<b>Introduction</b>	<b>ix</b>
<b>I Whitehead's Process Philosophy</b>	<b>1</b>
<b>1 Actuality</b>	<b>3</b>
1.1 The self-creative processes of concrescence . . . . .	4
1.1.1 Concrescence as creative process . . . . .	7
1.1.2 Concrescence as non-spatiotemporal process . . . . .	9
1.1.3 Genetical supersession . . . . .	10
1.2 A comment on the "birth-date" of occasions . . . . .	13
1.3 The world-process . . . . .	14
1.3.1 Actual worlds . . . . .	16
1.3.2 A comment on the concept of evolvment and the open- ness of the future . . . . .	22
<b>2 Potentiality's interplay with actuality</b>	<b>25</b>
2.1 The extensive continuum . . . . .	28
2.2 Eternal objects . . . . .	34
2.2.1 Ingression and the two species of eternal objects . . . . .	37
2.2.2 Simple and complex eternal objects . . . . .	40
2.2.3 Comparison with two other theories of universals . . . . .	45
2.2.4 The compatibility of eternal objects . . . . .	47
2.2.5 Abstractive hierachies . . . . .	49
2.2.6 Functioning of eternal objects in the constitution of oc- casions . . . . .	52

2.3	The underlying activity . . . . .	55
2.3.1	The limited and individualized activity of a concrecence process . . . . .	58
2.3.2	The individuality of occasions . . . . .	63
2.3.3	The envisaging property of the underlying activity . . . .	64
2.3.4	The objective immortality of occasions . . . . .	66
2.4	Other-creating processes of transition . . . . .	70
2.4.1	The dative phase of a transition process . . . . .	70
2.4.2	The conformal phase of a transition process . . . . .	73
2.4.3	Transition as deterministic causal process . . . . .	75
2.4.4	Transition as non-spatiotemporal process . . . . .	80
2.5	Two problems of Whitehead's ontology . . . . .	80
2.5.1	The first problem . . . . .	81
2.5.2	The second problem . . . . .	82
2.5.3	A resolution for both problems . . . . .	83
2.6	Bifurcating activities and Whitehead's ontology . . . . .	88
2.6.1	Consequences for the individuality of occasions . . . . .	88
2.6.2	The creative character of a bifurcating activity . . . . .	90
2.6.3	Bifurcating activities and efficient causation . . . . .	91
2.7	Order of envisagement and expansion . . . . .	94
2.7.1	The order of envisagement and the causal expansion of the world . . . . .	95
2.7.2	The spatiotemporal expansion of the world . . . . .	99
2.8	On the compatibility with STR . . . . .	106
2.8.1	Superluminal causation . . . . .	106
2.8.2	Distinguished foliation of spacetime . . . . .	111
<b>3</b>	<b>A first comparison with quantum physics</b>	<b>115</b>
3.1	Discrete events . . . . .	115
3.2	Autonomous decisions . . . . .	117
3.3	Atomicity of actualization . . . . .	118

<b>II Algebraic Quantum Field Theory</b>	<b>121</b>
<b>4 The role of the algebraic approach</b>	<b>123</b>
4.1 The Lagrangian approach . . . . .	124
4.2 The axiomatic approach . . . . .	125
4.3 The algebraic approach . . . . .	127
<b>5 AQFT and its physical interpretation</b>	<b>129</b>
5.1 Local observables . . . . .	130
5.2 States and probabilities . . . . .	133
5.3 Further important axioms of AQFT . . . . .	138
<b>III The Connection</b>	<b>145</b>
<b>6 The extensive continuum</b>	<b>147</b>
<b>7 Objective eternal objects</b>	<b>153</b>
<b>8 Subjective and mixed eternal objects</b>	<b>155</b>
8.1 Properties in quantum physics . . . . .	156
8.1.1 From classical to quantum properties . . . . .	156
8.1.2 Consequences of non-commutativity . . . . .	161
8.1.3 Against negative properties . . . . .	165
8.1.4 On conjunctive and disjunctive properties . . . . .	167
8.1.5 Probabilities for quantum properties . . . . .	169
8.1.6 Definite, indefinite and possible quantum properties . . .	172
8.1.7 Quantum properties as universals? . . . . .	181
8.2 “Indirect” representation of eternal objects . . . . .	185
8.3 No simple properties in QFT . . . . .	193
8.3.1 Consequences for subjective eternal objects . . . . .	196
8.3.2 Consequences for abstractive hierachies . . . . .	198
8.3.3 Against conjunctive subjective eternal objects . . . . .	200
8.3.4 Simple decisions revisited . . . . .	201
8.4 The representation of abstractive hierachies . . . . .	202

<b>9</b>	<b>The underlying activity's manifestations</b>	<b>209</b>
9.1	The underlying activity itself . . . . .	209
9.2	Its manifestation at some stage . . . . .	213
9.3	Reinterpreting probability statements . . . . .	216
<b>10</b>	<b>Representing transition processes</b>	<b>219</b>
10.1	The dative phase I . . . . .	219
10.2	Bell's theorem, non-separability, and all that . . . . .	227
10.2.1	The EPR-experiment . . . . .	227
10.2.2	Bell's theorem . . . . .	231
10.2.3	Analyzing the factorizability condition . . . . .	232
10.2.4	Non-separability in QM . . . . .	242
10.2.5	Non-separability in AQFT . . . . .	245
10.3	The dative phase II . . . . .	250
10.4	The conformal phase . . . . .	253
<b>11</b>	<b>Representing concrescence processes</b>	<b>263</b>
11.1	Hierachies and activities . . . . .	263
11.2	The degree of divisibility of activities . . . . .	269
11.3	The degree of individuality of occasions . . . . .	272
<b>12</b>	<b>Summing up</b>	<b>277</b>
<b>A</b>	<b>Lattices and Boolean algebras</b>	<b>281</b>
<b>B</b>	<b>Operator algebras on Hilbert spaces</b>	<b>285</b>
B.1	Hilbert spaces . . . . .	285
B.2	Bounded operators . . . . .	289
B.3	Algebras of bounded operators . . . . .	295
<b>C</b>	<b>The standard axioms of AQFT</b>	<b>301</b>
C.1	Local observables . . . . .	301
C.2	States and probabilities . . . . .	304
C.3	The further axioms of AQFT . . . . .	307
