|   |           |
|---|-----------|
| Preface   | ix        |
| List of Participants  | xiii      |
| Charge to Panels  | xvii      |
| <b>1. Recording and Interpreting Event-Related Potentials</b>                                       | <b>1</b>  |
| <i>Truett Allison</i>   |           |
| 1.1. Phrenology and Electrophrenology: It Takes a Lot of Gall<br>to Record Event-Related Potentials | 1         |
| 1.2. Electrogenesis: A Brief Summary  | 3         |
| 1.3. The Origins of ERP Components  | 20        |
| 1.4. Discussion   | 30        |
| <b>2. Current Research in the Study of Selective Attention</b>                                      | <b>37</b> |
| <i>Michael I. Posner</i>  |           |
| 2.1. Introduction   | 37        |
| 2.2. Selective Attention  | 38        |
| 2.3. Conclusion and Discussion  | 45        |
| <b>3. Event-Related Potentials and Selective Attention</b>  | <b>51</b> |
| <i>Steven A. Hillyard</i>   |           |

|  |            |
|--|------------|
| 3.1. The ERP, Its Structure and Use  | 51         |
| 3.2. The Cocktail Party Effect and the N1  | 55         |
| 3.3. Stimulus Set and Response Set   | 61         |
| 3.4. Discussion  | 70         |
| <b>4. Report of Panel I: Selective Attention</b>   | <b>73</b>  |
| <i>M. Posner (chair), R. Harter, S. Hillyard, A. Treisman</i>                            |            |
| <b>5. Dissociation Between Electrophysiology and Behavior—A Disaster or a Challenge?</b> | <b>107</b> |
| <i>Emanuel Donchin</i>   |            |
| 5.1. Introduction: In Praise of Dissociation   | 107        |
| 5.2. The ERPs Elicited by Rhyming Words  | 109        |
| 5.3. The Amplitude of P300   | 110        |
| 5.4. The Latency of P300   | 114        |
| <b>6. Theories and Models in Cognitive Psychology</b>                                    | <b>119</b> |
| <i>Donald A. Norman</i>  |            |
| 6.1. Introduction  | 119        |
| 6.2. Some Simple Psychological Theories  | 120        |
| 6.3. Attentional Limitations   | 129        |
| 6.4. Some Comments on Memory Structure   | 130        |
| 6.5. Summary and Discussion  | 131        |
| <b>7. Report of Panel II: The ERP and Decision and Memory Processes</b>                  | <b>139</b> |
| <i>T. Picton (chair), E. Donchin, J. Ford, D. Kahneman, D. Norman</i>                    |            |
| 7.1. The Data Base on P300   | 139        |
| 7.2. Stimulus Evaluation Time and P300   | 141        |
| 7.3. Subjective Probability and P300   | 145        |
| 7.4. Decision Theory and ERPs  | 156        |
| 7.5. World Models, Schemas, and ERPs   | 167        |
| 7.6. Controlled Processing and P300  | 173        |
| <b>8. Report of Panel III: Preparatory Processes</b>                                     | <b>179</b> |
| <i>W. Ritter (chair), S. Kelso, M. Kutas, R. Shiffrin</i>                                |            |
| 8.1. Survey of Event Preceding Negativities  | 179        |
| 8.2. Subcomponents of the Contingent Negative Variation                                  | 191        |
| 8.3. Considerations from a Theory of Movement  | 201        |

|  |            |
|--|------------|
| <b>9. The Timing of Mental Acts</b>  | <b>221</b> |
| <i>William Chase</i>   |            |
| 9.1. Donders and Mental Chronometry  | 221        |
| 9.2. Sternberg and Additive Factors  | 224        |
| 9.3. The Verification Process  | 227        |
| 9.4. The Quantification Process  | 235        |
| 9.5. Discussion  | 243        |
| <br><b>10. Report of Panel IV: Mental Chronometry</b>  | <b>249</b> |
| <i>W. Chase (chair), G. McCarthy, K. Squires, R. Schwaneveldt</i>  |            |
| 10.1. Introduction   | 249        |
| 10.2. The Latency of P300  | 251        |
| 10.3. Stimulus Evaluation Time and P300 Latency  | 254        |
| <br><b>11. ERPs and Psychophysics</b>  | <b>303</b> |
| <i>David Regan</i>   |            |
| 11.1. Introduction: Sensory Channels and ERPs  | 303        |
| 11.2. Experimental Demonstrations  | 305        |
| 11.3. Discussion   | 312        |
| <br><b>12. Report of Panel V: Perceptual Processes</b>   | <b>317</b> |
| <i>D. Regan (chair), T. Allison, L. Cooper, S. Palmer</i>  |            |
| 12.1. Conflicts Between Visual Psychophysics and ERPs  | 317        |
| 12.2. The Somesthetic ERP and the Perception of Stimulus Intensity                                       | 321        |
| 12.3. Representations: Ideas for Experiments   | 325        |
| <br><b>13. Report of Panel VI: Individual Differences and Clinical Applications</b>                      | <b>339</b> |
| <i>M. Oscar-Berman (chair), E. Callaway, N. Squires, E. Zaidel</i>                                       |            |
| 13.1. Introduction   | 339        |
| 13.2. A Tutorial Survey: Neuropsychology   | 339        |
| 13.3. ERPs and Diminished Mental Functioning   | 343        |
| 13.4. Hyperkinesis and ERPs  | 353        |
| 13.5. Korsakoff's Disease  | 358        |
| 13.6. Some Plans and Paradoxes in the Interface of Behavioral and ERP Indices of Hemispheric Asymmetries | 370        |
