<i>List of illustrations</i>	vii
<i>List of contributors</i>	ix
<i>Preface</i>	xi
1 An introduction to the science of consciousness	1
<i>Max Velmans</i>	
2 Perception without awareness of what is perceived, learning without awareness of what is learned	23
<i>John F. Kihlstrom</i>	
3 On consciousness in relation to memory and learning	47
<i>John M. Gardiner</i>	
4 Cognitive views of consciousness	63
What are the facts? How can we explain them?	
<i>Bernard J. Baars and Katharine McGovern</i>	
5 Neural processes in the production of conscious experience	96
<i>Benjamin Libet</i>	
6 Dissociable aspects of consciousness	118
<i>Andrew W. Young</i>	
7 Somatic consequences of consciousness	140
<i>Anees A. Sheikh, Robert G. Kunzendorf and Katharina S. Sheikh</i>	
8 The placebo effect	162
<i>Patrick D. Wall</i>	
9 What and where are conscious experiences?	181
<i>Max Velmans</i>	
<i>Name index</i>	197
<i>Subject index</i>	201

Illustrations

FIGURES

4.1	Schacter's Dissociable Interactions and Conscious Experience (DICE) model	80
4.2	Schallice's Information Processing Model of Consciousness	82
4.3	The global workspace architecture	84
4.4	Rough equivalences between the basic concepts of GW theory and other widespread terms	86
4.5	Multiple contextual constraints on utterances	88
5.1	Temporal requirement for stimulation of the somatosensory (SI) cortex in human subjects	106
5.2	Diagram of an experiment on the subjective time order of two sensory experiences	108
5.3	Diagram of hypothesis for subjective referral of sensory experience backwards in time	110
5.4	Diagram of sequence of events, cerebral and subjective, that precede a fully self-initiated voluntary act	113
9.1	A stereoscopic picture of 'snowflakes'	190
9.2	A reflexive model of the causal sequence in visual perception	193

TABLES

4.1	Contrastive evidence in perception and imagery	69
4.2	Contrasting capabilities of conscious and unconscious processes	71
