

CONTENTS

Preface v

Chapter 1 Introduction, 1

PART ONE FOUNDATIONS, 5

Chapter 2 Neurons, 7

Structure, 7

Classification of Neurons, 11

Staining Neurons, 11

Physiology of Neurons, 12

Inhibition, 18

Functional Characteristics of Neurons, 19

Summary, 20

Chapter 3 Gross Neuroanatomy, 21

Common Anatomical Terms, 21

Development of the Vertebrate Nervous System, 23

General Anatomy of the Human Brain, 27

Spinal Cord, 32

The Peripheral Nervous System, 33

Summary, 38

Chapter 4 Research Techniques in Physiological Psychology, 40

Lesions, 40

Stimulation, 44

Recording from the Brain, 48

Summary, 54

PART TWO MOTOR MECHANISMS, 57

Chapter 5 The Spinal Motor System, 59

Recurrent Collateral Inhibition, 68

Fields of Neurons, 69

Electrophysiology of the Spinal Cord, 71

Reflex Activity, 75

Summary, 79

Chapter 6 Central Motor Mechanisms, 82

The Pyramidal System, 82

The Extrapyrarnidal System, 88

Autonomic Responses and Activation, 98

Summary, 99

PART THREE SENSORY SYSTEMS, 103

Chapter 7 The Cortex, 107

Fine Anatomy of the Cortex, 112

Cortical Conduction, 114

Theories of Cortical Functioning, 117

Summary, 118

Chapter 8 Receptors, 120

Types of Receptors, 120

Adaptation in Receptors, 123

Information Coding by Receptors, 123

Summary, 128

Chapter 9 Taste and Smell, 130

Taste, 130

Smell, 137

Summary, 146

Chapter 10 The Somatosensory Systems, 147

Pathways of the Somatosensory System, 149

The Problem of "Local Sign," 155

Kinesthesia, 161

Temperature Sense, 162

Pain, 163

Stimulation Experiments, 167

Cortical Mechanisms of Somesthesia, 169

Summary, 174

Chapter 11 The Visual System, 177

The Structure of the Human Eye, 177

Visual Receptors, 180

Duality of the Human Visual System, 181

Functioning of Visual Receptors, 183

Neural Activity in the Retina, 183

Retinal Mechanisms of Color Vision, 184

Retinal Coding of Information on Form, 187

More Complex Information Processing in the Retina, 190

The Central Visual System, 192

Lesions of the Visual Cortex, 197

Lesions of the Nonstriate Visual Cortex, 201

Summary, 207

Chapter 12 The Vestibular and Auditory Systems, 209

The Vestibular System, 209

The Auditory System, 217

Summary, 240

Chapter 13 Language and Cerebral Dominance, 243

Transmission and Reception of Speech, 244

Language Disturbances Resulting from Brain Lesions, 247

Cerebral Dominance and Handedness, 252

Summary, 257

PART FOUR ALERTING MECHANISMS, 259

Chapter 14 Sleep and Arousal, 261

Early Theories of Sleep, 261

Electrophysiology of Sleep, 264

Humoral Factors in Sleep and Waking, 274

Summary, 278

Chapter 15 Attention, 281

Physiological Mechanisms of Attention, 281

Perception without Attention, 290

The Reticular Formation and Attention, 291

Summary, 294

PART FIVE MOTIVATION AND EMOTION, 297

Chapter 16 Some Regulatory Mechanisms, 301

Temperature Regulation, 301

Water Regulation, 308

Salt Balance, 317

Regulation of Other Minerals, 318

Other Specific Hungers, 320

Mechanisms of Feeding, 323

Summary, 335

Chapter 17 Nonregulatory Motivational Systems, 338

Reproductive Behavior, 338

Activity, Exploration, and Sensory Self-stimulation, 356

Escape and Aggressive Behavior, 359

Avoidance Behavior, 364

Humoral Factors in Aggressive, Escape, and Avoidance Behavior, 371

Summary, 372

Chapter 18	Self-stimulation and Mechanisms of Motivation, 378
	Measures of the Rewarding Effects of Stimulation, 378
	Anatomical Plotting of Reward Systems, 380
	Lesion Studies, 382
	Brain Activity during Self-stimulation, 382
	Behavior Elicited by Brain-stimulation Reward, 384
	Interaction of Rewarding Stimulation with Natural Rewards, 385
	Extinction and Intertrial Decrements in Self-stimulation Performance, 387
	Secondary Reinforcement, 392
	Effects of Pharmacological Agents upon Self-stimulation, 392
	Physiological Theories of Reinforcement and Motivation, 394
	Motivation as a Response Selector, 398
	Incentive Motivation and the Problem of Extinction, 406
	Escape and Avoidance Behavior, 407
	Reinforcement in the Expectancy Model, 408
	Mechanisms of Self-stimulation, 409
	Summary, 410

Chapter 19	The Frontal-Lobe Syndrome, 413
	Early Theories of Frontal-Lobe Function, 413
	Deficits in Delayed Response, 414
	Connection of the Frontal Lobes, 414
	Further Examination of Delayed-Response Deficits, 415
	Lesions of the Frontal Lobe in Man, 419
	Summary, 422

PART SIX MEMORY AND LEARNING, 425

Chapter 20	Physiological Contributions to Learning Theory, 427
	Physiological Bases of Learning, 429
	Human Memory Disturbances and the Phenomenon of Consolidation, 444
	Hippocampal Involvement in Animal Learning, 448
	Tests of the Consolidation Hypothesis, 449
	Summary, 457

Chapter 21	Biochemistry and Learning, 459
	DNA and the Control of Protein Synthesis, 459
	Differentiation of Cells, 460
	Investigations of Neurochemical Concomitants of Learning, 463
	Manipulation of Cell Metabolism, 466
	Summary, 470
