

# Contents

## CHAPTER 1

Early Development of Behavior and the Nervous System: An Embryological Perspective . . . . .	1
<i>R. W. Oppenheim and L. Haverkamp</i>	
Introduction . . . . .	1
Some Embryological Findings . . . . .	3
Early Neural Development . . . . .	11
Neurobehavioral Development: The Role of Neural Activity . . . . .	17
Behavioral Embryology: Practice and Perceptual Experience . . . . .	24
References . . . . .	30

## CHAPTER 2

Motor Patterns in Development . . . . .	35
<i>John C. Fentress and Peter J. McLeod</i>	
Introduction . . . . .	35
<i>Preliminary Issues</i> . . . . .	35
<i>Approach Taken</i> . . . . .	36
Review of Issues . . . . .	37
<i>Basic Dimensions of Movement</i> . . . . .	37
<i>Spontaneous and Elicited Movements</i> . . . . .	41
<i>Higher-Order Motor Patterns</i> . . . . .	50
<i>Socially Integrated Motor Patterns</i> . . . . .	53
Some Personal Explorations . . . . .	60
<i>Rodent Motor Patterns</i> . . . . .	60

<i>Conditioned Movement Sequences and Stereotypies</i> . . . . .	70
<i>Canid Motor Patterns</i> . . . . .	72
<i>Emergent Issues</i> . . . . .	76
Developmental Processes: A Motor Perspective . . . . .	77
<i>Capabilities and Strategies</i> . . . . .	77
<i>Perspectives on Mechanism</i> . . . . .	79
<i>Summary Themes and Conclusions</i> . . . . .	85
References . . . . .	86

### CHAPTER 3

Environmental and Neural Determinants of Behavior in Development . . . . .	99
--	----

*Timothy H. Moran*

Introduction . . . . .	99
Suckling as an Organized Behavior . . . . .	100
<i>External Controls</i> . . . . .	101
<i>Internal Controls of Suckling</i> . . . . .	103
<i>Suckling and Reinforcement</i> . . . . .	105
Huddling . . . . .	106
Independent Ingestion . . . . .	109
<i>Water Intake</i> . . . . .	109
<i>Nutrient Intake</i> . . . . .	110
Brain Stimulation and Behavioral Organization . . . . .	112
Discussion . . . . .	118
Concluding Remarks . . . . .	123
References . . . . .	123

### CHAPTER 4

The Ontogeny of Vocal Learning in Songbirds . . . . .	129
---	-----

*Sarah W. Bottjer and Arthur P. Arnold*

Introduction . . . . .	129
Background . . . . .	130
<i>Behavioral Data</i> . . . . .	130
<i>Theoretical Framework</i> . . . . .	134
<i>Neuroanatomical Data</i> . . . . .	135
<i>Sexual Dimorphisms and Brain–Behavior Correlations</i> . . . . .	137
Neural Correlates of Song Learning . . . . .	140
<i>The Auditory Template</i> . . . . .	140
<i>Auditory–Motor Integration: The Matching Process</i> . . . . .	141
<i>The Central Motor Program</i> . . . . .	149
Possible Mechanisms of Song Learning . . . . .	151
<i>Development of the Central Motor Program</i> . . . . .	151

<i>Sensitive Periods for Song Learning</i> . . . . .	152
<i>Song Learning and Brain Volume Changes</i> . . . . .	154
Relations of Avian and Human Vocal Learning . . . . .	155
<i>Similarities Between Vocal Learning in Birds and Humans</i> . . . . .	155
<i>Relationships Between Vocal Perception and Production</i> . . . . .	157
References . . . . .	158

## CHAPTER 5

Early Development of Olfactory Function . . . . .	163
---	-----

*Patricia E. Pedersen, Charles A. Greer, and Gordon M. Shepherd*

Introduction . . . . .	163
Main Olfactory Epithelium . . . . .	164
Vomeronasal Organ . . . . .	167
Main Olfactory Bulb . . . . .	169
Accessory Olfactory Bulb . . . . .	175
Central Olfactory Projections . . . . .	175
Modified Glomerular Complex . . . . .	178
The Ontogeny of Olfactory Function: Overview . . . . .	180
Prenatal Activity in the Accessory Olfactory Bulb . . . . .	182
Early Postnatal Activity in the MGC . . . . .	187
Postnatal Activity in the Main Olfactory Bulb . . . . .	190
Discussion . . . . .	192
References . . . . .	197

