 4.31: Sample publishing layers for a data transducer.....	133
Figure 4.32: Architecture of the <i>Reddmom</i> extension tools.....	135
Figure 4.33: Design transformations pushAttribute and generalise .....	136

Table 4.2: (Re)Design Transformations .....	136
Figure 4.34: Pattern Editor: pattern instantiation example .....	138
<b>CHAPTER 5: MODEL CONSISTENCY MANAGEMENT</b>	
Figure 5.1: Web information system model maintenance .....	143
Figure 5.2: Model Consistency Management: Overview.....	145
Figure 5.3: History (GXL) Graph model .....	147
Figure 5.4: Graph production splitClass .....	148
Figure 5.5: Template of History Graph Transformation .....	148
Figure 5.6: History Graph Transformation splitClass .....	149
Figure 5.7: Application of production splitClass .....	149
Figure 5.8: Basic structure of a History Graph .....	151
Figure 5.9: Sample History Graph .....	152
Figure 5.10: Interaction with the History Graph Mechanism .....	153
Figure 5.11: Undo History Graph Mechanism .....	155
Figure 5.12: Determine affected transformations.....	156
Figure 5.13: Affected History Graph: simple undo.....	157
Figure 5.14: Updated History Graph: simple undo .....	157
Figure 5.15: Reevaluate transformations .....	159
Figure 5.16: History Graph: directly affected transformations .....	161
Figure 5.17: History Graph: indirectly affected transformations .....	161
Figure 5.18: History Graph: reevaluated transformations.....	162
Figure 5.19: Composed History Graph: overview .....	164
Figure 5.20: Composed History Graph: reevaluation .....	165
Figure 5.21: History Graph Sequence Example.....	166
Figure 5.22: Reevaluation of HG II.a.....	167
Figure 5.23: Reevaluation of HG III.a .....	167
Figure 5.24: Reevaluation of HG IV.....	168
Figure 5.25: Architecture of the History Graph Mechanism tool support .....	169
<b>CHAPTER 6: CONCLUSIONS</b>	
Figure 6.1 Tool Support for the Data-oriented Reengineering process.....	174
