

Contents

<i>Preface</i>	<i>page</i>	vii
1 Introduction		1
2 Simple systems		13
3 Defining neural systems		29
4 Neural systems of <i>Hermissenda</i>		35
5 Relating neural change to behavioral change		55
6 Design of neural systems		65
7 The language of the nervous system		69
8 The nature of learning-induced neural change		73
9 A regenerative origin for a new class of biophysical phenomena		87
10 Translation of psychological into biological phenomena		98
11 A biophysical sequence		101
12 Molecular regulation of membrane channels during learning		104
13 A new network bias		119
14 Molluscan versus mammalian brain		125
15 Other models and observations		135
16 Model building from molluscan and mammalian parallels		143
17 Mollusc versus mammal: nonparallels		156
18 Biological records of memory		158
<i>Appendix</i>		161
<i>Index</i>		183
