Preface . . . . .	v
-------------------	---

## Part One

### THE THEORETICAL AND EMPIRICAL PROBLEM

I.	Orientation and Approach . . . . .	1
	Notes on Definitions of Terms . . . . .	5
	Perceptual Research . . . . .	6
	A Methodological Problem . . . . .	7
	Personality Research (Body Image) . . . . .	11
	Conceptual Differences . . . . .	12
II.	The Neurological Study of Body Schemata . . . . .	16
	Clinical Neurological Research . . . . .	18
	Forms of Disturbance in Body Schemata . . . . .	19
	Case-Study Method . . . . .	21
	Phantom Phenomena . . . . .	26
	Denial . . . . .	31
	Conclusions . . . . .	32
	Schemata as Psychological Processes and Structures . . . . .	33
	Psychoanalytic Concepts . . . . .	33
	Gestalt Concepts: Isomorphism . . . . .	34
III.	Clinical Perceptual Research . . . . .	36
	Personal Body Perception in Physical Disability . . . . .	37
	Double Simultaneous Tactile Stimulation . . . . .	37
	Further Studies . . . . .	42
	Perception of Distances on the Body Surface . . . . .	45
	Integration . . . . .	54
	Personal Body Perception in Functional Clinical States . . . . .	56
	Linear Method . . . . .	56
	Configurational Method . . . . .	60
	Pictorial Method . . . . .	63
	Summary and Conclusions . . . . .	64

IV.	Perceptual Research with Nonclinical Groups	66
	Studies of Children	67
	Studies of Young Adults	69
	Implications	78
	Sensory - Tonic Theory	79
	Overview	83

### Part Two

## CONTRIBUTIONS TO THE STUDY OF PERSONAL BODY PERCEPTION

V.	Concepts and Constructs	85
	Variables	85
	Stimulus Variables	85
	Stable Subject Variables	88
	Transitory Subject Variables	89
	Response—Production Variables	90
	Model of the Judgment Process	91
	What Is Perception?	97
VI.	General Methods	99
	Organization of the Program	100
	Standard Conditions and Procedures	100
	Studies of Stimulus Variables	106
	Overview of the Investigations	108
	Characteristics of Body Perception Measured by the Linear Method	110
	Generalization	112
VII.	Studies of the Stimulus Situation	114
	Experiment I: Environmental Cues	114
	Experiment II: Verbal and Tactile Presentation; Repeated Measures	118
	Experiment III: Visual Cues from the Body	123
	Experiment IV: Part—Whole Relations	125
	Experiment V: Stimulus Input and Complexity	130
	Integration of Findings	137
	Stability of Patterns of Error Scores	138
	Operations of the Judgment System	139
VIII.	Studies of Response Production Variables	142
	Experiment VI: Verbal Response	145
	Experiment VII: Proprioceptive Cues	149
	Experiment VIII: Linear and Pictorial Modes	151
	General Discussion	155
	Final Speculations	157
	The Sensory Character of Schemata	157
	Studies of Visual Adaptation	161

## Part Three

## BODY EXPERIENCE AND PERSONALITY

IX.	The Concept of Body Image . . . . .	165
	Psychoanalysis and Related Theories . . . . .	165
	Existentialism . . . . .	168
	Body Image as a Theoretical Construct . . . . .	170
	Body Image as a Measurable Construct . . . . .	175
	Personality and Perception of the Body . . . . .	182
X.	Correlational Investigations . . . . .	184
	The Test of Body Perception . . . . .	184
	Consistency of Percentage Scores . . . . .	186
	General Statistical Procedures . . . . .	187
	16 P.F. Test . . . . .	188
	Motivation Analysis Test (MAT) . . . . .	190
	Draw-a-Person . . . . .	191
	Experienced Control . . . . .	193
	Barrier and Penetration Scores . . . . .	194
	Discussion . . . . .	196
	Perception of Distances on the Body . . . . .	196
	Perception—Personality Relations . . . . .	198
	One Last Wild Fling . . . . .	201
	Varieties of Body Experience . . . . .	202
	A Theoretical Model . . . . .	207
	References . . . . .	211
	Appendix . . . . .	227
	<i>Author Index</i> . . . . .	237
	<i>Subject Index</i> . . . . .	243