## CHAPTER 6

Development of the Sense of Taste . . . . .	205
---	-----

*Charlotte M. Mistretta and Robert M. Bradley*

Introduction . . . . .	205
Development of the Rat Gustatory System . . . . .	207
<i>Changes in Electrophysiological Responses from Peripheral Taste Nerves</i> . . . . .	207
<i>Anatomical Correlates of Response Changes in Peripheral Taste Nerves</i> . . . . .	213
<i>Changes in Electrophysiological Responses from Central Nervous System</i>	
<i>Taste Neurons and Behavioral Implications</i> . . . . .	214
<i>Attempts to Modify the Rat Gustatory System through Early Experience</i> . . . . .	218
Development of the Sheep Gustatory System and Applications to	
Development of Taste Responses in Humans . . . . .	220
<i>Changes in Electrophysiological Responses from Peripheral Taste Nerves</i> . . . . .	221
<i>Anatomical Correlates of Response Changes in Peripheral Taste Nerves</i> . . . . .	224
<i>Changes in Electrophysiological Responses from Central Nervous System</i>	
<i>Taste Neurons and Implications for Human Behavioral Responses</i> . . . . .	227

Proposed Membrane Changes Underlying Development of Taste Responses . . . . .	230
Summary . . . . .	232
References . . . . .	233

CHAPTER 7

The Tunable Seer: Activity-Dependent Development of Vision . . . . .	237
<i>Helmut V. B. Hirsch</i>	
Experience-Dependent Developmental Programs . . . . .	237
The Retino-Geniculo-Cortical Pathway in Adult Cats . . . . .	239
<i>Functional Specialization in the Retina</i> . . . . .	241
<i>Parallel Pathways in the Visual System</i> . . . . .	242
<i>Orientation Selectivity of Area 17 Cells</i> . . . . .	243
<i>Distribution of Preferred Orientations in Retina, Lgn, and Area 17</i> . . . . .	245
Development of the Retino-Geniculo-Cortical Pathway in Normal Cats . . . . .	246
<i>Optics and Alignment of the Eyes</i> . . . . .	247
<i>Retinal Development</i> . . . . .	247
<i>Lgn Development</i> . . . . .	250
<i>Development of Area 17</i> . . . . .	254
Activity-Dependent Development of the Visual System . . . . .	258
<i>Neuronal Activity and Subcortical Development</i> . . . . .	259
<i>Neuronal Activity and Cortical Development</i> . . . . .	261
<i>Factors Controlling Differences in Experience Sensitivity of Cortical Cells</i> . . . . .	266
Extraretinal Factors in Visual System Development . . . . .	270
Behavioral Significance of Experience-Dependent Changes . . . . .	272
<i>Development of Visually Guided Behavior in the Kitten</i> . . . . .	272
<i>Correlating Behavioral and Visual System Development</i> . . . . .	275
<i>Effects of Stripe-Rearing on Visual Development</i> . . . . .	277
<i>Experience-Dependent Changes in "Attention"</i> . . . . .	280
Summary: The Tunable Seer . . . . .	281
<i>Developmental Changes</i> . . . . .	281
<i>Experience-Dependent Changes in Area 17</i> . . . . .	282
<i>Behavioral Significance of Experience-Dependent Development</i> . . . . .	283
<i>Integration of Genetic and Environmental Information</i> . . . . .	284
<i>Implications of Experience-Dependent Development</i> . . . . .	284
References . . . . .	285

CHAPTER 8

Development of Thermoregulation . . . . .	297
<i>Michael Leon</i>	
Introduction . . . . .	297
<i>Thermal Aspects of Embryonic Development</i> . . . . .	298
<i>Sexual Differentiation</i> . . . . .	300

Development of Thermoregulation .....	301
<i>Strategies for Thermoregulation</i> .....	301
<i>Maternal Defense of Neonatal Temperature</i> .....	304
<i>Adaptive Features of Hypothermia</i> .....	307
Mechanisms of Thermoregulation in Young Mammals .....	307
<i>Physiological Mechanisms</i> .....	307
<i>Behavioral Mechanisms</i> .....	308
Plasticity in the Development of Thermoregulatory Capacity .....	311
<i>Effects of Being Reared in Different Ambient Conditions</i> .....	311
<i>Thermal Mediation of Early Experience</i> .....	313
<i>Thermal Activation</i> .....	314
Summary .....	316
References .....	317

Index .....	323
